

1,024 Paste-Ready Prompts to Master AI Productivity

A categorized library of full prompts for strategy, writing, research, automation, analysis, collaboration, and execution

Total prompts	1,024 full prompts	Format	Paste ready with placeholders
Organization	32 categories, 32 prompts each	Use case	Planning, writing, research, automation, analysis, and execution

Strategy

Writing

Research

Automation

Data

Leadership

How to use this library

Replace bracketed placeholders with your real context. Start with the prompt closest to your immediate need, then refine by adding constraints, audience, inputs, deadlines, and examples. For stronger outputs, give the AI your messy material instead of summarizing it too early.

Built for people who want usable prompts, not bloated lists.

Contents

Each category contains 32 prompts. The ranges below let you jump directly to the section you need.

Prompt range	Category
0001-0032	Goal Clarity and Scoping
0033-0064	Daily Planning and Prioritization
0065-0096	Deep Work and Execution
0097-0128	SOPs and Process Design
0129-0160	Project Management
0161-0192	Meeting Prep and Facilitation
0193-0224	Meeting Notes and Follow Ups
0225-0256	Email and Business Writing
0257-0288	Long Form Writing and Editing
0289-0320	Research and Synthesis
0321-0352	Learning and Skill Building
0353-0384	Decision Making and Risk
0385-0416	Product Strategy
0417-0448	Customer Research
0449-0480	Marketing Strategy
0481-0512	Content Creation
0513-0544	Sales Outreach
0545-0576	Customer Support and Success
0577-0608	Data Analysis
0609-0640	Reporting and Dashboards
0641-0672	Spreadsheets and Structured Data
0673-0704	Coding and Development
0705-0736	Debugging and QA
0737-0768	Automation and AI Workflows
0769-0800	Design and UX
0801-0832	Brainstorming and Creativity
0833-0864	Presentations and Public Speaking

Prompt range	Category
0865-0896	Leadership and Delegation
0897-0928	Hiring and Performance
0929-0960	Negotiation and Stakeholder Management
0961-0992	Knowledge Management and Documentation
0993-1024	Reflection and Continuous Improvement

Goal Clarity and Scoping

Prompts 0001-0032

Use these prompts to remove ambiguity, define success, and turn a fuzzy objective into work that can actually be executed.

0001. Turn a vague goal into an execution brief

Act as a strategic planning advisor. Turn the vague goal below into a clear execution brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to surface missing assumptions, decision owners, and a crisp definition of done. Ask at most three questions only if something essential is missing. Work item: [describe the goal]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0002. Build a step by step plan for a vague goal

Act as a strategic planning advisor. Break the vague goal below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to surface missing assumptions, decision owners, and a crisp definition of done. Work item: [describe the goal]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0003. Prioritize a vague goal with ruthless focus

Act as a strategic planning advisor. Review the vague goal below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to surface missing assumptions, decision owners, and a crisp definition of done. Work item: [describe the goal]. Options or tasks: [paste items]. Goal: [what matters most].

0004. Diagnose problems in a vague goal

Act as a strategic planning advisor. Diagnose why this vague goal is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to surface missing assumptions, decision owners, and a crisp definition of done. Current situation: [describe the goal]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0005. Draft a stakeholder alignment note for a vague goal

Act as a strategic planning advisor. Draft a stakeholder alignment note based on the vague goal below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to surface missing assumptions, decision owners, and a crisp definition of done. Audience: [who will read this]. Work item: [describe the goal]. Tone: [confident, warm, direct, diplomatic, etc.].

0006. Convert a vague goal into a goal scoping checklist

Act as a strategic planning advisor. Convert the vague goal below into a reusable goal scoping checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to surface missing assumptions, decision owners, and a crisp definition of done. Work item: [describe the goal]. Context: [team, tool, workflow, or use case].

0007. Learn how to handle a vague goal better

Act as a strategic planning advisor. Teach me how to handle a vague goal much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to surface missing assumptions, decision owners, and a crisp definition of done. Topic or problem: [describe the goal]. Current level: [describe experience].

0008. Design an AI assisted workflow for a vague goal

Act as a strategic planning advisor and AI workflow architect. Design an AI assisted system for the vague goal below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to surface missing assumptions, decision owners, and a crisp definition of done. Current process: [describe the goal]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0009. Turn a side project idea into an execution brief

Act as a strategic planning advisor. Turn the side project idea below into a clear execution brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to separate the exciting parts from the essential parts and keep the scope lean. Ask at most three questions only if something essential is missing. Work item: [describe the idea]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0010. Build a step by step plan for a side project idea

Act as a strategic planning advisor. Break the side project idea below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to separate the exciting parts from the essential parts and keep the scope lean. Work item: [describe the idea]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0011. Prioritize a side project idea with ruthless focus

Act as a strategic planning advisor. Review the side project idea below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to separate the exciting parts from the essential parts and keep the scope lean. Work item: [describe the idea]. Options or tasks: [paste items]. Goal: [what matters most].

0012. Diagnose problems in a side project idea

Act as a strategic planning advisor. Diagnose why this side project idea is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to separate the exciting parts from the essential parts and keep the scope lean. Current situation: [describe the idea]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0013. Draft a stakeholder alignment note for a side project idea

Act as a strategic planning advisor. Draft a stakeholder alignment note based on the side project idea below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to separate the exciting parts from the essential parts and keep the scope lean. Audience: [who will read this]. Work item: [describe the idea]. Tone: [confident, warm, direct, diplomatic, etc.].

0014. Convert a side project idea into a goal scoping checklist

Act as a strategic planning advisor. Convert the side project idea below into a reusable goal scoping checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to separate the exciting parts from the essential parts and keep the scope lean. Work item: [describe the idea]. Context: [team, tool, workflow, or use case].

0015. Learn how to handle a side project idea better

Act as a strategic planning advisor. Teach me how to handle a side project idea much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to separate the exciting parts from the essential parts and keep the scope lean. Topic or problem: [describe the idea]. Current level: [describe experience].

0016. Design an AI assisted workflow for a side project idea

Act as a strategic planning advisor and AI workflow architect. Design an AI assisted system for the side project idea below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to separate the exciting parts from the essential parts and keep the scope lean. Current process: [describe the idea]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0017. Turn a leadership request into an execution brief

Act as a strategic planning advisor. Turn the leadership request below into a clear execution brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to clarify intent, trade offs, approval points, and what must happen first. Ask at most three questions only if something essential is missing. Work item: [paste the request or ask]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0018. Build a step by step plan for a leadership request

Act as a strategic planning advisor. Break the leadership request below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to clarify intent, trade offs, approval points, and what must happen first. Work item: [paste the request or ask]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0019. Prioritize a leadership request with ruthless focus

Act as a strategic planning advisor. Review the leadership request below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to clarify intent, trade offs, approval points, and what must happen first. Work item: [paste the request or ask]. Options or tasks: [paste items]. Goal: [what matters most].

0020. Diagnose problems in a leadership request

Act as a strategic planning advisor. Diagnose why this leadership request is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to clarify intent, trade offs, approval points, and what must happen first. Current situation: [paste the request or ask]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0021. Draft a stakeholder alignment note for a leadership request

Act as a strategic planning advisor. Draft a stakeholder alignment note based on the leadership request below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to clarify intent, trade offs, approval points, and what must happen first. Audience: [who will read this]. Work item: [paste the request or ask]. Tone: [confident, warm, direct, diplomatic, etc.].

0022. Convert a leadership request into a goal scoping checklist

Act as a strategic planning advisor. Convert the leadership request below into a reusable goal scoping checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to clarify intent, trade offs, approval points, and what must happen first. Work item: [paste the request or ask]. Context: [team, tool, workflow, or use case].

0023. Learn how to handle a leadership request better

Act as a strategic planning advisor. Teach me how to handle a leadership request much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to clarify intent, trade offs, approval points, and what must happen first. Topic or problem: [paste the request or ask]. Current level: [describe experience].

0024. Design an AI assisted workflow for a leadership request

Act as a strategic planning advisor and AI workflow architect. Design an AI assisted system for the leadership request below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to clarify intent, trade offs, approval points, and what must happen first. Current process: [paste the request or ask]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0025. Turn a personal improvement target into an execution brief

Act as a strategic planning advisor. Turn the personal improvement target below into a clear execution brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to translate ambition into measurable progress, routines, and a realistic time horizon. Ask at most three questions only if something essential is missing. Work item: [describe the target]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0026. Build a step by step plan for a personal improvement target

Act as a strategic planning advisor. Break the personal improvement target below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to translate ambition into measurable progress, routines, and a realistic time horizon. Work item: [describe the target]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0027. Prioritize a personal improvement target with ruthless focus

Act as a strategic planning advisor. Review the personal improvement target below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to translate ambition into measurable progress, routines, and a realistic time horizon. Work item: [describe the target]. Options or tasks: [paste items]. Goal: [what matters most].

0028. Diagnose problems in a personal improvement target

Act as a strategic planning advisor. Diagnose why this personal improvement target is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to translate ambition into measurable progress, routines, and a realistic time horizon. Current situation: [describe the target]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0029. Draft a stakeholder alignment note for a personal improvement target

Act as a strategic planning advisor. Draft a stakeholder alignment note based on the personal improvement target below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to translate ambition into measurable progress, routines, and a realistic time horizon. Audience: [who will read this]. Work item: [describe the target]. Tone: [confident, warm, direct, diplomatic, etc.].

0030. Convert a personal improvement target into a goal scoping checklist

Act as a strategic planning advisor. Convert the personal improvement target below into a reusable goal scoping checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to translate ambition into measurable progress, routines, and a realistic time horizon. Work item: [describe the target]. Context: [team, tool, workflow, or use case].

0031. Learn how to handle a personal improvement target better

Act as a strategic planning advisor. Teach me how to handle a personal improvement target much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to translate ambition into measurable progress, routines, and a realistic time horizon. Topic or problem: [describe the target]. Current level: [describe experience].

0032. Design an AI assisted workflow for a personal improvement target

Act as a strategic planning advisor and AI workflow architect. Design an AI assisted system for the personal improvement target below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to translate ambition into measurable progress, routines, and a realistic time horizon. Current process: [describe the target]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Daily Planning and Prioritization

Prompts 0033-0064

These prompts help you decide what matters today, cut noise, and turn a crowded list into a calm, high leverage plan.

0033. Turn an overloaded task list into a time blocked plan

Act as a productivity strategist. Turn the overloaded task list below into a clear time blocked plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to balance deadlines, strategic value, available energy, and task switching costs. Ask at most three questions only if something essential is missing. Planning input: [paste the task list]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0034. Build a step by step plan for an overloaded task list

Act as a productivity strategist. Break the overloaded task list below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to balance deadlines, strategic value, available energy, and task switching costs. Planning input: [paste the task list]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0035. Prioritize an overloaded task list with ruthless focus

Act as a productivity strategist. Review the overloaded task list below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to balance deadlines, strategic value, available energy, and task switching costs. Planning input: [paste the task list]. Options or tasks: [paste items]. Goal: [what matters most].

0036. Diagnose problems in an overloaded task list

Act as a productivity strategist. Diagnose why this overloaded task list is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to balance deadlines, strategic value, available energy, and task switching costs. Current situation: [paste the task list]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0037. Draft a priority update for an overloaded task list

Act as a productivity strategist. Draft a priority update based on the overloaded task list below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to balance deadlines, strategic value, available energy, and task switching costs. Audience: [who will read this]. Planning input: [paste the task list]. Tone: [confident, warm, direct, diplomatic, etc.].

0038. Convert an overloaded task list into a daily planning routine

Act as a productivity strategist. Convert the overloaded task list below into a reusable daily planning routine. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to balance deadlines, strategic value, available energy, and task switching costs. Planning input: [paste the task list]. Context: [team, tool, workflow, or use case].

0039. Learn how to handle an overloaded task list better

Act as a productivity strategist. Teach me how to handle an overloaded task list much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to balance deadlines, strategic value, available energy, and task switching costs. Topic or problem: [paste the task list]. Current level: [describe experience].

0040. Design an AI assisted workflow for an overloaded task list

Act as a productivity strategist and AI workflow architect. Design an AI assisted system for the overloaded task list below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to balance deadlines, strategic value, available energy, and task switching costs. Current process: [paste the task list]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0041. Turn a hectic workday into a time blocked plan

Act as a productivity strategist. Turn the hectic workday below into a clear time blocked plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to protect deep work while still handling unavoidable interruptions. Ask at most three questions only if something essential is missing. Planning input: [describe meetings, deadlines, and obligations]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0042. Build a step by step plan for a hectic workday

Act as a productivity strategist. Break the hectic workday below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to protect deep work while still handling unavoidable interruptions. Planning input: [describe meetings, deadlines, and obligations]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0043. Prioritize a hectic workday with ruthless focus

Act as a productivity strategist. Review the hectic workday below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to protect deep work while still handling unavoidable interruptions. Planning input: [describe meetings, deadlines, and obligations]. Options or tasks: [paste items]. Goal: [what matters most].

0044. Diagnose problems in a hectic workday

Act as a productivity strategist. Diagnose why this hectic workday is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to protect deep work while still handling unavoidable interruptions. Current situation: [describe meetings, deadlines, and obligations]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0045. Draft a priority update for a hectic workday

Act as a productivity strategist. Draft a priority update based on the hectic workday below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to protect deep work while still handling unavoidable interruptions. Audience: [who will read this]. Planning input: [describe meetings, deadlines, and obligations]. Tone: [confident, warm, direct, diplomatic, etc.].

0046. Convert a hectic workday into a daily planning routine

Act as a productivity strategist. Convert the hectic workday below into a reusable daily planning routine. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to protect deep work while still handling unavoidable interruptions. Planning input: [describe meetings, deadlines, and obligations]. Context: [team, tool, workflow, or use case].

0047. Learn how to handle a hectic workday better

Act as a productivity strategist. Teach me how to handle a hectic workday much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to protect deep work while still handling unavoidable interruptions. Topic or problem: [describe meetings, deadlines, and obligations]. Current level: [describe experience].

0048. Design an AI assisted workflow for a hectic workday

Act as a productivity strategist and AI workflow architect. Design an AI assisted system for the hectic workday below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to protect deep work while still handling unavoidable interruptions. Current process: [describe meetings, deadlines, and obligations]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0049. Turn a weekly plan into a time blocked plan

Act as a productivity strategist. Turn the weekly plan below into a clear time blocked plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to sequence work so the week creates momentum instead of reactive busywork. Ask at most three questions only if something essential is missing. Planning input: [paste priorities for the week]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0050. Build a step by step plan for a weekly plan

Act as a productivity strategist. Break the weekly plan below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to sequence work so the week creates momentum instead of reactive busywork. Planning input: [paste priorities for the week]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0051. Prioritize a weekly plan with ruthless focus

Act as a productivity strategist. Review the weekly plan below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to sequence work so the week creates momentum instead of reactive busywork. Planning input: [paste priorities for the week]. Options or tasks: [paste items]. Goal: [what matters most].

0052. Diagnose problems in a weekly plan

Act as a productivity strategist. Diagnose why this weekly plan is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to sequence work so the week creates momentum instead of reactive busywork. Current situation: [paste priorities for the week]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0053. Draft a priority update for a weekly plan

Act as a productivity strategist. Draft a priority update based on the weekly plan below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to sequence work so the week creates momentum instead of reactive busywork. Audience: [who will read this]. Planning input: [paste priorities for the week]. Tone: [confident, warm, direct, diplomatic, etc.].

0054. Convert a weekly plan into a daily planning routine

Act as a productivity strategist. Convert the weekly plan below into a reusable daily planning routine. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to sequence work so the week creates momentum instead of reactive busywork. Planning input: [paste priorities for the week]. Context: [team, tool, workflow, or use case].

0055. Learn how to handle a weekly plan better

Act as a productivity strategist. Teach me how to handle a weekly plan much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to sequence work so the week creates momentum instead of reactive busywork. Topic or problem: [paste priorities for the week]. Current level: [describe experience].

0056. Design an AI assisted workflow for a weekly plan

Act as a productivity strategist and AI workflow architect. Design an AI assisted system for the weekly plan below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to sequence work so the week creates momentum instead of reactive busywork. Current process: [paste priorities for the week]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0057. Turn an urgent and important conflict into a time blocked plan

Act as a productivity strategist. Turn the urgent and important conflict below into a clear time blocked plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to make trade offs visible and avoid defaulting to the loudest request. Ask at most three questions only if something essential is missing. Planning input: [describe the competing demands]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0058. Build a step by step plan for an urgent and important conflict

Act as a productivity strategist. Break the urgent and important conflict below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to make trade offs visible and avoid defaulting to the loudest request. Planning input: [describe the competing demands]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0059. Prioritize an urgent and important conflict with ruthless focus

Act as a productivity strategist. Review the urgent and important conflict below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to make trade offs visible and avoid defaulting to the loudest request. Planning input: [describe the competing demands]. Options or tasks: [paste items]. Goal: [what matters most].

0060. Diagnose problems in an urgent and important conflict

Act as a productivity strategist. Diagnose why this urgent and important conflict is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to make trade offs visible and avoid defaulting to the loudest request. Current situation: [describe the competing demands]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0061. Draft a priority update for an urgent and important conflict

Act as a productivity strategist. Draft a priority update based on the urgent and important conflict below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to make trade offs visible and avoid defaulting to the loudest request. Audience: [who will read this]. Planning input: [describe the competing demands]. Tone: [confident, warm, direct, diplomatic, etc.].

0062. Convert an urgent and important conflict into a daily planning routine

Act as a productivity strategist. Convert the urgent and important conflict below into a reusable daily planning routine. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to make trade offs visible and avoid defaulting to the loudest request. Planning input: [describe the competing demands]. Context: [team, tool, workflow, or use case].

0063. Learn how to handle an urgent and important conflict better

Act as a productivity strategist. Teach me how to handle an urgent and important conflict much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to make trade offs visible and avoid defaulting to the loudest request. Topic or problem: [describe the competing demands]. Current level: [describe experience].

0064. Design an AI assisted workflow for an urgent and important conflict

Act as a productivity strategist and AI workflow architect. Design an AI assisted system for the urgent and important conflict below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to make trade offs visible and avoid defaulting to the loudest request. Current process: [describe the competing demands]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Deep Work and Execution

Prompts 0065-0096

Use this section to protect concentration, start faster, and finish meaningful work with less friction and fewer context switches.

0065. Turn an important task you keep postponing into a focus session plan

Act as a focus coach. Turn the important task you keep postponing below into a clear focus session plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to reduce avoidance by making the starting point smaller and more concrete. Ask at most three questions only if something essential is missing. Work session: [describe the task]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0066. Build a step by step plan for an important task you keep postponing

Act as a focus coach. Break the important task you keep postponing below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to reduce avoidance by making the starting point smaller and more concrete. Work session: [describe the task]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0067. Prioritize an important task you keep postponing with ruthless focus

Act as a focus coach. Review the important task you keep postponing below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to reduce avoidance by making the starting point smaller and more concrete. Work session: [describe the task]. Options or tasks: [paste items]. Goal: [what matters most].

0068. Diagnose problems in an important task you keep postponing

Act as a focus coach. Diagnose why this important task you keep postponing is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to reduce avoidance by making the starting point smaller and more concrete. Current situation: [describe the task]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0069. Draft a progress note for an important task you keep postponing

Act as a focus coach. Draft a progress note based on the important task you keep postponing below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to reduce avoidance by making the starting point smaller and more concrete. Audience: [who will read this]. Work session: [describe the task]. Tone: [confident, warm, direct, diplomatic, etc.].

0070. Convert an important task you keep postponing into a deep work ritual

Act as a focus coach. Convert the important task you keep postponing below into a reusable deep work ritual. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to reduce avoidance by making the starting point smaller and more concrete. Work session: [describe the task]. Context: [team, tool, workflow, or use case].

0071. Learn how to handle an important task you keep postponing better

Act as a focus coach. Teach me how to handle an important task you keep postponing much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to reduce avoidance by making the starting point smaller and more concrete. Topic or problem: [describe the task]. Current level: [describe experience].

0072. Design an AI assisted workflow for an important task you keep postponing

Act as a focus coach and AI workflow architect. Design an AI assisted system for the important task you keep postponing below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to reduce avoidance by making the starting point smaller and more concrete. Current process: [describe the task]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0073. Turn a complex analysis session into a focus session plan

Act as a focus coach. Turn the complex analysis session below into a clear focus session plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to define the right sequence of thinking so the session produces insight instead of confusion. Ask at most three questions only if something essential is missing. Work session: [describe the analysis objective]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0074. Build a step by step plan for a complex analysis session

Act as a focus coach. Break the complex analysis session below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to define the right sequence of thinking so the session produces insight instead of confusion. Work session: [describe the analysis objective]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0075. Prioritize a complex analysis session with ruthless focus

Act as a focus coach. Review the complex analysis session below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to define the right sequence of thinking so the session produces insight instead of confusion. Work session: [describe the analysis objective]. Options or tasks: [paste items]. Goal: [what matters most].

0076. Diagnose problems in a complex analysis session

Act as a focus coach. Diagnose why this complex analysis session is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to define the right sequence of thinking so the session produces insight instead of confusion. Current situation: [describe the analysis objective]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0077. Draft a progress note for a complex analysis session

Act as a focus coach. Draft a progress note based on the complex analysis session below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to define the right sequence of thinking so the session produces insight instead of confusion. Audience: [who will read this]. Work session: [describe the analysis objective]. Tone: [confident, warm, direct, diplomatic, etc.].

0078. Convert a complex analysis session into a deep work ritual

Act as a focus coach. Convert the complex analysis session below into a reusable deep work ritual. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to define the right sequence of thinking so the session produces insight instead of confusion. Work session: [describe the analysis objective]. Context: [team, tool, workflow, or use case].

0079. Learn how to handle a complex analysis session better

Act as a focus coach. Teach me how to handle a complex analysis session much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to define the right sequence of thinking so the session produces insight instead of confusion. Topic or problem: [describe the analysis objective]. Current level: [describe experience].

0080. Design an AI assisted workflow for a complex analysis session

Act as a focus coach and AI workflow architect. Design an AI assisted system for the complex analysis session below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to define the right sequence of thinking so the session produces insight instead of confusion. Current process: [describe the analysis objective]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0081. Turn a writing sprint into a focus session plan

Act as a focus coach. Turn the writing sprint below into a clear focus session plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to separate drafting from editing and keep the session focused on forward motion. Ask at most three questions only if something essential is missing. Work session: [describe what you need to write]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0082. Build a step by step plan for a writing sprint

Act as a focus coach. Break the writing sprint below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to separate drafting from editing and keep the session focused on forward motion. Work session: [describe what you need to write]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0083. Prioritize a writing sprint with ruthless focus

Act as a focus coach. Review the writing sprint below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to separate drafting from editing and keep the session focused on forward motion. Work session: [describe what you need to write]. Options or tasks: [paste items]. Goal: [what matters most].

0084. Diagnose problems in a writing sprint

Act as a focus coach. Diagnose why this writing sprint is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to separate drafting from editing and keep the session focused on forward motion. Current situation: [describe what you need to write]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0085. Draft a progress note for a writing sprint

Act as a focus coach. Draft a progress note based on the writing sprint below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to separate drafting from editing and keep the session focused on forward motion. Audience: [who will read this]. Work session: [describe what you need to write]. Tone: [confident, warm, direct, diplomatic, etc.].

0086. Convert a writing sprint into a deep work ritual

Act as a focus coach. Convert the writing sprint below into a reusable deep work ritual. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to separate drafting from editing and keep the session focused on forward motion. Work session: [describe what you need to write]. Context: [team, tool, workflow, or use case].

0087. Learn how to handle a writing sprint better

Act as a focus coach. Teach me how to handle a writing sprint much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to separate drafting from editing and keep the session focused on forward motion. Topic or problem: [describe what you need to write]. Current level: [describe experience].

0088. Design an AI assisted workflow for a writing sprint

Act as a focus coach and AI workflow architect. Design an AI assisted system for the writing sprint below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to separate drafting from editing and keep the session focused on forward motion. Current process: [describe what you need to write]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0089. Turn a distraction heavy work block into a focus session plan

Act as a focus coach. Turn the distraction heavy work block below into a clear focus session plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to control interruptions, protect attention, and create a realistic completion target. Ask at most three questions only if something essential is missing. Work session: [describe the work and distractions]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0090. Build a step by step plan for a distraction heavy work block

Act as a focus coach. Break the distraction heavy work block below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to control interruptions, protect attention, and create a realistic completion target. Work session: [describe the work and distractions]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0091. Prioritize a distraction heavy work block with ruthless focus

Act as a focus coach. Review the distraction heavy work block below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to control interruptions, protect attention, and create a realistic completion target. Work session: [describe the work and distractions]. Options or tasks: [paste items]. Goal: [what matters most].

0092. Diagnose problems in a distraction heavy work block

Act as a focus coach. Diagnose why this distraction heavy work block is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to control interruptions, protect attention, and create a realistic completion target. Current situation: [describe the work and distractions]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0093. Draft a progress note for a distraction heavy work block

Act as a focus coach. Draft a progress note based on the distraction heavy work block below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to control interruptions, protect attention, and create a realistic completion target. Audience: [who will read this]. Work session: [describe the work and distractions]. Tone: [confident, warm, direct, diplomatic, etc.].

0094. Convert a distraction heavy work block into a deep work ritual

Act as a focus coach. Convert the distraction heavy work block below into a reusable deep work ritual. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to control interruptions, protect attention, and create a realistic completion target. Work session: [describe the work and distractions]. Context: [team, tool, workflow, or use case].

0095. Learn how to handle a distraction heavy work block better

Act as a focus coach. Teach me how to handle a distraction heavy work block much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to control interruptions, protect attention, and create a realistic completion target. Topic or problem: [describe the work and distractions]. Current level: [describe experience].

0096. Design an AI assisted workflow for a distraction heavy work block

Act as a focus coach and AI workflow architect. Design an AI assisted system for the distraction heavy work block below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to control interruptions, protect attention, and create a realistic completion target. Current process: [describe the work and distractions]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

SOPs and Process Design

Prompts 0097-0128

These prompts turn repeated work into clean systems so quality improves, handoffs get smoother, and less depends on memory.

0097. Turn a recurring team task into a process map

Act as a operations architect. Turn the recurring team task below into a clear process map. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to document the trigger, owner, inputs, outputs, and quality checks clearly. Ask at most three questions only if something essential is missing. Process: [describe the recurring task]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0098. Build a step by step plan for a recurring team task

Act as a operations architect. Break the recurring team task below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to document the trigger, owner, inputs, outputs, and quality checks clearly. Process: [describe the recurring task]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0099. Prioritize a recurring team task with ruthless focus

Act as a operations architect. Review the recurring team task below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to document the trigger, owner, inputs, outputs, and quality checks clearly. Process: [describe the recurring task]. Options or tasks: [paste items]. Goal: [what matters most].

0100. Diagnose problems in a recurring team task

Act as a operations architect. Diagnose why this recurring team task is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to document the trigger, owner, inputs, outputs, and quality checks clearly. Current situation: [describe the recurring task]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0101. Draft a process rollout memo for a recurring team task

Act as a operations architect. Draft a process rollout memo based on the recurring team task below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to document the trigger, owner, inputs, outputs, and quality checks clearly. Audience: [who will read this]. Process: [describe the recurring task]. Tone: [confident, warm, direct, diplomatic, etc.].

0102. Convert a recurring team task into a standard operating procedure

Act as a operations architect. Convert the recurring team task below into a reusable standard operating procedure. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to document the trigger, owner, inputs, outputs, and quality checks clearly. Process: [describe the recurring task]. Context: [team, tool, workflow, or use case].

0103. Learn how to handle a recurring team task better

Act as a operations architect. Teach me how to handle a recurring team task much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to document the trigger, owner, inputs, outputs, and quality checks clearly. Topic or problem: [describe the recurring task]. Current level: [describe experience].

0104. Design an AI assisted workflow for a recurring team task

Act as a operations architect and AI workflow architect. Design an AI assisted system for the recurring team task below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to document the trigger, owner, inputs, outputs, and quality checks clearly. Current process: [describe the recurring task]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0105. Turn a client onboarding process into a process map

Act as a operations architect. Turn the client onboarding process below into a clear process map. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to identify handoff risks, missing information, and ways to reduce wait time. Ask at most three questions only if something essential is missing. Process: [describe the onboarding flow]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0106. Build a step by step plan for a client onboarding process

Act as a operations architect. Break the client onboarding process below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to identify handoff risks, missing information, and ways to reduce wait time. Process: [describe the onboarding flow]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0107. Prioritize a client onboarding process with ruthless focus

Act as a operations architect. Review the client onboarding process below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to identify handoff risks, missing information, and ways to reduce wait time. Process: [describe the onboarding flow]. Options or tasks: [paste items]. Goal: [what matters most].

0108. Diagnose problems in a client onboarding process

Act as a operations architect. Diagnose why this client onboarding process is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to identify handoff risks, missing information, and ways to reduce wait time. Current situation: [describe the onboarding flow]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0109. Draft a process rollout memo for a client onboarding process

Act as a operations architect. Draft a process rollout memo based on the client onboarding process below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to identify handoff risks, missing information, and ways to reduce wait time. Audience: [who will read this]. Process: [describe the onboarding flow]. Tone: [confident, warm, direct, diplomatic, etc.].

0110. Convert a client onboarding process into a standard operating procedure

Act as a operations architect. Convert the client onboarding process below into a reusable standard operating procedure. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to identify handoff risks, missing information, and ways to reduce wait time. Process: [describe the onboarding flow]. Context: [team, tool, workflow, or use case].

0111. Learn how to handle a client onboarding process better

Act as a operations architect. Teach me how to handle a client onboarding process much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to identify handoff risks, missing information, and ways to reduce wait time. Topic or problem: [describe the onboarding flow]. Current level: [describe experience].

0112. Design an AI assisted workflow for a client onboarding process

Act as a operations architect and AI workflow architect. Design an AI assisted system for the client onboarding process below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to identify handoff risks, missing information, and ways to reduce wait time. Current process: [describe the onboarding flow]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0113. Turn a monthly reporting cycle into a process map

Act as a operations architect. Turn the monthly reporting cycle below into a clear process map. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to remove manual work, reduce bottlenecks, and make the process easier to audit. Ask at most three questions only if something essential is missing. Process: [describe the reporting process]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0114. Build a step by step plan for a monthly reporting cycle

Act as a operations architect. Break the monthly reporting cycle below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to remove manual work, reduce bottlenecks, and make the process easier to audit. Process: [describe the reporting process]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0115. Prioritize a monthly reporting cycle with ruthless focus

Act as a operations architect. Review the monthly reporting cycle below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to remove manual work, reduce bottlenecks, and make the process easier to audit. Process: [describe the reporting process]. Options or tasks: [paste items]. Goal: [what matters most].

0116. Diagnose problems in a monthly reporting cycle

Act as a operations architect. Diagnose why this monthly reporting cycle is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to remove manual work, reduce bottlenecks, and make the process easier to audit. Current situation: [describe the reporting process]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0117. Draft a process rollout memo for a monthly reporting cycle

Act as a operations architect. Draft a process rollout memo based on the monthly reporting cycle below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to remove manual work, reduce bottlenecks, and make the process easier to audit. Audience: [who will read this]. Process: [describe the reporting process]. Tone: [confident, warm, direct, diplomatic, etc.].

0118. Convert a monthly reporting cycle into a standard operating procedure

Act as a operations architect. Convert the monthly reporting cycle below into a reusable standard operating procedure. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to remove manual work, reduce bottlenecks, and make the process easier to audit. Process: [describe the reporting process]. Context: [team, tool, workflow, or use case].

0119. Learn how to handle a monthly reporting cycle better

Act as a operations architect. Teach me how to handle a monthly reporting cycle much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to remove manual work, reduce bottlenecks, and make the process easier to audit. Topic or problem: [describe the reporting process]. Current level: [describe experience].

0120. Design an AI assisted workflow for a monthly reporting cycle

Act as a operations architect and AI workflow architect. Design an AI assisted system for the monthly reporting cycle below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to remove manual work, reduce bottlenecks, and make the process easier to audit. Current process: [describe the reporting process]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0121. Turn a handoff between teams into a process map

Act as a operations architect. Turn the handoff between teams below into a clear process map. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to make accountability explicit and prevent tasks from falling into the gaps. Ask at most three questions only if something essential is missing. Process: [describe the current handoff]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0122. Build a step by step plan for a handoff between teams

Act as a operations architect. Break the handoff between teams below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to make accountability explicit and prevent tasks from falling into the gaps. Process: [describe the current handoff]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0123. Prioritize a handoff between teams with ruthless focus

Act as a operations architect. Review the handoff between teams below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to make accountability explicit and prevent tasks from falling into the gaps. Process: [describe the current handoff]. Options or tasks: [paste items]. Goal: [what matters most].

0124. Diagnose problems in a handoff between teams

Act as a operations architect. Diagnose why this handoff between teams is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to make accountability explicit and prevent tasks from falling into the gaps. Current situation: [describe the current handoff]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0125. Draft a process rollout memo for a handoff between teams

Act as a operations architect. Draft a process rollout memo based on the handoff between teams below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to make accountability explicit and prevent tasks from falling into the gaps. Audience: [who will read this]. Process: [describe the current handoff]. Tone: [confident, warm, direct, diplomatic, etc.].

0126. Convert a handoff between teams into a standard operating procedure

Act as a operations architect. Convert the handoff between teams below into a reusable standard operating procedure. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to make accountability explicit and prevent tasks from falling into the gaps. Process: [describe the current handoff]. Context: [team, tool, workflow, or use case].

0127. Learn how to handle a handoff between teams better

Act as a operations architect. Teach me how to handle a handoff between teams much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to make accountability explicit and prevent tasks from falling into the gaps. Topic or problem: [describe the current handoff]. Current level: [describe experience].

0128. Design an AI assisted workflow for a handoff between teams

Act as a operations architect and AI workflow architect. Design an AI assisted system for the handoff between teams below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to make accountability explicit and prevent tasks from falling into the gaps. Current process: [describe the current handoff]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Project Management

Prompts 0129-0160

Use these prompts to bring structure to launches, messy backlogs, delayed work, and cross functional coordination.

0129. Turn a cross functional launch into a project plan

Act as a program manager. Turn the cross functional launch below into a clear project plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to surface dependencies, milestones, owners, and approval risks early. Ask at most three questions only if something essential is missing. Project: [describe the launch]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0130. Build a step by step plan for a cross functional launch

Act as a program manager. Break the cross functional launch below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to surface dependencies, milestones, owners, and approval risks early. Project: [describe the launch]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0131. Prioritize a cross functional launch with ruthless focus

Act as a program manager. Review the cross functional launch below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to surface dependencies, milestones, owners, and approval risks early. Project: [describe the launch]. Options or tasks: [paste items]. Goal: [what matters most].

0132. Diagnose problems in a cross functional launch

Act as a program manager. Diagnose why this cross functional launch is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to surface dependencies, milestones, owners, and approval risks early. Current situation: [describe the launch]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0133. Draft a project status update for a cross functional launch

Act as a program manager. Draft a project status update based on the cross functional launch below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to surface dependencies, milestones, owners, and approval risks early. Audience: [who will read this]. Project: [describe the launch]. Tone: [confident, warm, direct, diplomatic, etc.].

0134. Convert a cross functional launch into a project operating checklist

Act as a program manager. Convert the cross functional launch below into a reusable project operating checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to surface dependencies, milestones, owners, and approval risks early. Project: [describe the launch]. Context: [team, tool, workflow, or use case].

0135. Learn how to handle a cross functional launch better

Act as a program manager. Teach me how to handle a cross functional launch much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to surface dependencies, milestones, owners, and approval risks early. Topic or problem: [describe the launch]. Current level: [describe experience].

0136. Design an AI assisted workflow for a cross functional launch

Act as a program manager and AI workflow architect. Design an AI assisted system for the cross functional launch below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to surface dependencies, milestones, owners, and approval risks early. Current process: [describe the launch]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0137. Turn a delayed project into a project plan

Act as a program manager. Turn the delayed project below into a clear project plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to separate delay symptoms from the specific causes that need intervention. Ask at most three questions only if something essential is missing. Project: [describe the current status]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0138. Build a step by step plan for a delayed project

Act as a program manager. Break the delayed project below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to separate delay symptoms from the specific causes that need intervention. Project: [describe the current status]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0139. Prioritize a delayed project with ruthless focus

Act as a program manager. Review the delayed project below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to separate delay symptoms from the specific causes that need intervention. Project: [describe the current status]. Options or tasks: [paste items]. Goal: [what matters most].

0140. Diagnose problems in a delayed project

Act as a program manager. Diagnose why this delayed project is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to separate delay symptoms from the specific causes that need intervention. Current situation: [describe the current status]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0141. Draft a project status update for a delayed project

Act as a program manager. Draft a project status update based on the delayed project below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to separate delay symptoms from the specific causes that need intervention. Audience: [who will read this]. Project: [describe the current status]. Tone: [confident, warm, direct, diplomatic, etc.].

0142. Convert a delayed project into a project operating checklist

Act as a program manager. Convert the delayed project below into a reusable project operating checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to separate delay symptoms from the specific causes that need intervention. Project: [describe the current status]. Context: [team, tool, workflow, or use case].

0143. Learn how to handle a delayed project better

Act as a program manager. Teach me how to handle a delayed project much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to separate delay symptoms from the specific causes that need intervention. Topic or problem: [describe the current status]. Current level: [describe experience].

0144. Design an AI assisted workflow for a delayed project

Act as a program manager and AI workflow architect. Design an AI assisted system for the delayed project below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to separate delay symptoms from the specific causes that need intervention. Current process: [describe the current status]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0145. Turn a new initiative into a project plan

Act as a program manager. Turn the new initiative below into a clear project plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to shape scope, sequencing, risks, and decision points before the work spreads. Ask at most three questions only if something essential is missing. Project: [describe the initiative]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0146. Build a step by step plan for a new initiative

Act as a program manager. Break the new initiative below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to shape scope, sequencing, risks, and decision points before the work spreads. Project: [describe the initiative]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0147. Prioritize a new initiative with ruthless focus

Act as a program manager. Review the new initiative below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to shape scope, sequencing, risks, and decision points before the work spreads. Project: [describe the initiative]. Options or tasks: [paste items]. Goal: [what matters most].

0148. Diagnose problems in a new initiative

Act as a program manager. Diagnose why this new initiative is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to shape scope, sequencing, risks, and decision points before the work spreads. Current situation: [describe the initiative]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0149. Draft a project status update for a new initiative

Act as a program manager. Draft a project status update based on the new initiative below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to shape scope, sequencing, risks, and decision points before the work spreads. Audience: [who will read this]. Project: [describe the initiative]. Tone: [confident, warm, direct, diplomatic, etc.].

0150. Convert a new initiative into a project operating checklist

Act as a program manager. Convert the new initiative below into a reusable project operating checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to shape scope, sequencing, risks, and decision points before the work spreads. Project: [describe the initiative]. Context: [team, tool, workflow, or use case].

0151. Learn how to handle a new initiative better

Act as a program manager. Teach me how to handle a new initiative much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to shape scope, sequencing, risks, and decision points before the work spreads. Topic or problem: [describe the initiative]. Current level: [describe experience].

0152. Design an AI assisted workflow for a new initiative

Act as a program manager and AI workflow architect. Design an AI assisted system for the new initiative below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to shape scope, sequencing, risks, and decision points before the work spreads. Current process: [describe the initiative]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0153. Turn a messy backlog into a project plan

Act as a program manager. Turn the messy backlog below into a clear project plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to distinguish urgent cleanup from strategically important work. Ask at most three questions only if something essential is missing. Project: [paste the backlog or themes]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0154. Build a step by step plan for a messy backlog

Act as a program manager. Break the messy backlog below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to distinguish urgent cleanup from strategically important work. Project: [paste the backlog or themes]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0155. Prioritize a messy backlog with ruthless focus

Act as a program manager. Review the messy backlog below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to distinguish urgent cleanup from strategically important work. Project: [paste the backlog or themes]. Options or tasks: [paste items]. Goal: [what matters most].

0156. Diagnose problems in a messy backlog

Act as a program manager. Diagnose why this messy backlog is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to distinguish urgent cleanup from strategically important work. Current situation: [paste the backlog or themes]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0157. Draft a project status update for a messy backlog

Act as a program manager. Draft a project status update based on the messy backlog below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to distinguish urgent cleanup from strategically important work. Audience: [who will read this]. Project: [paste the backlog or themes]. Tone: [confident, warm, direct, diplomatic, etc.].

0158. Convert a messy backlog into a project operating checklist

Act as a program manager. Convert the messy backlog below into a reusable project operating checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to distinguish urgent cleanup from strategically important work. Project: [paste the backlog or themes]. Context: [team, tool, workflow, or use case].

0159. Learn how to handle a messy backlog better

Act as a program manager. Teach me how to handle a messy backlog much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to distinguish urgent cleanup from strategically important work. Topic or problem: [paste the backlog or themes]. Current level: [describe experience].

0160. Design an AI assisted workflow for a messy backlog

Act as a program manager and AI workflow architect. Design an AI assisted system for the messy backlog below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to distinguish urgent cleanup from strategically important work. Current process: [paste the backlog or themes]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Meeting Prep and Facilitation

Prompts 0161-0192

These prompts make meetings more intentional, more decisive, and less likely to become vague conversations without outcomes.

0161. Turn a high stakes decision meeting into a meeting brief

Act as a executive facilitator. Turn the high stakes decision meeting below into a clear meeting brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to prepare the room for clarity, disagreement, and an actual decision. Ask at most three questions only if something essential is missing. Meeting: [describe the decision and attendees]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0162. Build a step by step plan for a high stakes decision meeting

Act as a executive facilitator. Break the high stakes decision meeting below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to prepare the room for clarity, disagreement, and an actual decision. Meeting: [describe the decision and attendees]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0163. Prioritize a high stakes decision meeting with ruthless focus

Act as a executive facilitator. Review the high stakes decision meeting below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to prepare the room for clarity, disagreement, and an actual decision. Meeting: [describe the decision and attendees]. Options or tasks: [paste items]. Goal: [what matters most].

0164. Diagnose problems in a high stakes decision meeting

Act as a executive facilitator. Diagnose why this high stakes decision meeting is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to prepare the room for clarity, disagreement, and an actual decision. Current situation: [describe the decision and attendees]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0165. Draft a meeting invite note for a high stakes decision meeting

Act as a executive facilitator. Draft a meeting invite note based on the high stakes decision meeting below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to prepare the room for clarity, disagreement, and an actual decision. Audience: [who will read this]. Meeting: [describe the decision and attendees]. Tone: [confident, warm, direct, diplomatic, etc.].

0166. Convert a high stakes decision meeting into a meeting preparation checklist

Act as a executive facilitator. Convert the high stakes decision meeting below into a reusable meeting preparation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to prepare the room for clarity, disagreement, and an actual decision. Meeting: [describe the decision and attendees]. Context: [team, tool, workflow, or use case].

0167. Learn how to handle a high stakes decision meeting better

Act as a executive facilitator. Teach me how to handle a high stakes decision meeting much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to prepare the room for clarity, disagreement, and an actual decision. Topic or problem: [describe the decision and attendees]. Current level: [describe experience].

0168. Design an AI assisted workflow for a high stakes decision meeting

Act as a executive facilitator and AI workflow architect. Design an AI assisted system for the high stakes decision meeting below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to prepare the room for clarity, disagreement, and an actual decision. Current process: [describe the decision and attendees]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0169. Turn a weekly team meeting into a meeting brief

Act as a executive facilitator. Turn the weekly team meeting below into a clear meeting brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to keep the agenda lean and biased toward blockers, priorities, and commitments. Ask at most three questions only if something essential is missing. Meeting: [describe the meeting purpose]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0170. Build a step by step plan for a weekly team meeting

Act as a executive facilitator. Break the weekly team meeting below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to keep the agenda lean and biased toward blockers, priorities, and commitments. Meeting: [describe the meeting purpose]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0171. Prioritize a weekly team meeting with ruthless focus

Act as a executive facilitator. Review the weekly team meeting below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to keep the agenda lean and biased toward blockers, priorities, and commitments. Meeting: [describe the meeting purpose]. Options or tasks: [paste items]. Goal: [what matters most].

0172. Diagnose problems in a weekly team meeting

Act as a executive facilitator. Diagnose why this weekly team meeting is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to keep the agenda lean and biased toward blockers, priorities, and commitments. Current situation: [describe the meeting purpose]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0173. Draft a meeting invite note for a weekly team meeting

Act as a executive facilitator. Draft a meeting invite note based on the weekly team meeting below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to keep the agenda lean and biased toward blockers, priorities, and commitments. Audience: [who will read this]. Meeting: [describe the meeting purpose]. Tone: [confident, warm, direct, diplomatic, etc.].

0174. Convert a weekly team meeting into a meeting preparation checklist

Act as a executive facilitator. Convert the weekly team meeting below into a reusable meeting preparation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to keep the agenda lean and biased toward blockers, priorities, and commitments. Meeting: [describe the meeting purpose]. Context: [team, tool, workflow, or use case].

0175. Learn how to handle a weekly team meeting better

Act as a executive facilitator. Teach me how to handle a weekly team meeting much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to keep the agenda lean and biased toward blockers, priorities, and commitments. Topic or problem: [describe the meeting purpose]. Current level: [describe experience].

0176. Design an AI assisted workflow for a weekly team meeting

Act as a executive facilitator and AI workflow architect. Design an AI assisted system for the weekly team meeting below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to keep the agenda lean and biased toward blockers, priorities, and commitments. Current process: [describe the meeting purpose]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0177. Turn a client discovery call into a meeting brief

Act as a executive facilitator. Turn the client discovery call below into a clear meeting brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to ask smarter questions, uncover context, and avoid leading the conversation too early. Ask at most three questions only if something essential is missing. Meeting: [describe the client and objective]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0178. Build a step by step plan for a client discovery call

Act as a executive facilitator. Break the client discovery call below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to ask smarter questions, uncover context, and avoid leading the conversation too early. Meeting: [describe the client and objective]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0179. Prioritize a client discovery call with ruthless focus

Act as a executive facilitator. Review the client discovery call below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to ask smarter questions, uncover context, and avoid leading the conversation too early. Meeting: [describe the client and objective]. Options or tasks: [paste items]. Goal: [what matters most].

0180. Diagnose problems in a client discovery call

Act as a executive facilitator. Diagnose why this client discovery call is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to ask smarter questions, uncover context, and avoid leading the conversation too early. Current situation: [describe the client and objective]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0181. Draft a meeting invite note for a client discovery call

Act as a executive facilitator. Draft a meeting invite note based on the client discovery call below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to ask smarter questions, uncover context, and avoid leading the conversation too early. Audience: [who will read this]. Meeting: [describe the client and objective]. Tone: [confident, warm, direct, diplomatic, etc.].

0182. Convert a client discovery call into a meeting preparation checklist

Act as a executive facilitator. Convert the client discovery call below into a reusable meeting preparation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to ask smarter questions, uncover context, and avoid leading the conversation too early. Meeting: [describe the client and objective]. Context: [team, tool, workflow, or use case].

0183. Learn how to handle a client discovery call better

Act as a executive facilitator. Teach me how to handle a client discovery call much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to ask smarter questions, uncover context, and avoid leading the conversation too early. Topic or problem: [describe the client and objective]. Current level: [describe experience].

0184. Design an AI assisted workflow for a client discovery call

Act as a executive facilitator and AI workflow architect. Design an AI assisted system for the client discovery call below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to ask smarter questions, uncover context, and avoid leading the conversation too early. Current process: [describe the client and objective]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0185. Turn an one on one conversation into a meeting brief

Act as a executive facilitator. Turn the one on one conversation below into a clear meeting brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to balance trust, candor, and practical next steps. Ask at most three questions only if something essential is missing. Meeting: [describe the relationship and goal]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0186. Build a step by step plan for an one on one conversation

Act as a executive facilitator. Break the one on one conversation below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to balance trust, candor, and practical next steps. Meeting: [describe the relationship and goal]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0187. Prioritize an one on one conversation with ruthless focus

Act as a executive facilitator. Review the one on one conversation below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to balance trust, candor, and practical next steps. Meeting: [describe the relationship and goal]. Options or tasks: [paste items]. Goal: [what matters most].

0188. Diagnose problems in an one on one conversation

Act as a executive facilitator. Diagnose why this one on one conversation is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to balance trust, candor, and practical next steps. Current situation: [describe the relationship and goal]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0189. Draft a meeting invite note for an one on one conversation

Act as a executive facilitator. Draft a meeting invite note based on the one on one conversation below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to balance trust, candor, and practical next steps. Audience: [who will read this]. Meeting: [describe the relationship and goal]. Tone: [confident, warm, direct, diplomatic, etc.].

0190. Convert an one on one conversation into a meeting preparation checklist

Act as a executive facilitator. Convert the one on one conversation below into a reusable meeting preparation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to balance trust, candor, and practical next steps. Meeting: [describe the relationship and goal]. Context: [team, tool, workflow, or use case].

0191. Learn how to handle an one on one conversation better

Act as a executive facilitator. Teach me how to handle an one on one conversation much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to balance trust, candor, and practical next steps. Topic or problem: [describe the relationship and goal]. Current level: [describe experience].

0192. Design an AI assisted workflow for an one on one conversation

Act as a executive facilitator and AI workflow architect. Design an AI assisted system for the one on one conversation below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to balance trust, candor, and practical next steps. Current process: [describe the relationship and goal]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Meeting Notes and Follow Ups

Prompts 0193-0224

Turn rough notes into clear decisions, owners, and next steps that people can act on without rereading the whole conversation.

0193. Turn a raw meeting notes into a decision summary

Act as a chief of staff. Turn the raw meeting notes below into a clear decision summary. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to separate decisions, action items, risks, and unresolved questions cleanly. Ask at most three questions only if something essential is missing. Notes: [paste the notes]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0194. Build a step by step plan for a raw meeting notes

Act as a chief of staff. Break the raw meeting notes below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to separate decisions, action items, risks, and unresolved questions cleanly. Notes: [paste the notes]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0195. Prioritize a raw meeting notes with ruthless focus

Act as a chief of staff. Review the raw meeting notes below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to separate decisions, action items, risks, and unresolved questions cleanly. Notes: [paste the notes]. Options or tasks: [paste items]. Goal: [what matters most].

0196. Diagnose problems in a raw meeting notes

Act as a chief of staff. Diagnose why this raw meeting notes is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to separate decisions, action items, risks, and unresolved questions cleanly. Current situation: [paste the notes]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0197. Draft a follow up email for a raw meeting notes

Act as a chief of staff. Draft a follow up email based on the raw meeting notes below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to separate decisions, action items, risks, and unresolved questions cleanly. Audience: [who will read this]. Notes: [paste the notes]. Tone: [confident, warm, direct, diplomatic, etc.].

0198. Convert a raw meeting notes into a meeting notes template

Act as a chief of staff. Convert the raw meeting notes below into a reusable meeting notes template. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to separate decisions, action items, risks, and unresolved questions cleanly. Notes: [paste the notes]. Context: [team, tool, workflow, or use case].

0199. Learn how to handle a raw meeting notes better

Act as a chief of staff. Teach me how to handle a raw meeting notes much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to separate decisions, action items, risks, and unresolved questions cleanly. Topic or problem: [paste the notes]. Current level: [describe experience].

0200. Design an AI assisted workflow for a raw meeting notes

Act as a chief of staff and AI workflow architect. Design an AI assisted system for the raw meeting notes below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to separate decisions, action items, risks, and unresolved questions cleanly. Current process: [paste the notes]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0201. Turn a brainstorming session notes into a decision summary

Act as a chief of staff. Turn the brainstorming session notes below into a clear decision summary. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to capture useful ideas without losing the themes, constraints, and next experiments. Ask at most three questions only if something essential is missing. Notes: [paste the notes]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0202. Build a step by step plan for a brainstorming session notes

Act as a chief of staff. Break the brainstorming session notes below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to capture useful ideas without losing the themes, constraints, and next experiments. Notes: [paste the notes]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0203. Prioritize a brainstorming session notes with ruthless focus

Act as a chief of staff. Review the brainstorming session notes below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to capture useful ideas without losing the themes, constraints, and next experiments. Notes: [paste the notes]. Options or tasks: [paste items]. Goal: [what matters most].

0204. Diagnose problems in a brainstorming session notes

Act as a chief of staff. Diagnose why this brainstorming session notes is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to capture useful ideas without losing the themes, constraints, and next experiments. Current situation: [paste the notes]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0205. Draft a follow up email for a brainstorming session notes

Act as a chief of staff. Draft a follow up email based on the brainstorming session notes below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to capture useful ideas without losing the themes, constraints, and next experiments. Audience: [who will read this]. Notes: [paste the notes]. Tone: [confident, warm, direct, diplomatic, etc.].

0206. Convert a brainstorming session notes into a meeting notes template

Act as a chief of staff. Convert the brainstorming session notes below into a reusable meeting notes template. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to capture useful ideas without losing the themes, constraints, and next experiments. Notes: [paste the notes]. Context: [team, tool, workflow, or use case].

0207. Learn how to handle a brainstorming session notes better

Act as a chief of staff. Teach me how to handle a brainstorming session notes much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to capture useful ideas without losing the themes, constraints, and next experiments. Topic or problem: [paste the notes]. Current level: [describe experience].

0208. Design an AI assisted workflow for a brainstorming session notes

Act as a chief of staff and AI workflow architect. Design an AI assisted system for the brainstorming session notes below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to capture useful ideas without losing the themes, constraints, and next experiments. Current process: [paste the notes]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0209. Turn a decision meeting transcript into a decision summary

Act as a chief of staff. Turn the decision meeting transcript below into a clear decision summary. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to pull out what was actually decided and what still needs ownership. Ask at most three questions only if something essential is missing. Notes: [paste the transcript or summary]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0210. Build a step by step plan for a decision meeting transcript

Act as a chief of staff. Break the decision meeting transcript below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to pull out what was actually decided and what still needs ownership. Notes: [paste the transcript or summary]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0211. Prioritize a decision meeting transcript with ruthless focus

Act as a chief of staff. Review the decision meeting transcript below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to pull out what was actually decided and what still needs ownership. Notes: [paste the transcript or summary]. Options or tasks: [paste items]. Goal: [what matters most].

0212. Diagnose problems in a decision meeting transcript

Act as a chief of staff. Diagnose why this decision meeting transcript is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to pull out what was actually decided and what still needs ownership. Current situation: [paste the transcript or summary]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0213. Draft a follow up email for a decision meeting transcript

Act as a chief of staff. Draft a follow up email based on the decision meeting transcript below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to pull out what was actually decided and what still needs ownership. Audience: [who will read this]. Notes: [paste the transcript or summary]. Tone: [confident, warm, direct, diplomatic, etc.].

0214. Convert a decision meeting transcript into a meeting notes template

Act as a chief of staff. Convert the decision meeting transcript below into a reusable meeting notes template. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to pull out what was actually decided and what still needs ownership. Notes: [paste the transcript or summary]. Context: [team, tool, workflow, or use case].

0215. Learn how to handle a decision meeting transcript better

Act as a chief of staff. Teach me how to handle a decision meeting transcript much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to pull out what was actually decided and what still needs ownership. Topic or problem: [paste the transcript or summary]. Current level: [describe experience].

0216. Design an AI assisted workflow for a decision meeting transcript

Act as a chief of staff and AI workflow architect. Design an AI assisted system for the decision meeting transcript below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to pull out what was actually decided and what still needs ownership. Current process: [paste the transcript or summary]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0217. Turn an action heavy call summary into a decision summary

Act as a chief of staff. Turn the action heavy call summary below into a clear decision summary. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to make commitments specific, dated, and easy to track. Ask at most three questions only if something essential is missing. Notes: [paste the call notes]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0218. Build a step by step plan for an action heavy call summary

Act as a chief of staff. Break the action heavy call summary below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to make commitments specific, dated, and easy to track. Notes: [paste the call notes]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0219. Prioritize an action heavy call summary with ruthless focus

Act as a chief of staff. Review the action heavy call summary below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to make commitments specific, dated, and easy to track. Notes: [paste the call notes]. Options or tasks: [paste items]. Goal: [what matters most].

0220. Diagnose problems in an action heavy call summary

Act as a chief of staff. Diagnose why this action heavy call summary is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to make commitments specific, dated, and easy to track. Current situation: [paste the call notes]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0221. Draft a follow up email for an action heavy call summary

Act as a chief of staff. Draft a follow up email based on the action heavy call summary below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to make commitments specific, dated, and easy to track. Audience: [who will read this]. Notes: [paste the call notes]. Tone: [confident, warm, direct, diplomatic, etc.].

0222. Convert an action heavy call summary into a meeting notes template

Act as a chief of staff. Convert the action heavy call summary below into a reusable meeting notes template. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to make commitments specific, dated, and easy to track. Notes: [paste the call notes]. Context: [team, tool, workflow, or use case].

0223. Learn how to handle an action heavy call summary better

Act as a chief of staff. Teach me how to handle an action heavy call summary much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to make commitments specific, dated, and easy to track. Topic or problem: [paste the call notes]. Current level: [describe experience].

0224. Design an AI assisted workflow for an action heavy call summary

Act as a chief of staff and AI workflow architect. Design an AI assisted system for the action heavy call summary below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to make commitments specific, dated, and easy to track. Current process: [paste the call notes]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Email and Business Writing

Prompts 0225-0256

Use these prompts to write faster, sound sharper, and make sure important messages are clear, credible, and easy to respond to.

0225. Turn a sensitive email into a message brief

Act as a executive communications editor. Turn the sensitive email below into a clear message brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to balance diplomacy, clarity, and the need to be direct. Ask at most three questions only if something essential is missing. Writing input: [describe the situation and what you need to say]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0226. Build a step by step plan for a sensitive email

Act as a executive communications editor. Break the sensitive email below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to balance diplomacy, clarity, and the need to be direct. Writing input: [describe the situation and what you need to say]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0227. Prioritize a sensitive email with ruthless focus

Act as a executive communications editor. Review the sensitive email below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to balance diplomacy, clarity, and the need to be direct. Writing input: [describe the situation and what you need to say]. Options or tasks: [paste items]. Goal: [what matters most].

0228. Diagnose problems in a sensitive email

Act as a executive communications editor. Diagnose why this sensitive email is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to balance diplomacy, clarity, and the need to be direct. Current situation: [describe the situation and what you need to say]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0229. Draft a professional email for a sensitive email

Act as a executive communications editor. Draft a professional email based on the sensitive email below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to balance diplomacy, clarity, and the need to be direct. Audience: [who will read this]. Writing input: [describe the situation and what you need to say]. Tone: [confident, warm, direct, diplomatic, etc.].

0230. Convert a sensitive email into an email drafting checklist

Act as a executive communications editor. Convert the sensitive email below into a reusable email drafting checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to balance diplomacy, clarity, and the need to be direct. Writing input: [describe the situation and what you need to say]. Context: [team, tool, workflow, or use case].

0231. Learn how to handle a sensitive email better

Act as a executive communications editor. Teach me how to handle a sensitive email much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to balance diplomacy, clarity, and the need to be direct. Topic or problem: [describe the situation and what you need to say]. Current level: [describe experience].

0232. Design an AI assisted workflow for a sensitive email

Act as a executive communications editor and AI workflow architect. Design an AI assisted system for the sensitive email below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to balance diplomacy, clarity, and the need to be direct. Current process: [describe the situation and what you need to say]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0233. Turn a follow up email into a message brief

Act as a executive communications editor. Turn the follow up email below into a clear message brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to make the message polite but action oriented instead of vague or apologetic. Ask at most three questions only if something essential is missing. Writing input: [paste the context or earlier exchange]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0234. Build a step by step plan for a follow up email

Act as a executive communications editor. Break the follow up email below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to make the message polite but action oriented instead of vague or apologetic. Writing input: [paste the context or earlier exchange]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0235. Prioritize a follow up email with ruthless focus

Act as a executive communications editor. Review the follow up email below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to make the message polite but action oriented instead of vague or apologetic. Writing input: [paste the context or earlier exchange]. Options or tasks: [paste items]. Goal: [what matters most].

0236. Diagnose problems in a follow up email

Act as a executive communications editor. Diagnose why this follow up email is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to make the message polite but action oriented instead of vague or apologetic. Current situation: [paste the context or earlier exchange]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0237. Draft a professional email for a follow up email

Act as a executive communications editor. Draft a professional email based on the follow up email below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to make the message polite but action oriented instead of vague or apologetic. Audience: [who will read this]. Writing input: [paste the context or earlier exchange]. Tone: [confident, warm, direct, diplomatic, etc.].

0238. Convert a follow up email into an email drafting checklist

Act as a executive communications editor. Convert the follow up email below into a reusable email drafting checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to make the message polite but action oriented instead of vague or apologetic. Writing input: [paste the context or earlier exchange]. Context: [team, tool, workflow, or use case].

0239. Learn how to handle a follow up email better

Act as a executive communications editor. Teach me how to handle a follow up email much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to make the message polite but action oriented instead of vague or apologetic. Topic or problem: [paste the context or earlier exchange]. Current level: [describe experience].

0240. Design an AI assisted workflow for a follow up email

Act as a executive communications editor and AI workflow architect. Design an AI assisted system for the follow up email below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to make the message polite but action oriented instead of vague or apologetic. Current process: [paste the context or earlier exchange]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0241. Turn an update email into a message brief

Act as a executive communications editor. Turn the update email below into a clear message brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to highlight what changed, what matters, and what the reader should do next. Ask at most three questions only if something essential is missing. Writing input: [describe the update]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0242. Build a step by step plan for an update email

Act as a executive communications editor. Break the update email below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to highlight what changed, what matters, and what the reader should do next. Writing input: [describe the update]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0243. Prioritize an update email with ruthless focus

Act as a executive communications editor. Review the update email below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to highlight what changed, what matters, and what the reader should do next. Writing input: [describe the update]. Options or tasks: [paste items]. Goal: [what matters most].

0244. Diagnose problems in an update email

Act as a executive communications editor. Diagnose why this update email is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to highlight what changed, what matters, and what the reader should do next. Current situation: [describe the update]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0245. Draft a professional email for an update email

Act as a executive communications editor. Draft a professional email based on the update email below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to highlight what changed, what matters, and what the reader should do next. Audience: [who will read this]. Writing input: [describe the update]. Tone: [confident, warm, direct, diplomatic, etc.].

0246. Convert an update email into an email drafting checklist

Act as a executive communications editor. Convert the update email below into a reusable email drafting checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to highlight what changed, what matters, and what the reader should do next. Writing input: [describe the update]. Context: [team, tool, workflow, or use case].

0247. Learn how to handle an update email better

Act as a executive communications editor. Teach me how to handle an update email much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to highlight what changed, what matters, and what the reader should do next. Topic or problem: [describe the update]. Current level: [describe experience].

0248. Design an AI assisted workflow for an update email

Act as a executive communications editor and AI workflow architect. Design an AI assisted system for the update email below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to highlight what changed, what matters, and what the reader should do next. Current process: [describe the update]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0249. Turn a request for help into a message brief

Act as a executive communications editor. Turn the request for help below into a clear message brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to make the ask precise, respectful, and easy to answer. Ask at most three questions only if something essential is missing. Writing input: [describe what you need]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0250. Build a step by step plan for a request for help

Act as a executive communications editor. Break the request for help below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to make the ask precise, respectful, and easy to answer. Writing input: [describe what you need]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0251. Prioritize a request for help with ruthless focus

Act as a executive communications editor. Review the request for help below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to make the ask precise, respectful, and easy to answer. Writing input: [describe what you need]. Options or tasks: [paste items]. Goal: [what matters most].

0252. Diagnose problems in a request for help

Act as a executive communications editor. Diagnose why this request for help is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to make the ask precise, respectful, and easy to answer. Current situation: [describe what you need]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0253. Draft a professional email for a request for help

Act as a executive communications editor. Draft a professional email based on the request for help below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to make the ask precise, respectful, and easy to answer. Audience: [who will read this]. Writing input: [describe what you need]. Tone: [confident, warm, direct, diplomatic, etc.].

0254. Convert a request for help into an email drafting checklist

Act as a executive communications editor. Convert the request for help below into a reusable email drafting checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to make the ask precise, respectful, and easy to answer. Writing input: [describe what you need]. Context: [team, tool, workflow, or use case].

0255. Learn how to handle a request for help better

Act as a executive communications editor. Teach me how to handle a request for help much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to make the ask precise, respectful, and easy to answer. Topic or problem: [describe what you need]. Current level: [describe experience].

0256. Design an AI assisted workflow for a request for help

Act as a executive communications editor and AI workflow architect. Design an AI assisted system for the request for help below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to make the ask precise, respectful, and easy to answer. Current process: [describe what you need]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Long Form Writing and Editing

Prompts 0257-0288

These prompts help you shape messy drafts into polished writing with stronger structure, tighter language, and clearer thinking.

0257. Turn a rough draft article into a structured draft

Act as a senior editor. Turn the rough draft article below into a clear structured draft. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to strengthen structure, argument flow, and readability without flattening the voice. Ask at most three questions only if something essential is missing. Draft: [paste the draft]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0258. Build a step by step plan for a rough draft article

Act as a senior editor. Break the rough draft article below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to strengthen structure, argument flow, and readability without flattening the voice. Draft: [paste the draft]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0259. Prioritize a rough draft article with ruthless focus

Act as a senior editor. Review the rough draft article below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to strengthen structure, argument flow, and readability without flattening the voice. Draft: [paste the draft]. Options or tasks: [paste items]. Goal: [what matters most].

0260. Diagnose problems in a rough draft article

Act as a senior editor. Diagnose why this rough draft article is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to strengthen structure, argument flow, and readability without flattening the voice. Current situation: [paste the draft]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0261. Draft an editorial note for a rough draft article

Act as a senior editor. Draft an editorial note based on the rough draft article below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to strengthen structure, argument flow, and readability without flattening the voice. Audience: [who will read this]. Draft: [paste the draft]. Tone: [confident, warm, direct, diplomatic, etc.].

0262. Convert a rough draft article into a revision checklist

Act as a senior editor. Convert the rough draft article below into a reusable revision checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to strengthen structure, argument flow, and readability without flattening the voice. Draft: [paste the draft]. Context: [team, tool, workflow, or use case].

0263. Learn how to handle a rough draft article better

Act as a senior editor. Teach me how to handle a rough draft article much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to strengthen structure, argument flow, and readability without flattening the voice. Topic or problem: [paste the draft]. Current level: [describe experience].

0264. Design an AI assisted workflow for a rough draft article

Act as a senior editor and AI workflow architect. Design an AI assisted system for the rough draft article below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to strengthen structure, argument flow, and readability without flattening the voice. Current process: [paste the draft]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0265. Turn a proposal draft into a structured draft

Act as a senior editor. Turn the proposal draft below into a clear structured draft. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to clarify value, reduce fluff, and make the recommendation easier to say yes to. Ask at most three questions only if something essential is missing. Draft: [paste the draft]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0266. Build a step by step plan for a proposal draft

Act as a senior editor. Break the proposal draft below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to clarify value, reduce fluff, and make the recommendation easier to say yes to. Draft: [paste the draft]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0267. Prioritize a proposal draft with ruthless focus

Act as a senior editor. Review the proposal draft below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to clarify value, reduce fluff, and make the recommendation easier to say yes to. Draft: [paste the draft]. Options or tasks: [paste items]. Goal: [what matters most].

0268. Diagnose problems in a proposal draft

Act as a senior editor. Diagnose why this proposal draft is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to clarify value, reduce fluff, and make the recommendation easier to say yes to. Current situation: [paste the draft]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0269. Draft an editorial note for a proposal draft

Act as a senior editor. Draft an editorial note based on the proposal draft below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to clarify value, reduce fluff, and make the recommendation easier to say yes to. Audience: [who will read this]. Draft: [paste the draft]. Tone: [confident, warm, direct, diplomatic, etc.].

0270. Convert a proposal draft into a revision checklist

Act as a senior editor. Convert the proposal draft below into a reusable revision checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to clarify value, reduce fluff, and make the recommendation easier to say yes to. Draft: [paste the draft]. Context: [team, tool, workflow, or use case].

0271. Learn how to handle a proposal draft better

Act as a senior editor. Teach me how to handle a proposal draft much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to clarify value, reduce fluff, and make the recommendation easier to say yes to. Topic or problem: [paste the draft]. Current level: [describe experience].

0272. Design an AI assisted workflow for a proposal draft

Act as a senior editor and AI workflow architect. Design an AI assisted system for the proposal draft below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to clarify value, reduce fluff, and make the recommendation easier to say yes to. Current process: [paste the draft]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0273. Turn a SOP document into a structured draft

Act as a senior editor. Turn the SOP document below into a clear structured draft. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to improve sequencing, consistency, and usability for people who will actually follow it. Ask at most three questions only if something essential is missing. Draft: [paste the draft]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0274. Build a step by step plan for a SOP document

Act as a senior editor. Break the SOP document below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to improve sequencing, consistency, and usability for people who will actually follow it. Draft: [paste the draft]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0275. Prioritize a SOP document with ruthless focus

Act as a senior editor. Review the SOP document below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to improve sequencing, consistency, and usability for people who will actually follow it. Draft: [paste the draft]. Options or tasks: [paste items]. Goal: [what matters most].

0276. Diagnose problems in a SOP document

Act as a senior editor. Diagnose why this SOP document is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to improve sequencing, consistency, and usability for people who will actually follow it. Current situation: [paste the draft]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0277. Draft an editorial note for a SOP document

Act as a senior editor. Draft an editorial note based on the SOP document below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to improve sequencing, consistency, and usability for people who will actually follow it. Audience: [who will read this]. Draft: [paste the draft]. Tone: [confident, warm, direct, diplomatic, etc.].

0278. Convert a SOP document into a revision checklist

Act as a senior editor. Convert the SOP document below into a reusable revision checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to improve sequencing, consistency, and usability for people who will actually follow it. Draft: [paste the draft]. Context: [team, tool, workflow, or use case].

0279. Learn how to handle a SOP document better

Act as a senior editor. Teach me how to handle a SOP document much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to improve sequencing, consistency, and usability for people who will actually follow it. Topic or problem: [paste the draft]. Current level: [describe experience].

0280. Design an AI assisted workflow for a SOP document

Act as a senior editor and AI workflow architect. Design an AI assisted system for the SOP document below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to improve sequencing, consistency, and usability for people who will actually follow it. Current process: [paste the draft]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0281. Turn a report summary into a structured draft

Act as a senior editor. Turn the report summary below into a clear structured draft. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to make the key insights obvious and remove repetitive or low value wording. Ask at most three questions only if something essential is missing. Draft: [paste the summary or report notes]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0282. Build a step by step plan for a report summary

Act as a senior editor. Break the report summary below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to make the key insights obvious and remove repetitive or low value wording. Draft: [paste the summary or report notes]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0283. Prioritize a report summary with ruthless focus

Act as a senior editor. Review the report summary below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to make the key insights obvious and remove repetitive or low value wording. Draft: [paste the summary or report notes]. Options or tasks: [paste items]. Goal: [what matters most].

0284. Diagnose problems in a report summary

Act as a senior editor. Diagnose why this report summary is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to make the key insights obvious and remove repetitive or low value wording. Current situation: [paste the summary or report notes]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0285. Draft an editorial note for a report summary

Act as a senior editor. Draft an editorial note based on the report summary below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to make the key insights obvious and remove repetitive or low value wording. Audience: [who will read this]. Draft: [paste the summary or report notes]. Tone: [confident, warm, direct, diplomatic, etc.].

0286. Convert a report summary into a revision checklist

Act as a senior editor. Convert the report summary below into a reusable revision checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to make the key insights obvious and remove repetitive or low value wording. Draft: [paste the summary or report notes]. Context: [team, tool, workflow, or use case].

0287. Learn how to handle a report summary better

Act as a senior editor. Teach me how to handle a report summary much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to make the key insights obvious and remove repetitive or low value wording. Topic or problem: [paste the summary or report notes]. Current level: [describe experience].

0288. Design an AI assisted workflow for a report summary

Act as a senior editor and AI workflow architect. Design an AI assisted system for the report summary below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to make the key insights obvious and remove repetitive or low value wording. Current process: [paste the summary or report notes]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Research and Synthesis

Prompts 0289-0320

Use this section to search deeply, organize evidence, compare sources, and turn information overload into usable insight.

0289. Turn a topic with many sources into a research brief

Act as a research analyst. Turn the topic with many sources below into a clear research brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to group the material into themes and separate signal from noise. Ask at most three questions only if something essential is missing. Research topic: [describe the topic and paste any sources]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0290. Build a step by step plan for a topic with many sources

Act as a research analyst. Break the topic with many sources below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to group the material into themes and separate signal from noise. Research topic: [describe the topic and paste any sources]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0291. Prioritize a topic with many sources with ruthless focus

Act as a research analyst. Review the topic with many sources below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to group the material into themes and separate signal from noise. Research topic: [describe the topic and paste any sources]. Options or tasks: [paste items]. Goal: [what matters most].

0292. Diagnose problems in a topic with many sources

Act as a research analyst. Diagnose why this topic with many sources is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to group the material into themes and separate signal from noise. Current situation: [describe the topic and paste any sources]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0293. Draft a research summary note for a topic with many sources

Act as a research analyst. Draft a research summary note based on the topic with many sources below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to group the material into themes and separate signal from noise. Audience: [who will read this]. Research topic: [describe the topic and paste any sources]. Tone: [confident, warm, direct, diplomatic, etc.].

0294. Convert a topic with many sources into a research synthesis framework

Act as a research analyst. Convert the topic with many sources below into a reusable research synthesis framework. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to group the material into themes and separate signal from noise. Research topic: [describe the topic and paste any sources]. Context: [team, tool, workflow, or use case].

0295. Learn how to handle a topic with many sources better

Act as a research analyst. Teach me how to handle a topic with many sources much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to group the material into themes and separate signal from noise. Topic or problem: [describe the topic and paste any sources]. Current level: [describe experience].

0296. Design an AI assisted workflow for a topic with many sources

Act as a research analyst and AI workflow architect. Design an AI assisted system for the topic with many sources below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to group the material into themes and separate signal from noise. Current process: [describe the topic and paste any sources]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0297. Turn a market landscape into a research brief

Act as a research analyst. Turn the market landscape below into a clear research brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to compare players, trends, risks, and white space in a practical way. Ask at most three questions only if something essential is missing. Research topic: [describe the market or segment]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0298. Build a step by step plan for a market landscape

Act as a research analyst. Break the market landscape below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to compare players, trends, risks, and white space in a practical way. Research topic: [describe the market or segment]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0299. Prioritize a market landscape with ruthless focus

Act as a research analyst. Review the market landscape below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to compare players, trends, risks, and white space in a practical way. Research topic: [describe the market or segment]. Options or tasks: [paste items]. Goal: [what matters most].

0300. Diagnose problems in a market landscape

Act as a research analyst. Diagnose why this market landscape is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to compare players, trends, risks, and white space in a practical way. Current situation: [describe the market or segment]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0301. Draft a research summary note for a market landscape

Act as a research analyst. Draft a research summary note based on the market landscape below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to compare players, trends, risks, and white space in a practical way. Audience: [who will read this]. Research topic: [describe the market or segment]. Tone: [confident, warm, direct, diplomatic, etc.].

0302. Convert a market landscape into a research synthesis framework

Act as a research analyst. Convert the market landscape below into a reusable research synthesis framework. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to compare players, trends, risks, and white space in a practical way. Research topic: [describe the market or segment]. Context: [team, tool, workflow, or use case].

0303. Learn how to handle a market landscape better

Act as a research analyst. Teach me how to handle a market landscape much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to compare players, trends, risks, and white space in a practical way. Topic or problem: [describe the market or segment]. Current level: [describe experience].

0304. Design an AI assisted workflow for a market landscape

Act as a research analyst and AI workflow architect. Design an AI assisted system for the market landscape below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to compare players, trends, risks, and white space in a practical way. Current process: [describe the market or segment]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0305. Turn a dense document pack into a research brief

Act as a research analyst. Turn the dense document pack below into a clear research brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to extract the important ideas without missing contradictions or caveats. Ask at most three questions only if something essential is missing. Research topic: [describe the document set]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0306. Build a step by step plan for a dense document pack

Act as a research analyst. Break the dense document pack below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to extract the important ideas without missing contradictions or caveats. Research topic: [describe the document set]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0307. Prioritize a dense document pack with ruthless focus

Act as a research analyst. Review the dense document pack below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to extract the important ideas without missing contradictions or caveats. Research topic: [describe the document set]. Options or tasks: [paste items]. Goal: [what matters most].

0308. Diagnose problems in a dense document pack

Act as a research analyst. Diagnose why this dense document pack is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to extract the important ideas without missing contradictions or caveats. Current situation: [describe the document set]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0309. Draft a research summary note for a dense document pack

Act as a research analyst. Draft a research summary note based on the dense document pack below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to extract the important ideas without missing contradictions or caveats. Audience: [who will read this]. Research topic: [describe the document set]. Tone: [confident, warm, direct, diplomatic, etc.].

0310. Convert a dense document pack into a research synthesis framework

Act as a research analyst. Convert the dense document pack below into a reusable research synthesis framework. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to extract the important ideas without missing contradictions or caveats. Research topic: [describe the document set]. Context: [team, tool, workflow, or use case].

0311. Learn how to handle a dense document pack better

Act as a research analyst. Teach me how to handle a dense document pack much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to extract the important ideas without missing contradictions or caveats. Topic or problem: [describe the document set]. Current level: [describe experience].

0312. Design an AI assisted workflow for a dense document pack

Act as a research analyst and AI workflow architect. Design an AI assisted system for the dense document pack below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to extract the important ideas without missing contradictions or caveats. Current process: [describe the document set]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0313. Turn an open question into a research brief

Act as a research analyst. Turn the open question below into a clear research brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to surface what is known, unknown, disputed, and worth investigating next. Ask at most three questions only if something essential is missing. Research topic: [state the question]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0314. Build a step by step plan for an open question

Act as a research analyst. Break the open question below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to surface what is known, unknown, disputed, and worth investigating next. Research topic: [state the question]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0315. Prioritize an open question with ruthless focus

Act as a research analyst. Review the open question below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to surface what is known, unknown, disputed, and worth investigating next. Research topic: [state the question]. Options or tasks: [paste items]. Goal: [what matters most].

0316. Diagnose problems in an open question

Act as a research analyst. Diagnose why this open question is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to surface what is known, unknown, disputed, and worth investigating next. Current situation: [state the question]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0317. Draft a research summary note for an open question

Act as a research analyst. Draft a research summary note based on the open question below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to surface what is known, unknown, disputed, and worth investigating next. Audience: [who will read this]. Research topic: [state the question]. Tone: [confident, warm, direct, diplomatic, etc.].

0318. Convert an open question into a research synthesis framework

Act as a research analyst. Convert the open question below into a reusable research synthesis framework. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to surface what is known, unknown, disputed, and worth investigating next. Research topic: [state the question]. Context: [team, tool, workflow, or use case].

0319. Learn how to handle an open question better

Act as a research analyst. Teach me how to handle an open question much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to surface what is known, unknown, disputed, and worth investigating next. Topic or problem: [state the question]. Current level: [describe experience].

0320. Design an AI assisted workflow for an open question

Act as a research analyst and AI workflow architect. Design an AI assisted system for the open question below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to surface what is known, unknown, disputed, and worth investigating next. Current process: [state the question]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Learning and Skill Building

Prompts 0321-0352

These prompts help you learn faster by focusing on the few ideas, exercises, and feedback loops that create outsized progress.

0321. Turn a new skill you need fast into a learning plan

Act as a learning strategist. Turn the new skill you need fast below into a clear learning plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to focus on the minimum useful competence and the fastest proof of progress. Ask at most three questions only if something essential is missing. Skill or topic: [name the skill and why you need it]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0322. Build a step by step plan for a new skill you need fast

Act as a learning strategist. Break the new skill you need fast below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to focus on the minimum useful competence and the fastest proof of progress. Skill or topic: [name the skill and why you need it]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0323. Prioritize a new skill you need fast with ruthless focus

Act as a learning strategist. Review the new skill you need fast below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to focus on the minimum useful competence and the fastest proof of progress. Skill or topic: [name the skill and why you need it]. Options or tasks: [paste items]. Goal: [what matters most].

0324. Diagnose problems in a new skill you need fast

Act as a learning strategist. Diagnose why this new skill you need fast is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to focus on the minimum useful competence and the fastest proof of progress. Current situation: [name the skill and why you need it]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0325. Draft a study update for a new skill you need fast

Act as a learning strategist. Draft a study update based on the new skill you need fast below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to focus on the minimum useful competence and the fastest proof of progress. Audience: [who will read this]. Skill or topic: [name the skill and why you need it]. Tone: [confident, warm, direct, diplomatic, etc.].

0326. Convert a new skill you need fast into a practice routine

Act as a learning strategist. Convert the new skill you need fast below into a reusable practice routine. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to focus on the minimum useful competence and the fastest proof of progress. Skill or topic: [name the skill and why you need it]. Context: [team, tool, workflow, or use case].

0327. Learn how to handle a new skill you need fast better

Act as a learning strategist. Teach me how to handle a new skill you need fast much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to focus on the minimum useful competence and the fastest proof of progress. Topic or problem: [name the skill and why you need it]. Current level: [describe experience].

0328. Design an AI assisted workflow for a new skill you need fast

Act as a learning strategist and AI workflow architect. Design an AI assisted system for the new skill you need fast below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to focus on the minimum useful competence and the fastest proof of progress. Current process: [name the skill and why you need it]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0329. Turn an exam or certification topic into a learning plan

Act as a learning strategist. Turn the exam or certification topic below into a clear learning plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to balance concepts, recall, and practice under real constraints. Ask at most three questions only if something essential is missing. Skill or topic: [describe the topic and timeline]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0330. Build a step by step plan for an exam or certification topic

Act as a learning strategist. Break the exam or certification topic below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to balance concepts, recall, and practice under real constraints. Skill or topic: [describe the topic and timeline]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0331. Prioritize an exam or certification topic with ruthless focus

Act as a learning strategist. Review the exam or certification topic below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to balance concepts, recall, and practice under real constraints. Skill or topic: [describe the topic and timeline]. Options or tasks: [paste items]. Goal: [what matters most].

0332. Diagnose problems in an exam or certification topic

Act as a learning strategist. Diagnose why this exam or certification topic is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to balance concepts, recall, and practice under real constraints. Current situation: [describe the topic and timeline]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0333. Draft a study update for an exam or certification topic

Act as a learning strategist. Draft a study update based on the exam or certification topic below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to balance concepts, recall, and practice under real constraints. Audience: [who will read this]. Skill or topic: [describe the topic and timeline]. Tone: [confident, warm, direct, diplomatic, etc.].

0334. Convert an exam or certification topic into a practice routine

Act as a learning strategist. Convert the exam or certification topic below into a reusable practice routine. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to balance concepts, recall, and practice under real constraints. Skill or topic: [describe the topic and timeline]. Context: [team, tool, workflow, or use case].

0335. Learn how to handle an exam or certification topic better

Act as a learning strategist. Teach me how to handle an exam or certification topic much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to balance concepts, recall, and practice under real constraints. Topic or problem: [describe the topic and timeline]. Current level: [describe experience].

0336. Design an AI assisted workflow for an exam or certification topic

Act as a learning strategist and AI workflow architect. Design an AI assisted system for the exam or certification topic below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to balance concepts, recall, and practice under real constraints. Current process: [describe the topic and timeline]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0337. Turn a tool or software into a learning plan

Act as a learning strategist. Turn the tool or software below into a clear learning plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to learn the workflows that matter most instead of wandering through features. Ask at most three questions only if something essential is missing. Skill or topic: [name the tool]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0338. Build a step by step plan for a tool or software

Act as a learning strategist. Break the tool or software below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to learn the workflows that matter most instead of wandering through features. Skill or topic: [name the tool]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0339. Prioritize a tool or software with ruthless focus

Act as a learning strategist. Review the tool or software below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to learn the workflows that matter most instead of wandering through features. Skill or topic: [name the tool]. Options or tasks: [paste items]. Goal: [what matters most].

0340. Diagnose problems in a tool or software

Act as a learning strategist. Diagnose why this tool or software is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to learn the workflows that matter most instead of wandering through features. Current situation: [name the tool]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0341. Draft a study update for a tool or software

Act as a learning strategist. Draft a study update based on the tool or software below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to learn the workflows that matter most instead of wandering through features. Audience: [who will read this]. Skill or topic: [name the tool]. Tone: [confident, warm, direct, diplomatic, etc.].

0342. Convert a tool or software into a practice routine

Act as a learning strategist. Convert the tool or software below into a reusable practice routine. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to learn the workflows that matter most instead of wandering through features. Skill or topic: [name the tool]. Context: [team, tool, workflow, or use case].

0343. Learn how to handle a tool or software better

Act as a learning strategist. Teach me how to handle a tool or software much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to learn the workflows that matter most instead of wandering through features. Topic or problem: [name the tool]. Current level: [describe experience].

0344. Design an AI assisted workflow for a tool or software

Act as a learning strategist and AI workflow architect. Design an AI assisted system for the tool or software below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to learn the workflows that matter most instead of wandering through features. Current process: [name the tool]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0345. Turn a difficult concept into a learning plan

Act as a learning strategist. Turn the difficult concept below into a clear learning plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to use analogies, examples, and exercises that make the idea stick. Ask at most three questions only if something essential is missing. Skill or topic: [describe the concept]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0346. Build a step by step plan for a difficult concept

Act as a learning strategist. Break the difficult concept below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to use analogies, examples, and exercises that make the idea stick. Skill or topic: [describe the concept]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0347. Prioritize a difficult concept with ruthless focus

Act as a learning strategist. Review the difficult concept below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to use analogies, examples, and exercises that make the idea stick. Skill or topic: [describe the concept]. Options or tasks: [paste items]. Goal: [what matters most].

0348. Diagnose problems in a difficult concept

Act as a learning strategist. Diagnose why this difficult concept is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to use analogies, examples, and exercises that make the idea stick. Current situation: [describe the concept]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0349. Draft a study update for a difficult concept

Act as a learning strategist. Draft a study update based on the difficult concept below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to use analogies, examples, and exercises that make the idea stick. Audience: [who will read this]. Skill or topic: [describe the concept]. Tone: [confident, warm, direct, diplomatic, etc.].

0350. Convert a difficult concept into a practice routine

Act as a learning strategist. Convert the difficult concept below into a reusable practice routine. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to use analogies, examples, and exercises that make the idea stick. Skill or topic: [describe the concept]. Context: [team, tool, workflow, or use case].

0351. Learn how to handle a difficult concept better

Act as a learning strategist. Teach me how to handle a difficult concept much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to use analogies, examples, and exercises that make the idea stick. Topic or problem: [describe the concept]. Current level: [describe experience].

0352. Design an AI assisted workflow for a difficult concept

Act as a learning strategist and AI workflow architect. Design an AI assisted system for the difficult concept below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to use analogies, examples, and exercises that make the idea stick. Current process: [describe the concept]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Decision Making and Risk

Prompts 0353-0384

Use these prompts to evaluate options with more rigor, handle uncertainty honestly, and choose with less second guessing.

0353. Turn an important decision with uncertainty into a decision memo

Act as a decision strategist. Turn the important decision with uncertainty below into a clear decision memo. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to make uncertainty visible instead of pretending confidence where none exists. Ask at most three questions only if something essential is missing. Decision: [describe the decision]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0354. Build a step by step plan for an important decision with uncertainty

Act as a decision strategist. Break the important decision with uncertainty below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to make uncertainty visible instead of pretending confidence where none exists. Decision: [describe the decision]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0355. Prioritize an important decision with uncertainty with ruthless focus

Act as a decision strategist. Review the important decision with uncertainty below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to make uncertainty visible instead of pretending confidence where none exists. Decision: [describe the decision]. Options or tasks: [paste items]. Goal: [what matters most].

0356. Diagnose problems in an important decision with uncertainty

Act as a decision strategist. Diagnose why this important decision with uncertainty is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to make uncertainty visible instead of pretending confidence where none exists. Current situation: [describe the decision]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0357. Draft a recommendation note for an important decision with uncertainty

Act as a decision strategist. Draft a recommendation note based on the important decision with uncertainty below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to make uncertainty visible instead of pretending confidence where none exists. Audience: [who will read this]. Decision: [describe the decision]. Tone: [confident, warm, direct, diplomatic, etc.].

0358. Convert an important decision with uncertainty into a decision checklist

Act as a decision strategist. Convert the important decision with uncertainty below into a reusable decision checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to make uncertainty visible instead of pretending confidence where none exists. Decision: [describe the decision]. Context: [team, tool, workflow, or use case].

0359. Learn how to handle an important decision with uncertainty better

Act as a decision strategist. Teach me how to handle an important decision with uncertainty much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to make uncertainty visible instead of pretending confidence where none exists. Topic or problem: [describe the decision]. Current level: [describe experience].

0360. Design an AI assisted workflow for an important decision with uncertainty

Act as a decision strategist and AI workflow architect. Design an AI assisted system for the important decision with uncertainty below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to make uncertainty visible instead of pretending confidence where none exists. Current process: [describe the decision]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0361. Turn a vendor choice into a decision memo

Act as a decision strategist. Turn the vendor choice below into a clear decision memo. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to compare trade offs, long term risks, and switching costs clearly. Ask at most three questions only if something essential is missing. Decision: [describe the vendors and requirements]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0362. Build a step by step plan for a vendor choice

Act as a decision strategist. Break the vendor choice below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to compare trade offs, long term risks, and switching costs clearly. Decision: [describe the vendors and requirements]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0363. Prioritize a vendor choice with ruthless focus

Act as a decision strategist. Review the vendor choice below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to compare trade offs, long term risks, and switching costs clearly. Decision: [describe the vendors and requirements]. Options or tasks: [paste items]. Goal: [what matters most].

0364. Diagnose problems in a vendor choice

Act as a decision strategist. Diagnose why this vendor choice is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to compare trade offs, long term risks, and switching costs clearly. Current situation: [describe the vendors and requirements]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0365. Draft a recommendation note for a vendor choice

Act as a decision strategist. Draft a recommendation note based on the vendor choice below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to compare trade offs, long term risks, and switching costs clearly. Audience: [who will read this]. Decision: [describe the vendors and requirements]. Tone: [confident, warm, direct, diplomatic, etc.].

0366. Convert a vendor choice into a decision checklist

Act as a decision strategist. Convert the vendor choice below into a reusable decision checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to compare trade offs, long term risks, and switching costs clearly. Decision: [describe the vendors and requirements]. Context: [team, tool, workflow, or use case].

0367. Learn how to handle a vendor choice better

Act as a decision strategist. Teach me how to handle a vendor choice much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to compare trade offs, long term risks, and switching costs clearly. Topic or problem: [describe the vendors and requirements]. Current level: [describe experience].

0368. Design an AI assisted workflow for a vendor choice

Act as a decision strategist and AI workflow architect. Design an AI assisted system for the vendor choice below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to compare trade offs, long term risks, and switching costs clearly. Current process: [describe the vendors and requirements]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0369. Turn a hire or no hire question into a decision memo

Act as a decision strategist. Turn the hire or no hire question below into a clear decision memo. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to separate evidence, instinct, and reversibility before deciding. Ask at most three questions only if something essential is missing. Decision: [describe the candidate and role]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0370. Build a step by step plan for a hire or no hire question

Act as a decision strategist. Break the hire or no hire question below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to separate evidence, instinct, and reversibility before deciding. Decision: [describe the candidate and role]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0371. Prioritize a hire or no hire question with ruthless focus

Act as a decision strategist. Review the hire or no hire question below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to separate evidence, instinct, and reversibility before deciding. Decision: [describe the candidate and role]. Options or tasks: [paste items]. Goal: [what matters most].

0372. Diagnose problems in a hire or no hire question

Act as a decision strategist. Diagnose why this hire or no hire question is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to separate evidence, instinct, and reversibility before deciding. Current situation: [describe the candidate and role]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0373. Draft a recommendation note for a hire or no hire question

Act as a decision strategist. Draft a recommendation note based on the hire or no hire question below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to separate evidence, instinct, and reversibility before deciding. Audience: [who will read this]. Decision: [describe the candidate and role]. Tone: [confident, warm, direct, diplomatic, etc.].

0374. Convert a hire or no hire question into a decision checklist

Act as a decision strategist. Convert the hire or no hire question below into a reusable decision checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to separate evidence, instinct, and reversibility before deciding. Decision: [describe the candidate and role]. Context: [team, tool, workflow, or use case].

0375. Learn how to handle a hire or no hire question better

Act as a decision strategist. Teach me how to handle a hire or no hire question much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to separate evidence, instinct, and reversibility before deciding. Topic or problem: [describe the candidate and role]. Current level: [describe experience].

0376. Design an AI assisted workflow for a hire or no hire question

Act as a decision strategist and AI workflow architect. Design an AI assisted system for the hire or no hire question below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to separate evidence, instinct, and reversibility before deciding. Current process: [describe the candidate and role]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0377. Turn a go or no go launch into a decision memo

Act as a decision strategist. Turn the go or no go launch below into a clear decision memo. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to surface hidden dependencies, downside risk, and decision thresholds. Ask at most three questions only if something essential is missing. Decision: [describe the launch and current status]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0378. Build a step by step plan for a go or no go launch

Act as a decision strategist. Break the go or no go launch below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to surface hidden dependencies, downside risk, and decision thresholds. Decision: [describe the launch and current status]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0379. Prioritize a go or no go launch with ruthless focus

Act as a decision strategist. Review the go or no go launch below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to surface hidden dependencies, downside risk, and decision thresholds. Decision: [describe the launch and current status]. Options or tasks: [paste items]. Goal: [what matters most].

0380. Diagnose problems in a go or no go launch

Act as a decision strategist. Diagnose why this go or no go launch is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to surface hidden dependencies, downside risk, and decision thresholds. Current situation: [describe the launch and current status]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0381. Draft a recommendation note for a go or no go launch

Act as a decision strategist. Draft a recommendation note based on the go or no go launch below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to surface hidden dependencies, downside risk, and decision thresholds. Audience: [who will read this]. Decision: [describe the launch and current status]. Tone: [confident, warm, direct, diplomatic, etc.].

0382. Convert a go or no go launch into a decision checklist

Act as a decision strategist. Convert the go or no go launch below into a reusable decision checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to surface hidden dependencies, downside risk, and decision thresholds. Decision: [describe the launch and current status]. Context: [team, tool, workflow, or use case].

0383. Learn how to handle a go or no go launch better

Act as a decision strategist. Teach me how to handle a go or no go launch much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to surface hidden dependencies, downside risk, and decision thresholds. Topic or problem: [describe the launch and current status]. Current level: [describe experience].

0384. Design an AI assisted workflow for a go or no go launch

Act as a decision strategist and AI workflow architect. Design an AI assisted system for the go or no go launch below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to surface hidden dependencies, downside risk, and decision thresholds. Current process: [describe the launch and current status]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Product Strategy

Prompts 0385-0416

These prompts help you sharpen product choices, evaluate roadmap tension, and connect features to actual user and business value.

0385. Turn a new feature idea into a product strategy brief

Act as a product strategist. Turn the new feature idea below into a clear product strategy brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to test the user problem, strategic fit, and likely adoption before building. Ask at most three questions only if something essential is missing. Product input: [describe the feature idea]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0386. Build a step by step plan for a new feature idea

Act as a product strategist. Break the new feature idea below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to test the user problem, strategic fit, and likely adoption before building. Product input: [describe the feature idea]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0387. Prioritize a new feature idea with ruthless focus

Act as a product strategist. Review the new feature idea below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to test the user problem, strategic fit, and likely adoption before building. Product input: [describe the feature idea]. Options or tasks: [paste items]. Goal: [what matters most].

0388. Diagnose problems in a new feature idea

Act as a product strategist. Diagnose why this new feature idea is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to test the user problem, strategic fit, and likely adoption before building. Current situation: [describe the feature idea]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0389. Draft a product recommendation memo for a new feature idea

Act as a product strategist. Draft a product recommendation memo based on the new feature idea below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to test the user problem, strategic fit, and likely adoption before building. Audience: [who will read this]. Product input: [describe the feature idea]. Tone: [confident, warm, direct, diplomatic, etc.].

0390. Convert a new feature idea into a feature evaluation checklist

Act as a product strategist. Convert the new feature idea below into a reusable feature evaluation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to test the user problem, strategic fit, and likely adoption before building. Product input: [describe the feature idea]. Context: [team, tool, workflow, or use case].

0391. Learn how to handle a new feature idea better

Act as a product strategist. Teach me how to handle a new feature idea much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to test the user problem, strategic fit, and likely adoption before building. Topic or problem: [describe the feature idea]. Current level: [describe experience].

0392. Design an AI assisted workflow for a new feature idea

Act as a product strategist and AI workflow architect. Design an AI assisted system for the new feature idea below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to test the user problem, strategic fit, and likely adoption before building. Current process: [describe the feature idea]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0393. Turn a product opportunity into a product strategy brief

Act as a product strategist. Turn the product opportunity below into a clear product strategy brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to estimate upside, risks, unmet needs, and the simplest useful first move. Ask at most three questions only if something essential is missing. Product input: [describe the opportunity]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0394. Build a step by step plan for a product opportunity

Act as a product strategist. Break the product opportunity below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to estimate upside, risks, unmet needs, and the simplest useful first move. Product input: [describe the opportunity]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0395. Prioritize a product opportunity with ruthless focus

Act as a product strategist. Review the product opportunity below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to estimate upside, risks, unmet needs, and the simplest useful first move. Product input: [describe the opportunity]. Options or tasks: [paste items]. Goal: [what matters most].

0396. Diagnose problems in a product opportunity

Act as a product strategist. Diagnose why this product opportunity is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to estimate upside, risks, unmet needs, and the simplest useful first move. Current situation: [describe the opportunity]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0397. Draft a product recommendation memo for a product opportunity

Act as a product strategist. Draft a product recommendation memo based on the product opportunity below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to estimate upside, risks, unmet needs, and the simplest useful first move. Audience: [who will read this]. Product input: [describe the opportunity]. Tone: [confident, warm, direct, diplomatic, etc.].

0398. Convert a product opportunity into a feature evaluation checklist

Act as a product strategist. Convert the product opportunity below into a reusable feature evaluation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to estimate upside, risks, unmet needs, and the simplest useful first move. Product input: [describe the opportunity]. Context: [team, tool, workflow, or use case].

0399. Learn how to handle a product opportunity better

Act as a product strategist. Teach me how to handle a product opportunity much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to estimate upside, risks, unmet needs, and the simplest useful first move. Topic or problem: [describe the opportunity]. Current level: [describe experience].

0400. Design an AI assisted workflow for a product opportunity

Act as a product strategist and AI workflow architect. Design an AI assisted system for the product opportunity below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to estimate upside, risks, unmet needs, and the simplest useful first move. Current process: [describe the opportunity]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0401. Turn a declining adoption into a product strategy brief

Act as a product strategist. Turn the declining adoption below into a clear product strategy brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to separate awareness, activation, usability, and value problems. Ask at most three questions only if something essential is missing. Product input: [describe the product and what is happening]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0402. Build a step by step plan for a declining adoption

Act as a product strategist. Break the declining adoption below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to separate awareness, activation, usability, and value problems. Product input: [describe the product and what is happening]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0403. Prioritize a declining adoption with ruthless focus

Act as a product strategist. Review the declining adoption below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to separate awareness, activation, usability, and value problems. Product input: [describe the product and what is happening]. Options or tasks: [paste items]. Goal: [what matters most].

0404. Diagnose problems in a declining adoption

Act as a product strategist. Diagnose why this declining adoption is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to separate awareness, activation, usability, and value problems. Current situation: [describe the product and what is happening]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0405. Draft a product recommendation memo for a declining adoption

Act as a product strategist. Draft a product recommendation memo based on the declining adoption below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to separate awareness, activation, usability, and value problems. Audience: [who will read this]. Product input: [describe the product and what is happening]. Tone: [confident, warm, direct, diplomatic, etc.].

0406. Convert a declining adoption into a feature evaluation checklist

Act as a product strategist. Convert the declining adoption below into a reusable feature evaluation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to separate awareness, activation, usability, and value problems. Product input: [describe the product and what is happening]. Context: [team, tool, workflow, or use case].

0407. Learn how to handle a declining adoption better

Act as a product strategist. Teach me how to handle a declining adoption much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to separate awareness, activation, usability, and value problems. Topic or problem: [describe the product and what is happening]. Current level: [describe experience].

0408. Design an AI assisted workflow for a declining adoption

Act as a product strategist and AI workflow architect. Design an AI assisted system for the declining adoption below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to separate awareness, activation, usability, and value problems. Current process: [describe the product and what is happening]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0409. Turn a roadmap conflict into a product strategy brief

Act as a product strategist. Turn the roadmap conflict below into a clear product strategy brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to make trade offs explicit across impact, timing, and strategic importance. Ask at most three questions only if something essential is missing. Product input: [describe the competing priorities]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0410. Build a step by step plan for a roadmap conflict

Act as a product strategist. Break the roadmap conflict below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to make trade offs explicit across impact, timing, and strategic importance. Product input: [describe the competing priorities]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0411. Prioritize a roadmap conflict with ruthless focus

Act as a product strategist. Review the roadmap conflict below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to make trade offs explicit across impact, timing, and strategic importance. Product input: [describe the competing priorities]. Options or tasks: [paste items]. Goal: [what matters most].

0412. Diagnose problems in a roadmap conflict

Act as a product strategist. Diagnose why this roadmap conflict is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to make trade offs explicit across impact, timing, and strategic importance. Current situation: [describe the competing priorities]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0413. Draft a product recommendation memo for a roadmap conflict

Act as a product strategist. Draft a product recommendation memo based on the roadmap conflict below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to make trade offs explicit across impact, timing, and strategic importance. Audience: [who will read this]. Product input: [describe the competing priorities]. Tone: [confident, warm, direct, diplomatic, etc.].

0414. Convert a roadmap conflict into a feature evaluation checklist

Act as a product strategist. Convert the roadmap conflict below into a reusable feature evaluation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to make trade offs explicit across impact, timing, and strategic importance. Product input: [describe the competing priorities]. Context: [team, tool, workflow, or use case].

0415. Learn how to handle a roadmap conflict better

Act as a product strategist. Teach me how to handle a roadmap conflict much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to make trade offs explicit across impact, timing, and strategic importance. Topic or problem: [describe the competing priorities]. Current level: [describe experience].

0416. Design an AI assisted workflow for a roadmap conflict

Act as a product strategist and AI workflow architect. Design an AI assisted system for the roadmap conflict below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to make trade offs explicit across impact, timing, and strategic importance. Current process: [describe the competing priorities]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Customer Research

Prompts 0417-0448

Use this section to ask better questions, synthesize voice of customer data, and turn user feedback into sharper decisions.

0417. Turn an interview plan into a research plan

Act as a user researcher. Turn the interview plan below into a clear research plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to create questions that uncover behavior, context, and unmet needs. Ask at most three questions only if something essential is missing. Research input: [describe the research goal]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0418. Build a step by step plan for an interview plan

Act as a user researcher. Break the interview plan below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to create questions that uncover behavior, context, and unmet needs. Research input: [describe the research goal]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0419. Prioritize an interview plan with ruthless focus

Act as a user researcher. Review the interview plan below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to create questions that uncover behavior, context, and unmet needs. Research input: [describe the research goal]. Options or tasks: [paste items]. Goal: [what matters most].

0420. Diagnose problems in an interview plan

Act as a user researcher. Diagnose why this interview plan is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to create questions that uncover behavior, context, and unmet needs. Current situation: [describe the research goal]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0421. Draft an insight summary for an interview plan

Act as a user researcher. Draft an insight summary based on the interview plan below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to create questions that uncover behavior, context, and unmet needs. Audience: [who will read this]. Research input: [describe the research goal]. Tone: [confident, warm, direct, diplomatic, etc.].

0422. Convert an interview plan into a customer interview guide

Act as a user researcher. Convert the interview plan below into a reusable customer interview guide. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to create questions that uncover behavior, context, and unmet needs. Research input: [describe the research goal]. Context: [team, tool, workflow, or use case].

0423. Learn how to handle an interview plan better

Act as a user researcher. Teach me how to handle an interview plan much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to create questions that uncover behavior, context, and unmet needs. Topic or problem: [describe the research goal]. Current level: [describe experience].

0424. Design an AI assisted workflow for an interview plan

Act as a user researcher and AI workflow architect. Design an AI assisted system for the interview plan below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to create questions that uncover behavior, context, and unmet needs. Current process: [describe the research goal]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0425. Turn a survey results into a research plan

Act as a user researcher. Turn the survey results below into a clear research plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to distinguish patterns worth acting on from noisy or weak signals. Ask at most three questions only if something essential is missing. Research input: [paste or summarize the results]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0426. Build a step by step plan for a survey results

Act as a user researcher. Break the survey results below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to distinguish patterns worth acting on from noisy or weak signals. Research input: [paste or summarize the results]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0427. Prioritize a survey results with ruthless focus

Act as a user researcher. Review the survey results below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to distinguish patterns worth acting on from noisy or weak signals. Research input: [paste or summarize the results]. Options or tasks: [paste items]. Goal: [what matters most].

0428. Diagnose problems in a survey results

Act as a user researcher. Diagnose why this survey results is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to distinguish patterns worth acting on from noisy or weak signals. Current situation: [paste or summarize the results]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0429. Draft an insight summary for a survey results

Act as a user researcher. Draft an insight summary based on the survey results below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to distinguish patterns worth acting on from noisy or weak signals. Audience: [who will read this]. Research input: [paste or summarize the results]. Tone: [confident, warm, direct, diplomatic, etc.].

0430. Convert a survey results into a customer interview guide

Act as a user researcher. Convert the survey results below into a reusable customer interview guide. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to distinguish patterns worth acting on from noisy or weak signals. Research input: [paste or summarize the results]. Context: [team, tool, workflow, or use case].

0431. Learn how to handle a survey results better

Act as a user researcher. Teach me how to handle a survey results much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to distinguish patterns worth acting on from noisy or weak signals. Topic or problem: [paste or summarize the results]. Current level: [describe experience].

0432. Design an AI assisted workflow for a survey results

Act as a user researcher and AI workflow architect. Design an AI assisted system for the survey results below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to distinguish patterns worth acting on from noisy or weak signals. Current process: [paste or summarize the results]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0433. Turn a support tickets into a research plan

Act as a user researcher. Turn the support tickets below into a clear research plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to cluster issues, reveal root causes, and find the most important pain points. Ask at most three questions only if something essential is missing. Research input: [paste examples or themes]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0434. Build a step by step plan for a support tickets

Act as a user researcher. Break the support tickets below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to cluster issues, reveal root causes, and find the most important pain points. Research input: [paste examples or themes]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0435. Prioritize a support tickets with ruthless focus

Act as a user researcher. Review the support tickets below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to cluster issues, reveal root causes, and find the most important pain points. Research input: [paste examples or themes]. Options or tasks: [paste items]. Goal: [what matters most].

0436. Diagnose problems in a support tickets

Act as a user researcher. Diagnose why this support tickets is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to cluster issues, reveal root causes, and find the most important pain points. Current situation: [paste examples or themes]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0437. Draft an insight summary for a support tickets

Act as a user researcher. Draft an insight summary based on the support tickets below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to cluster issues, reveal root causes, and find the most important pain points. Audience: [who will read this]. Research input: [paste examples or themes]. Tone: [confident, warm, direct, diplomatic, etc.].

0438. Convert a support tickets into a customer interview guide

Act as a user researcher. Convert the support tickets below into a reusable customer interview guide. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to cluster issues, reveal root causes, and find the most important pain points. Research input: [paste examples or themes]. Context: [team, tool, workflow, or use case].

0439. Learn how to handle a support tickets better

Act as a user researcher. Teach me how to handle a support tickets much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to cluster issues, reveal root causes, and find the most important pain points. Topic or problem: [paste examples or themes]. Current level: [describe experience].

0440. Design an AI assisted workflow for a support tickets

Act as a user researcher and AI workflow architect. Design an AI assisted system for the support tickets below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to cluster issues, reveal root causes, and find the most important pain points. Current process: [paste examples or themes]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0441. Turn an usability issue into a research plan

Act as a user researcher. Turn the usability issue below into a clear research plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to understand what is confusing, when it happens, and why users get stuck. Ask at most three questions only if something essential is missing. Research input: [describe the issue and user behavior]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0442. Build a step by step plan for an usability issue

Act as a user researcher. Break the usability issue below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to understand what is confusing, when it happens, and why users get stuck. Research input: [describe the issue and user behavior]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0443. Prioritize an usability issue with ruthless focus

Act as a user researcher. Review the usability issue below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to understand what is confusing, when it happens, and why users get stuck. Research input: [describe the issue and user behavior]. Options or tasks: [paste items]. Goal: [what matters most].

0444. Diagnose problems in an usability issue

Act as a user researcher. Diagnose why this usability issue is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to understand what is confusing, when it happens, and why users get stuck. Current situation: [describe the issue and user behavior]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0445. Draft an insight summary for an usability issue

Act as a user researcher. Draft an insight summary based on the usability issue below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to understand what is confusing, when it happens, and why users get stuck. Audience: [who will read this]. Research input: [describe the issue and user behavior]. Tone: [confident, warm, direct, diplomatic, etc.].

0446. Convert an usability issue into a customer interview guide

Act as a user researcher. Convert the usability issue below into a reusable customer interview guide. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to understand what is confusing, when it happens, and why users get stuck. Research input: [describe the issue and user behavior]. Context: [team, tool, workflow, or use case].

0447. Learn how to handle an usability issue better

Act as a user researcher. Teach me how to handle an usability issue much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to understand what is confusing, when it happens, and why users get stuck. Topic or problem: [describe the issue and user behavior]. Current level: [describe experience].

0448. Design an AI assisted workflow for an usability issue

Act as a user researcher and AI workflow architect. Design an AI assisted system for the usability issue below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to understand what is confusing, when it happens, and why users get stuck. Current process: [describe the issue and user behavior]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Marketing Strategy

Prompts 0449-0480

These prompts help you clarify positioning, choose channels wisely, and build campaigns that are strategic instead of random activity.

0449. Turn a campaign idea into a marketing plan

Act as a growth strategist. Turn the campaign idea below into a clear marketing plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to connect the campaign to audience, offer, message, and measurable outcome. Ask at most three questions only if something essential is missing. Marketing input: [describe the campaign idea]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0450. Build a step by step plan for a campaign idea

Act as a growth strategist. Break the campaign idea below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to connect the campaign to audience, offer, message, and measurable outcome. Marketing input: [describe the campaign idea]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0451. Prioritize a campaign idea with ruthless focus

Act as a growth strategist. Review the campaign idea below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to connect the campaign to audience, offer, message, and measurable outcome. Marketing input: [describe the campaign idea]. Options or tasks: [paste items]. Goal: [what matters most].

0452. Diagnose problems in a campaign idea

Act as a growth strategist. Diagnose why this campaign idea is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to connect the campaign to audience, offer, message, and measurable outcome. Current situation: [describe the campaign idea]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0453. Draft a campaign brief for a campaign idea

Act as a growth strategist. Draft a campaign brief based on the campaign idea below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to connect the campaign to audience, offer, message, and measurable outcome. Audience: [who will read this]. Marketing input: [describe the campaign idea]. Tone: [confident, warm, direct, diplomatic, etc.].

0454. Convert a campaign idea into a channel planning checklist

Act as a growth strategist. Convert the campaign idea below into a reusable channel planning checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to connect the campaign to audience, offer, message, and measurable outcome. Marketing input: [describe the campaign idea]. Context: [team, tool, workflow, or use case].

0455. Learn how to handle a campaign idea better

Act as a growth strategist. Teach me how to handle a campaign idea much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to connect the campaign to audience, offer, message, and measurable outcome. Topic or problem: [describe the campaign idea]. Current level: [describe experience].

0456. Design an AI assisted workflow for a campaign idea

Act as a growth strategist and AI workflow architect. Design an AI assisted system for the campaign idea below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to connect the campaign to audience, offer, message, and measurable outcome. Current process: [describe the campaign idea]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0457. Turn a channel strategy into a marketing plan

Act as a growth strategist. Turn the channel strategy below into a clear marketing plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to match channels to audience behavior, economics, and team capacity. Ask at most three questions only if something essential is missing. Marketing input: [describe the product and channels under consideration]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0458. Build a step by step plan for a channel strategy

Act as a growth strategist. Break the channel strategy below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to match channels to audience behavior, economics, and team capacity. Marketing input: [describe the product and channels under consideration]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0459. Prioritize a channel strategy with ruthless focus

Act as a growth strategist. Review the channel strategy below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to match channels to audience behavior, economics, and team capacity. Marketing input: [describe the product and channels under consideration]. Options or tasks: [paste items]. Goal: [what matters most].

0460. Diagnose problems in a channel strategy

Act as a growth strategist. Diagnose why this channel strategy is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to match channels to audience behavior, economics, and team capacity. Current situation: [describe the product and channels under consideration]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0461. Draft a campaign brief for a channel strategy

Act as a growth strategist. Draft a campaign brief based on the channel strategy below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to match channels to audience behavior, economics, and team capacity. Audience: [who will read this]. Marketing input: [describe the product and channels under consideration]. Tone: [confident, warm, direct, diplomatic, etc.].

0462. Convert a channel strategy into a channel planning checklist

Act as a growth strategist. Convert the channel strategy below into a reusable channel planning checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to match channels to audience behavior, economics, and team capacity. Marketing input: [describe the product and channels under consideration]. Context: [team, tool, workflow, or use case].

0463. Learn how to handle a channel strategy better

Act as a growth strategist. Teach me how to handle a channel strategy much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to match channels to audience behavior, economics, and team capacity. Topic or problem: [describe the product and channels under consideration]. Current level: [describe experience].

0464. Design an AI assisted workflow for a channel strategy

Act as a growth strategist and AI workflow architect. Design an AI assisted system for the channel strategy below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to match channels to audience behavior, economics, and team capacity. Current process: [describe the product and channels under consideration]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0465. Turn a launch plan into a marketing plan

Act as a growth strategist. Turn the launch plan below into a clear marketing plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to sequence awareness, education, proof, and conversion instead of blasting everything at once. Ask at most three questions only if something essential is missing. Marketing input: [describe the launch]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0466. Build a step by step plan for a launch plan

Act as a growth strategist. Break the launch plan below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to sequence awareness, education, proof, and conversion instead of blasting everything at once. Marketing input: [describe the launch]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0467. Prioritize a launch plan with ruthless focus

Act as a growth strategist. Review the launch plan below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to sequence awareness, education, proof, and conversion instead of blasting everything at once. Marketing input: [describe the launch]. Options or tasks: [paste items]. Goal: [what matters most].

0468. Diagnose problems in a launch plan

Act as a growth strategist. Diagnose why this launch plan is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to sequence awareness, education, proof, and conversion instead of blasting everything at once. Current situation: [describe the launch]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0469. Draft a campaign brief for a launch plan

Act as a growth strategist. Draft a campaign brief based on the launch plan below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to sequence awareness, education, proof, and conversion instead of blasting everything at once. Audience: [who will read this]. Marketing input: [describe the launch]. Tone: [confident, warm, direct, diplomatic, etc.].

0470. Convert a launch plan into a channel planning checklist

Act as a growth strategist. Convert the launch plan below into a reusable channel planning checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to sequence awareness, education, proof, and conversion instead of blasting everything at once. Marketing input: [describe the launch]. Context: [team, tool, workflow, or use case].

0471. Learn how to handle a launch plan better

Act as a growth strategist. Teach me how to handle a launch plan much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to sequence awareness, education, proof, and conversion instead of blasting everything at once. Topic or problem: [describe the launch]. Current level: [describe experience].

0472. Design an AI assisted workflow for a launch plan

Act as a growth strategist and AI workflow architect. Design an AI assisted system for the launch plan below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to sequence awareness, education, proof, and conversion instead of blasting everything at once. Current process: [describe the launch]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0473. Turn an audience segmentation problem into a marketing plan

Act as a growth strategist. Turn the audience segmentation problem below into a clear marketing plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to separate broad audience labels from segments that change messaging and action. Ask at most three questions only if something essential is missing. Marketing input: [describe the audience and challenge]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0474. Build a step by step plan for an audience segmentation problem

Act as a growth strategist. Break the audience segmentation problem below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to separate broad audience labels from segments that change messaging and action. Marketing input: [describe the audience and challenge]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0475. Prioritize an audience segmentation problem with ruthless focus

Act as a growth strategist. Review the audience segmentation problem below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to separate broad audience labels from segments that change messaging and action. Marketing input: [describe the audience and challenge]. Options or tasks: [paste items]. Goal: [what matters most].

0476. Diagnose problems in an audience segmentation problem

Act as a growth strategist. Diagnose why this audience segmentation problem is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to separate broad audience labels from segments that change messaging and action. Current situation: [describe the audience and challenge]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0477. Draft a campaign brief for an audience segmentation problem

Act as a growth strategist. Draft a campaign brief based on the audience segmentation problem below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to separate broad audience labels from segments that change messaging and action. Audience: [who will read this]. Marketing input: [describe the audience and challenge]. Tone: [confident, warm, direct, diplomatic, etc.].

0478. Convert an audience segmentation problem into a channel planning checklist

Act as a growth strategist. Convert the audience segmentation problem below into a reusable channel planning checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to separate broad audience labels from segments that change messaging and action. Marketing input: [describe the audience and challenge]. Context: [team, tool, workflow, or use case].

0479. Learn how to handle an audience segmentation problem better

Act as a growth strategist. Teach me how to handle an audience segmentation problem much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to separate broad audience labels from segments that change messaging and action. Topic or problem: [describe the audience and challenge]. Current level: [describe experience].

0480. Design an AI assisted workflow for an audience segmentation problem

Act as a growth strategist and AI workflow architect. Design an AI assisted system for the audience segmentation problem below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to separate broad audience labels from segments that change messaging and action. Current process: [describe the audience and challenge]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Content Creation

Prompts 0481-0512

Use these prompts to create stronger content faster, with better hooks, clearer structure, and less guesswork in production.

0481. Turn a pillar article idea into a content brief

Act as a content strategist. Turn the pillar article idea below into a clear content brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to find a sharper angle, clearer promise, and structure that earns attention. Ask at most three questions only if something essential is missing. Content input: [describe the idea or keyword]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0482. Build a step by step plan for a pillar article idea

Act as a content strategist. Break the pillar article idea below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to find a sharper angle, clearer promise, and structure that earns attention. Content input: [describe the idea or keyword]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0483. Prioritize a pillar article idea with ruthless focus

Act as a content strategist. Review the pillar article idea below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to find a sharper angle, clearer promise, and structure that earns attention. Content input: [describe the idea or keyword]. Options or tasks: [paste items]. Goal: [what matters most].

0484. Diagnose problems in a pillar article idea

Act as a content strategist. Diagnose why this pillar article idea is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to find a sharper angle, clearer promise, and structure that earns attention. Current situation: [describe the idea or keyword]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0485. Draft a content outline note for a pillar article idea

Act as a content strategist. Draft a content outline note based on the pillar article idea below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to find a sharper angle, clearer promise, and structure that earns attention. Audience: [who will read this]. Content input: [describe the idea or keyword]. Tone: [confident, warm, direct, diplomatic, etc.].

0486. Convert a pillar article idea into a content production checklist

Act as a content strategist. Convert the pillar article idea below into a reusable content production checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to find a sharper angle, clearer promise, and structure that earns attention. Content input: [describe the idea or keyword]. Context: [team, tool, workflow, or use case].

0487. Learn how to handle a pillar article idea better

Act as a content strategist. Teach me how to handle a pillar article idea much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to find a sharper angle, clearer promise, and structure that earns attention. Topic or problem: [describe the idea or keyword]. Current level: [describe experience].

0488. Design an AI assisted workflow for a pillar article idea

Act as a content strategist and AI workflow architect. Design an AI assisted system for the pillar article idea below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to find a sharper angle, clearer promise, and structure that earns attention. Current process: [describe the idea or keyword]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0489. Turn a newsletter issue into a content brief

Act as a content strategist. Turn the newsletter issue below into a clear content brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to create a compelling flow that informs, entertains, and leads to action. Ask at most three questions only if something essential is missing. Content input: [describe the issue theme]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0490. Build a step by step plan for a newsletter issue

Act as a content strategist. Break the newsletter issue below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to create a compelling flow that informs, entertains, and leads to action. Content input: [describe the issue theme]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0491. Prioritize a newsletter issue with ruthless focus

Act as a content strategist. Review the newsletter issue below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to create a compelling flow that informs, entertains, and leads to action. Content input: [describe the issue theme]. Options or tasks: [paste items]. Goal: [what matters most].

0492. Diagnose problems in a newsletter issue

Act as a content strategist. Diagnose why this newsletter issue is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to create a compelling flow that informs, entertains, and leads to action. Current situation: [describe the issue theme]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0493. Draft a content outline note for a newsletter issue

Act as a content strategist. Draft a content outline note based on the newsletter issue below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to create a compelling flow that informs, entertains, and leads to action. Audience: [who will read this]. Content input: [describe the issue theme]. Tone: [confident, warm, direct, diplomatic, etc.].

0494. Convert a newsletter issue into a content production checklist

Act as a content strategist. Convert the newsletter issue below into a reusable content production checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to create a compelling flow that informs, entertains, and leads to action. Content input: [describe the issue theme]. Context: [team, tool, workflow, or use case].

0495. Learn how to handle a newsletter issue better

Act as a content strategist. Teach me how to handle a newsletter issue much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to create a compelling flow that informs, entertains, and leads to action. Topic or problem: [describe the issue theme]. Current level: [describe experience].

0496. Design an AI assisted workflow for a newsletter issue

Act as a content strategist and AI workflow architect. Design an AI assisted system for the newsletter issue below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to create a compelling flow that informs, entertains, and leads to action. Current process: [describe the issue theme]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0497. Turn a social content batch into a content brief

Act as a content strategist. Turn the social content batch below into a clear content brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to adapt one idea into multiple formats without sounding repetitive. Ask at most three questions only if something essential is missing. Content input: [describe the topic or campaign]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0498. Build a step by step plan for a social content batch

Act as a content strategist. Break the social content batch below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to adapt one idea into multiple formats without sounding repetitive. Content input: [describe the topic or campaign]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0499. Prioritize a social content batch with ruthless focus

Act as a content strategist. Review the social content batch below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to adapt one idea into multiple formats without sounding repetitive. Content input: [describe the topic or campaign]. Options or tasks: [paste items]. Goal: [what matters most].

0500. Diagnose problems in a social content batch

Act as a content strategist. Diagnose why this social content batch is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to adapt one idea into multiple formats without sounding repetitive. Current situation: [describe the topic or campaign]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0501. Draft a content outline note for a social content batch

Act as a content strategist. Draft a content outline note based on the social content batch below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to adapt one idea into multiple formats without sounding repetitive. Audience: [who will read this]. Content input: [describe the topic or campaign]. Tone: [confident, warm, direct, diplomatic, etc.].

0502. Convert a social content batch into a content production checklist

Act as a content strategist. Convert the social content batch below into a reusable content production checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to adapt one idea into multiple formats without sounding repetitive. Content input: [describe the topic or campaign]. Context: [team, tool, workflow, or use case].

0503. Learn how to handle a social content batch better

Act as a content strategist. Teach me how to handle a social content batch much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to adapt one idea into multiple formats without sounding repetitive. Topic or problem: [describe the topic or campaign]. Current level: [describe experience].

0504. Design an AI assisted workflow for a social content batch

Act as a content strategist and AI workflow architect. Design an AI assisted system for the social content batch below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to adapt one idea into multiple formats without sounding repetitive. Current process: [describe the topic or campaign]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0505. Turn a video script concept into a content brief

Act as a content strategist. Turn the video script concept below into a clear content brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to make the opening stronger, the pacing tighter, and the key message memorable. Ask at most three questions only if something essential is missing. Content input: [describe the concept]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0506. Build a step by step plan for a video script concept

Act as a content strategist. Break the video script concept below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to make the opening stronger, the pacing tighter, and the key message memorable. Content input: [describe the concept]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0507. Prioritize a video script concept with ruthless focus

Act as a content strategist. Review the video script concept below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to make the opening stronger, the pacing tighter, and the key message memorable. Content input: [describe the concept]. Options or tasks: [paste items]. Goal: [what matters most].

0508. Diagnose problems in a video script concept

Act as a content strategist. Diagnose why this video script concept is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to make the opening stronger, the pacing tighter, and the key message memorable. Current situation: [describe the concept]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0509. Draft a content outline note for a video script concept

Act as a content strategist. Draft a content outline note based on the video script concept below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to make the opening stronger, the pacing tighter, and the key message memorable. Audience: [who will read this]. Content input: [describe the concept]. Tone: [confident, warm, direct, diplomatic, etc.].

0510. Convert a video script concept into a content production checklist

Act as a content strategist. Convert the video script concept below into a reusable content production checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to make the opening stronger, the pacing tighter, and the key message memorable. Content input: [describe the concept]. Context: [team, tool, workflow, or use case].

0511. Learn how to handle a video script concept better

Act as a content strategist. Teach me how to handle a video script concept much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to make the opening stronger, the pacing tighter, and the key message memorable. Topic or problem: [describe the concept]. Current level: [describe experience].

0512. Design an AI assisted workflow for a video script concept

Act as a content strategist and AI workflow architect. Design an AI assisted system for the video script concept below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to make the opening stronger, the pacing tighter, and the key message memorable. Current process: [describe the concept]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Sales Outreach

Prompts 0513-0544

These prompts help you sharpen targeting, write better outreach, and move deals forward with more relevance and less generic noise.

0513. Turn a cold outreach campaign into an account plan

Act as a sales strategist. Turn the cold outreach campaign below into a clear account plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to increase relevance, specificity, and credibility without bloated copy. Ask at most three questions only if something essential is missing. Sales input: [describe the audience, offer, and context]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0514. Build a step by step plan for a cold outreach campaign

Act as a sales strategist. Break the cold outreach campaign below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to increase relevance, specificity, and credibility without bloated copy. Sales input: [describe the audience, offer, and context]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0515. Prioritize a cold outreach campaign with ruthless focus

Act as a sales strategist. Review the cold outreach campaign below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to increase relevance, specificity, and credibility without bloated copy. Sales input: [describe the audience, offer, and context]. Options or tasks: [paste items]. Goal: [what matters most].

0516. Diagnose problems in a cold outreach campaign

Act as a sales strategist. Diagnose why this cold outreach campaign is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to increase relevance, specificity, and credibility without bloated copy. Current situation: [describe the audience, offer, and context]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0517. Draft a sales message for a cold outreach campaign

Act as a sales strategist. Draft a sales message based on the cold outreach campaign below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to increase relevance, specificity, and credibility without bloated copy. Audience: [who will read this]. Sales input: [describe the audience, offer, and context]. Tone: [confident, warm, direct, diplomatic, etc.].

0518. Convert a cold outreach campaign into an outreach workflow

Act as a sales strategist. Convert the cold outreach campaign below into a reusable outreach workflow. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to increase relevance, specificity, and credibility without bloated copy. Sales input: [describe the audience, offer, and context]. Context: [team, tool, workflow, or use case].

0519. Learn how to handle a cold outreach campaign better

Act as a sales strategist. Teach me how to handle a cold outreach campaign much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to increase relevance, specificity, and credibility without bloated copy. Topic or problem: [describe the audience, offer, and context]. Current level: [describe experience].

0520. Design an AI assisted workflow for a cold outreach campaign

Act as a sales strategist and AI workflow architect. Design an AI assisted system for the cold outreach campaign below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to increase relevance, specificity, and credibility without bloated copy. Current process: [describe the audience, offer, and context]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0521. Turn a follow up after demo into an account plan

Act as a sales strategist. Turn the follow up after demo below into a clear account plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to reinforce value, answer concerns, and create a crisp next step. Ask at most three questions only if something essential is missing. Sales input: [describe the demo and buyer situation]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0522. Build a step by step plan for a follow up after demo

Act as a sales strategist. Break the follow up after demo below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to reinforce value, answer concerns, and create a crisp next step. Sales input: [describe the demo and buyer situation]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0523. Prioritize a follow up after demo with ruthless focus

Act as a sales strategist. Review the follow up after demo below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to reinforce value, answer concerns, and create a crisp next step. Sales input: [describe the demo and buyer situation]. Options or tasks: [paste items]. Goal: [what matters most].

0524. Diagnose problems in a follow up after demo

Act as a sales strategist. Diagnose why this follow up after demo is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to reinforce value, answer concerns, and create a crisp next step. Current situation: [describe the demo and buyer situation]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0525. Draft a sales message for a follow up after demo

Act as a sales strategist. Draft a sales message based on the follow up after demo below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to reinforce value, answer concerns, and create a crisp next step. Audience: [who will read this]. Sales input: [describe the demo and buyer situation]. Tone: [confident, warm, direct, diplomatic, etc.].

0526. Convert a follow up after demo into an outreach workflow

Act as a sales strategist. Convert the follow up after demo below into a reusable outreach workflow. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to reinforce value, answer concerns, and create a crisp next step. Sales input: [describe the demo and buyer situation]. Context: [team, tool, workflow, or use case].

0527. Learn how to handle a follow up after demo better

Act as a sales strategist. Teach me how to handle a follow up after demo much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to reinforce value, answer concerns, and create a crisp next step. Topic or problem: [describe the demo and buyer situation]. Current level: [describe experience].

0528. Design an AI assisted workflow for a follow up after demo

Act as a sales strategist and AI workflow architect. Design an AI assisted system for the follow up after demo below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to reinforce value, answer concerns, and create a crisp next step. Current process: [describe the demo and buyer situation]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0529. Turn an account plan into an account plan

Act as a sales strategist. Turn the account plan below into a clear account plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to map stakeholders, buying context, friction points, and expansion opportunities. Ask at most three questions only if something essential is missing. Sales input: [describe the account and goal]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0530. Build a step by step plan for an account plan

Act as a sales strategist. Break the account plan below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to map stakeholders, buying context, friction points, and expansion opportunities. Sales input: [describe the account and goal]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0531. Prioritize an account plan with ruthless focus

Act as a sales strategist. Review the account plan below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to map stakeholders, buying context, friction points, and expansion opportunities. Sales input: [describe the account and goal]. Options or tasks: [paste items]. Goal: [what matters most].

0532. Diagnose problems in an account plan

Act as a sales strategist. Diagnose why this account plan is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to map stakeholders, buying context, friction points, and expansion opportunities. Current situation: [describe the account and goal]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0533. Draft a sales message for an account plan

Act as a sales strategist. Draft a sales message based on the account plan below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to map stakeholders, buying context, friction points, and expansion opportunities. Audience: [who will read this]. Sales input: [describe the account and goal]. Tone: [confident, warm, direct, diplomatic, etc.].

0534. Convert an account plan into an outreach workflow

Act as a sales strategist. Convert the account plan below into a reusable outreach workflow. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to map stakeholders, buying context, friction points, and expansion opportunities. Sales input: [describe the account and goal]. Context: [team, tool, workflow, or use case].

0535. Learn how to handle an account plan better

Act as a sales strategist. Teach me how to handle an account plan much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to map stakeholders, buying context, friction points, and expansion opportunities. Topic or problem: [describe the account and goal]. Current level: [describe experience].

0536. Design an AI assisted workflow for an account plan

Act as a sales strategist and AI workflow architect. Design an AI assisted system for the account plan below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to map stakeholders, buying context, friction points, and expansion opportunities. Current process: [describe the account and goal]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0537. Turn an objection heavy deal into an account plan

Act as a sales strategist. Turn the objection heavy deal below into a clear account plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to separate surface objections from the deeper buying risk underneath. Ask at most three questions only if something essential is missing. Sales input: [describe the objections and deal status]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0538. Build a step by step plan for an objection heavy deal

Act as a sales strategist. Break the objection heavy deal below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to separate surface objections from the deeper buying risk underneath. Sales input: [describe the objections and deal status]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0539. Prioritize an objection heavy deal with ruthless focus

Act as a sales strategist. Review the objection heavy deal below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to separate surface objections from the deeper buying risk underneath. Sales input: [describe the objections and deal status]. Options or tasks: [paste items]. Goal: [what matters most].

0540. Diagnose problems in an objection heavy deal

Act as a sales strategist. Diagnose why this objection heavy deal is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to separate surface objections from the deeper buying risk underneath. Current situation: [describe the objections and deal status]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0541. Draft a sales message for an objection heavy deal

Act as a sales strategist. Draft a sales message based on the objection heavy deal below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to separate surface objections from the deeper buying risk underneath. Audience: [who will read this]. Sales input: [describe the objections and deal status]. Tone: [confident, warm, direct, diplomatic, etc.].

0542. Convert an objection heavy deal into an outreach workflow

Act as a sales strategist. Convert the objection heavy deal below into a reusable outreach workflow. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to separate surface objections from the deeper buying risk underneath. Sales input: [describe the objections and deal status]. Context: [team, tool, workflow, or use case].

0543. Learn how to handle an objection heavy deal better

Act as a sales strategist. Teach me how to handle an objection heavy deal much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to separate surface objections from the deeper buying risk underneath. Topic or problem: [describe the objections and deal status]. Current level: [describe experience].

0544. Design an AI assisted workflow for an objection heavy deal

Act as a sales strategist and AI workflow architect. Design an AI assisted system for the objection heavy deal below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to separate surface objections from the deeper buying risk underneath. Current process: [describe the objections and deal status]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Customer Support and Success

Prompts 0545-0576

Use these prompts to reduce churn risk, improve onboarding, and turn reactive support work into a more proactive customer system.

0545. Turn a churn risk account into a success plan

Act as a customer success lead. Turn the churn risk account below into a clear success plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to identify the real risk drivers and the fastest path to regained value. Ask at most three questions only if something essential is missing. Customer case: [describe the customer and signals]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0546. Build a step by step plan for a churn risk account

Act as a customer success lead. Break the churn risk account below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to identify the real risk drivers and the fastest path to regained value. Customer case: [describe the customer and signals]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0547. Prioritize a churn risk account with ruthless focus

Act as a customer success lead. Review the churn risk account below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to identify the real risk drivers and the fastest path to regained value. Customer case: [describe the customer and signals]. Options or tasks: [paste items]. Goal: [what matters most].

0548. Diagnose problems in a churn risk account

Act as a customer success lead. Diagnose why this churn risk account is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to identify the real risk drivers and the fastest path to regained value. Current situation: [describe the customer and signals]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0549. Draft a customer follow up note for a churn risk account

Act as a customer success lead. Draft a customer follow up note based on the churn risk account below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to identify the real risk drivers and the fastest path to regained value. Audience: [who will read this]. Customer case: [describe the customer and signals]. Tone: [confident, warm, direct, diplomatic, etc.].

0550. Convert a churn risk account into a customer health review checklist

Act as a customer success lead. Convert the churn risk account below into a reusable customer health review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to identify the real risk drivers and the fastest path to regained value. Customer case: [describe the customer and signals]. Context: [team, tool, workflow, or use case].

0551. Learn how to handle a churn risk account better

Act as a customer success lead. Teach me how to handle a churn risk account much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to identify the real risk drivers and the fastest path to regained value. Topic or problem: [describe the customer and signals]. Current level: [describe experience].

0552. Design an AI assisted workflow for a churn risk account

Act as a customer success lead and AI workflow architect. Design an AI assisted system for the churn risk account below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to identify the real risk drivers and the fastest path to regained value. Current process: [describe the customer and signals]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0553. Turn an onboarding journey into a success plan

Act as a customer success lead. Turn the onboarding journey below into a clear success plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to remove friction, clarify milestones, and shorten time to first value. Ask at most three questions only if something essential is missing. Customer case: [describe the current onboarding experience]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0554. Build a step by step plan for an onboarding journey

Act as a customer success lead. Break the onboarding journey below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to remove friction, clarify milestones, and shorten time to first value. Customer case: [describe the current onboarding experience]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0555. Prioritize an onboarding journey with ruthless focus

Act as a customer success lead. Review the onboarding journey below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to remove friction, clarify milestones, and shorten time to first value. Customer case: [describe the current onboarding experience]. Options or tasks: [paste items]. Goal: [what matters most].

0556. Diagnose problems in an onboarding journey

Act as a customer success lead. Diagnose why this onboarding journey is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to remove friction, clarify milestones, and shorten time to first value. Current situation: [describe the current onboarding experience]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0557. Draft a customer follow up note for an onboarding journey

Act as a customer success lead. Draft a customer follow up note based on the onboarding journey below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to remove friction, clarify milestones, and shorten time to first value. Audience: [who will read this]. Customer case: [describe the current onboarding experience]. Tone: [confident, warm, direct, diplomatic, etc.].

0558. Convert an onboarding journey into a customer health review checklist

Act as a customer success lead. Convert the onboarding journey below into a reusable customer health review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to remove friction, clarify milestones, and shorten time to first value. Customer case: [describe the current onboarding experience]. Context: [team, tool, workflow, or use case].

0559. Learn how to handle an onboarding journey better

Act as a customer success lead. Teach me how to handle an onboarding journey much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to remove friction, clarify milestones, and shorten time to first value. Topic or problem: [describe the current onboarding experience]. Current level: [describe experience].

0560. Design an AI assisted workflow for an onboarding journey

Act as a customer success lead and AI workflow architect. Design an AI assisted system for the onboarding journey below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to remove friction, clarify milestones, and shorten time to first value. Current process: [describe the current onboarding experience]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0561. Turn a support backlog into a success plan

Act as a customer success lead. Turn the support backlog below into a clear success plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to prioritize by customer impact, recurrence, and preventable causes. Ask at most three questions only if something essential is missing. Customer case: [describe the ticket themes or queue]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0562. Build a step by step plan for a support backlog

Act as a customer success lead. Break the support backlog below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to prioritize by customer impact, recurrence, and preventable causes. Customer case: [describe the ticket themes or queue]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0563. Prioritize a support backlog with ruthless focus

Act as a customer success lead. Review the support backlog below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to prioritize by customer impact, recurrence, and preventable causes. Customer case: [describe the ticket themes or queue]. Options or tasks: [paste items]. Goal: [what matters most].

0564. Diagnose problems in a support backlog

Act as a customer success lead. Diagnose why this support backlog is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to prioritize by customer impact, recurrence, and preventable causes. Current situation: [describe the ticket themes or queue]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0565. Draft a customer follow up note for a support backlog

Act as a customer success lead. Draft a customer follow up note based on the support backlog below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to prioritize by customer impact, recurrence, and preventable causes. Audience: [who will read this]. Customer case: [describe the ticket themes or queue]. Tone: [confident, warm, direct, diplomatic, etc.].

0566. Convert a support backlog into a customer health review checklist

Act as a customer success lead. Convert the support backlog below into a reusable customer health review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to prioritize by customer impact, recurrence, and preventable causes. Customer case: [describe the ticket themes or queue]. Context: [team, tool, workflow, or use case].

0567. Learn how to handle a support backlog better

Act as a customer success lead. Teach me how to handle a support backlog much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to prioritize by customer impact, recurrence, and preventable causes. Topic or problem: [describe the ticket themes or queue]. Current level: [describe experience].

0568. Design an AI assisted workflow for a support backlog

Act as a customer success lead and AI workflow architect. Design an AI assisted system for the support backlog below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to prioritize by customer impact, recurrence, and preventable causes. Current process: [describe the ticket themes or queue]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0569. Turn a QBR preparation into a success plan

Act as a customer success lead. Turn the QBR preparation below into a clear success plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to surface outcomes, proof points, open risks, and strategic next steps. Ask at most three questions only if something essential is missing. Customer case: [describe the customer and goals]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0570. Build a step by step plan for a QBR preparation

Act as a customer success lead. Break the QBR preparation below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to surface outcomes, proof points, open risks, and strategic next steps. Customer case: [describe the customer and goals]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0571. Prioritize a QBR preparation with ruthless focus

Act as a customer success lead. Review the QBR preparation below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to surface outcomes, proof points, open risks, and strategic next steps. Customer case: [describe the customer and goals]. Options or tasks: [paste items]. Goal: [what matters most].

0572. Diagnose problems in a QBR preparation

Act as a customer success lead. Diagnose why this QBR preparation is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to surface outcomes, proof points, open risks, and strategic next steps. Current situation: [describe the customer and goals]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0573. Draft a customer follow up note for a QBR preparation

Act as a customer success lead. Draft a customer follow up note based on the QBR preparation below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to surface outcomes, proof points, open risks, and strategic next steps. Audience: [who will read this]. Customer case: [describe the customer and goals]. Tone: [confident, warm, direct, diplomatic, etc.].

0574. Convert a QBR preparation into a customer health review checklist

Act as a customer success lead. Convert the QBR preparation below into a reusable customer health review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to surface outcomes, proof points, open risks, and strategic next steps. Customer case: [describe the customer and goals]. Context: [team, tool, workflow, or use case].

0575. Learn how to handle a QBR preparation better

Act as a customer success lead. Teach me how to handle a QBR preparation much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to surface outcomes, proof points, open risks, and strategic next steps. Topic or problem: [describe the customer and goals]. Current level: [describe experience].

0576. Design an AI assisted workflow for a QBR preparation

Act as a customer success lead and AI workflow architect. Design an AI assisted system for the QBR preparation below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to surface outcomes, proof points, open risks, and strategic next steps. Current process: [describe the customer and goals]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Data Analysis

Prompts 0577-0608

These prompts help you ask better analytical questions, find patterns faster, and translate data into decisions instead of just charts.

0577. Turn a messy dataset into an analysis plan

Act as a analytics lead. Turn the messy dataset below into a clear analysis plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to cleanly separate data quality issues from analytical questions. Ask at most three questions only if something essential is missing. Analysis input: [describe the data and what you want to learn]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0578. Build a step by step plan for a messy dataset

Act as a analytics lead. Break the messy dataset below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to cleanly separate data quality issues from analytical questions. Analysis input: [describe the data and what you want to learn]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0579. Prioritize a messy dataset with ruthless focus

Act as a analytics lead. Review the messy dataset below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to cleanly separate data quality issues from analytical questions. Analysis input: [describe the data and what you want to learn]. Options or tasks: [paste items]. Goal: [what matters most].

0580. Diagnose problems in a messy dataset

Act as a analytics lead. Diagnose why this messy dataset is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to cleanly separate data quality issues from analytical questions. Current situation: [describe the data and what you want to learn]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0581. Draft an insight memo for a messy dataset

Act as a analytics lead. Draft an insight memo based on the messy dataset below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to cleanly separate data quality issues from analytical questions. Audience: [who will read this]. Analysis input: [describe the data and what you want to learn]. Tone: [confident, warm, direct, diplomatic, etc.].

0582. Convert a messy dataset into an analysis checklist

Act as a analytics lead. Convert the messy dataset below into a reusable analysis checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to cleanly separate data quality issues from analytical questions. Analysis input: [describe the data and what you want to learn]. Context: [team, tool, workflow, or use case].

0583. Learn how to handle a messy dataset better

Act as a analytics lead. Teach me how to handle a messy dataset much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to cleanly separate data quality issues from analytical questions. Topic or problem: [describe the data and what you want to learn]. Current level: [describe experience].

0584. Design an AI assisted workflow for a messy dataset

Act as a analytics lead and AI workflow architect. Design an AI assisted system for the messy dataset below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to cleanly separate data quality issues from analytical questions. Current process: [describe the data and what you want to learn]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0585. Turn a KPI drop into an analysis plan

Act as a analytics lead. Turn the KPI drop below into a clear analysis plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to trace possible causes, missing segments, and misleading interpretations. Ask at most three questions only if something essential is missing. Analysis input: [describe the metric and what changed]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0586. Build a step by step plan for a KPI drop

Act as a analytics lead. Break the KPI drop below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to trace possible causes, missing segments, and misleading interpretations. Analysis input: [describe the metric and what changed]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0587. Prioritize a KPI drop with ruthless focus

Act as a analytics lead. Review the KPI drop below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to trace possible causes, missing segments, and misleading interpretations. Analysis input: [describe the metric and what changed]. Options or tasks: [paste items]. Goal: [what matters most].

0588. Diagnose problems in a KPI drop

Act as a analytics lead. Diagnose why this KPI drop is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to trace possible causes, missing segments, and misleading interpretations. Current situation: [describe the metric and what changed]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0589. Draft an insight memo for a KPI drop

Act as a analytics lead. Draft an insight memo based on the KPI drop below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to trace possible causes, missing segments, and misleading interpretations. Audience: [who will read this]. Analysis input: [describe the metric and what changed]. Tone: [confident, warm, direct, diplomatic, etc.].

0590. Convert a KPI drop into an analysis checklist

Act as a analytics lead. Convert the KPI drop below into a reusable analysis checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to trace possible causes, missing segments, and misleading interpretations. Analysis input: [describe the metric and what changed]. Context: [team, tool, workflow, or use case].

0591. Learn how to handle a KPI drop better

Act as a analytics lead. Teach me how to handle a KPI drop much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to trace possible causes, missing segments, and misleading interpretations. Topic or problem: [describe the metric and what changed]. Current level: [describe experience].

0592. Design an AI assisted workflow for a KPI drop

Act as a analytics lead and AI workflow architect. Design an AI assisted system for the KPI drop below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to trace possible causes, missing segments, and misleading interpretations. Current process: [describe the metric and what changed]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0593. Turn an experiment results into an analysis plan

Act as a analytics lead. Turn the experiment results below into a clear analysis plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to judge signal strength, practical significance, and follow up actions. Ask at most three questions only if something essential is missing. Analysis input: [describe the experiment and results]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0594. Build a step by step plan for an experiment results

Act as a analytics lead. Break the experiment results below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to judge signal strength, practical significance, and follow up actions. Analysis input: [describe the experiment and results]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0595. Prioritize an experiment results with ruthless focus

Act as a analytics lead. Review the experiment results below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to judge signal strength, practical significance, and follow up actions. Analysis input: [describe the experiment and results]. Options or tasks: [paste items]. Goal: [what matters most].

0596. Diagnose problems in an experiment results

Act as a analytics lead. Diagnose why this experiment results is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to judge signal strength, practical significance, and follow up actions. Current situation: [describe the experiment and results]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0597. Draft an insight memo for an experiment results

Act as a analytics lead. Draft an insight memo based on the experiment results below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to judge signal strength, practical significance, and follow up actions. Audience: [who will read this]. Analysis input: [describe the experiment and results]. Tone: [confident, warm, direct, diplomatic, etc.].

0598. Convert an experiment results into an analysis checklist

Act as a analytics lead. Convert the experiment results below into a reusable analysis checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to judge signal strength, practical significance, and follow up actions. Analysis input: [describe the experiment and results]. Context: [team, tool, workflow, or use case].

0599. Learn how to handle an experiment results better

Act as a analytics lead. Teach me how to handle an experiment results much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to judge signal strength, practical significance, and follow up actions. Topic or problem: [describe the experiment and results]. Current level: [describe experience].

0600. Design an AI assisted workflow for an experiment results

Act as a analytics lead and AI workflow architect. Design an AI assisted system for the experiment results below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to judge signal strength, practical significance, and follow up actions. Current process: [describe the experiment and results]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0601. Turn a performance trend into an analysis plan

Act as a analytics lead. Turn the performance trend below into a clear analysis plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to find the drivers, segments, and comparisons that matter most. Ask at most three questions only if something essential is missing. Analysis input: [describe the trend and timeframe]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0602. Build a step by step plan for a performance trend

Act as a analytics lead. Break the performance trend below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to find the drivers, segments, and comparisons that matter most. Analysis input: [describe the trend and timeframe]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0603. Prioritize a performance trend with ruthless focus

Act as a analytics lead. Review the performance trend below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to find the drivers, segments, and comparisons that matter most. Analysis input: [describe the trend and timeframe]. Options or tasks: [paste items]. Goal: [what matters most].

0604. Diagnose problems in a performance trend

Act as a analytics lead. Diagnose why this performance trend is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to find the drivers, segments, and comparisons that matter most. Current situation: [describe the trend and timeframe]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0605. Draft an insight memo for a performance trend

Act as a analytics lead. Draft an insight memo based on the performance trend below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to find the drivers, segments, and comparisons that matter most. Audience: [who will read this]. Analysis input: [describe the trend and timeframe]. Tone: [confident, warm, direct, diplomatic, etc.].

0606. Convert a performance trend into an analysis checklist

Act as a analytics lead. Convert the performance trend below into a reusable analysis checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to find the drivers, segments, and comparisons that matter most. Analysis input: [describe the trend and timeframe]. Context: [team, tool, workflow, or use case].

0607. Learn how to handle a performance trend better

Act as a analytics lead. Teach me how to handle a performance trend much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to find the drivers, segments, and comparisons that matter most. Topic or problem: [describe the trend and timeframe]. Current level: [describe experience].

0608. Design an AI assisted workflow for a performance trend

Act as a analytics lead and AI workflow architect. Design an AI assisted system for the performance trend below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to find the drivers, segments, and comparisons that matter most. Current process: [describe the trend and timeframe]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Reporting and Dashboards

Prompts 0609-0640

Use these prompts to make reporting clearer, more decision oriented, and easier for non experts to interpret correctly.

0609. Turn a monthly report into a reporting brief

Act as a business intelligence manager. Turn the monthly report below into a clear reporting brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to highlight what changed, why it changed, and what needs action. Ask at most three questions only if something essential is missing. Reporting input: [describe the report and audience]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0610. Build a step by step plan for a monthly report

Act as a business intelligence manager. Break the monthly report below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to highlight what changed, why it changed, and what needs action. Reporting input: [describe the report and audience]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0611. Prioritize a monthly report with ruthless focus

Act as a business intelligence manager. Review the monthly report below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to highlight what changed, why it changed, and what needs action. Reporting input: [describe the report and audience]. Options or tasks: [paste items]. Goal: [what matters most].

0612. Diagnose problems in a monthly report

Act as a business intelligence manager. Diagnose why this monthly report is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to highlight what changed, why it changed, and what needs action. Current situation: [describe the report and audience]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0613. Draft an executive summary for a monthly report

Act as a business intelligence manager. Draft an executive summary based on the monthly report below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to highlight what changed, why it changed, and what needs action. Audience: [who will read this]. Reporting input: [describe the report and audience]. Tone: [confident, warm, direct, diplomatic, etc.].

0614. Convert a monthly report into a dashboard design checklist

Act as a business intelligence manager. Convert the monthly report below into a reusable dashboard design checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to highlight what changed, why it changed, and what needs action. Reporting input: [describe the report and audience]. Context: [team, tool, workflow, or use case].

0615. Learn how to handle a monthly report better

Act as a business intelligence manager. Teach me how to handle a monthly report much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to highlight what changed, why it changed, and what needs action. Topic or problem: [describe the report and audience]. Current level: [describe experience].

0616. Design an AI assisted workflow for a monthly report

Act as a business intelligence manager and AI workflow architect. Design an AI assisted system for the monthly report below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to highlight what changed, why it changed, and what needs action. Current process: [describe the report and audience]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0617. Turn an executive dashboard into a reporting brief

Act as a business intelligence manager. Turn the executive dashboard below into a clear reporting brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to choose metrics and structure that support fast, accurate reading. Ask at most three questions only if something essential is missing. Reporting input: [describe the dashboard purpose]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0618. Build a step by step plan for an executive dashboard

Act as a business intelligence manager. Break the executive dashboard below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to choose metrics and structure that support fast, accurate reading. Reporting input: [describe the dashboard purpose]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0619. Prioritize an executive dashboard with ruthless focus

Act as a business intelligence manager. Review the executive dashboard below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to choose metrics and structure that support fast, accurate reading. Reporting input: [describe the dashboard purpose]. Options or tasks: [paste items]. Goal: [what matters most].

0620. Diagnose problems in an executive dashboard

Act as a business intelligence manager. Diagnose why this executive dashboard is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to choose metrics and structure that support fast, accurate reading. Current situation: [describe the dashboard purpose]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0621. Draft an executive summary for an executive dashboard

Act as a business intelligence manager. Draft an executive summary based on the executive dashboard below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to choose metrics and structure that support fast, accurate reading. Audience: [who will read this]. Reporting input: [describe the dashboard purpose]. Tone: [confident, warm, direct, diplomatic, etc.].

0622. Convert an executive dashboard into a dashboard design checklist

Act as a business intelligence manager. Convert the executive dashboard below into a reusable dashboard design checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to choose metrics and structure that support fast, accurate reading. Reporting input: [describe the dashboard purpose]. Context: [team, tool, workflow, or use case].

0623. Learn how to handle an executive dashboard better

Act as a business intelligence manager. Teach me how to handle an executive dashboard much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to choose metrics and structure that support fast, accurate reading. Topic or problem: [describe the dashboard purpose]. Current level: [describe experience].

0624. Design an AI assisted workflow for an executive dashboard

Act as a business intelligence manager and AI workflow architect. Design an AI assisted system for the executive dashboard below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to choose metrics and structure that support fast, accurate reading. Current process: [describe the dashboard purpose]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0625. Turn a metrics pack into a reporting brief

Act as a business intelligence manager. Turn the metrics pack below into a clear reporting brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to reduce clutter, define context, and make the implications obvious. Ask at most three questions only if something essential is missing. Reporting input: [describe the metrics and audience]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0626. Build a step by step plan for a metrics pack

Act as a business intelligence manager. Break the metrics pack below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to reduce clutter, define context, and make the implications obvious. Reporting input: [describe the metrics and audience]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0627. Prioritize a metrics pack with ruthless focus

Act as a business intelligence manager. Review the metrics pack below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to reduce clutter, define context, and make the implications obvious. Reporting input: [describe the metrics and audience]. Options or tasks: [paste items]. Goal: [what matters most].

0628. Diagnose problems in a metrics pack

Act as a business intelligence manager. Diagnose why this metrics pack is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to reduce clutter, define context, and make the implications obvious. Current situation: [describe the metrics and audience]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0629. Draft an executive summary for a metrics pack

Act as a business intelligence manager. Draft an executive summary based on the metrics pack below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to reduce clutter, define context, and make the implications obvious. Audience: [who will read this]. Reporting input: [describe the metrics and audience]. Tone: [confident, warm, direct, diplomatic, etc.].

0630. Convert a metrics pack into a dashboard design checklist

Act as a business intelligence manager. Convert the metrics pack below into a reusable dashboard design checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to reduce clutter, define context, and make the implications obvious. Reporting input: [describe the metrics and audience]. Context: [team, tool, workflow, or use case].

0631. Learn how to handle a metrics pack better

Act as a business intelligence manager. Teach me how to handle a metrics pack much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to reduce clutter, define context, and make the implications obvious. Topic or problem: [describe the metrics and audience]. Current level: [describe experience].

0632. Design an AI assisted workflow for a metrics pack

Act as a business intelligence manager and AI workflow architect. Design an AI assisted system for the metrics pack below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to reduce clutter, define context, and make the implications obvious. Current process: [describe the metrics and audience]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0633. Turn a board update into a reporting brief

Act as a business intelligence manager. Turn the board update below into a clear reporting brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to focus on strategic movement, risk, and confidence in the plan. Ask at most three questions only if something essential is missing. Reporting input: [describe the board context and key topics]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0634. Build a step by step plan for a board update

Act as a business intelligence manager. Break the board update below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to focus on strategic movement, risk, and confidence in the plan. Reporting input: [describe the board context and key topics]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0635. Prioritize a board update with ruthless focus

Act as a business intelligence manager. Review the board update below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to focus on strategic movement, risk, and confidence in the plan. Reporting input: [describe the board context and key topics]. Options or tasks: [paste items]. Goal: [what matters most].

0636. Diagnose problems in a board update

Act as a business intelligence manager. Diagnose why this board update is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to focus on strategic movement, risk, and confidence in the plan. Current situation: [describe the board context and key topics]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0637. Draft an executive summary for a board update

Act as a business intelligence manager. Draft an executive summary based on the board update below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to focus on strategic movement, risk, and confidence in the plan. Audience: [who will read this]. Reporting input: [describe the board context and key topics]. Tone: [confident, warm, direct, diplomatic, etc.].

0638. Convert a board update into a dashboard design checklist

Act as a business intelligence manager. Convert the board update below into a reusable dashboard design checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to focus on strategic movement, risk, and confidence in the plan. Reporting input: [describe the board context and key topics]. Context: [team, tool, workflow, or use case].

0639. Learn how to handle a board update better

Act as a business intelligence manager. Teach me how to handle a board update much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to focus on strategic movement, risk, and confidence in the plan. Topic or problem: [describe the board context and key topics]. Current level: [describe experience].

0640. Design an AI assisted workflow for a board update

Act as a business intelligence manager and AI workflow architect. Design an AI assisted system for the board update below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to focus on strategic movement, risk, and confidence in the plan. Current process: [describe the board context and key topics]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Spreadsheets and Structured Data

Prompts 0641-0672

These prompts help you clean up messy sheets, design trackers that stay useful, and reduce manual spreadsheet pain.

0641. Turn an unwieldy spreadsheet into a spreadsheet plan

Act as a spreadsheet analyst. Turn the unwieldy spreadsheet below into a clear spreadsheet plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to improve structure, formulas, tabs, and readability without overengineering. Ask at most three questions only if something essential is missing. Spreadsheet input: [describe the spreadsheet and pain points]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0642. Build a step by step plan for an unwieldy spreadsheet

Act as a spreadsheet analyst. Break the unwieldy spreadsheet below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to improve structure, formulas, tabs, and readability without overengineering. Spreadsheet input: [describe the spreadsheet and pain points]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0643. Prioritize an unwieldy spreadsheet with ruthless focus

Act as a spreadsheet analyst. Review the unwieldy spreadsheet below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to improve structure, formulas, tabs, and readability without overengineering. Spreadsheet input: [describe the spreadsheet and pain points]. Options or tasks: [paste items]. Goal: [what matters most].

0644. Diagnose problems in an unwieldy spreadsheet

Act as a spreadsheet analyst. Diagnose why this unwieldy spreadsheet is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to improve structure, formulas, tabs, and readability without overengineering. Current situation: [describe the spreadsheet and pain points]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0645. Draft a data handoff note for an unwieldy spreadsheet

Act as a spreadsheet analyst. Draft a data handoff note based on the unwieldy spreadsheet below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to improve structure, formulas, tabs, and readability without overengineering. Audience: [who will read this]. Spreadsheet input: [describe the spreadsheet and pain points]. Tone: [confident, warm, direct, diplomatic, etc.].

0646. Convert an unwieldy spreadsheet into a spreadsheet maintenance checklist

Act as a spreadsheet analyst. Convert the unwieldy spreadsheet below into a reusable spreadsheet maintenance checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to improve structure, formulas, tabs, and readability without overengineering. Spreadsheet input: [describe the spreadsheet and pain points]. Context: [team, tool, workflow, or use case].

0647. Learn how to handle an unwieldy spreadsheet better

Act as a spreadsheet analyst. Teach me how to handle an unwieldy spreadsheet much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to improve structure, formulas, tabs, and readability without overengineering. Topic or problem: [describe the spreadsheet and pain points]. Current level: [describe experience].

0648. Design an AI assisted workflow for an unwieldy spreadsheet

Act as a spreadsheet analyst and AI workflow architect. Design an AI assisted system for the unwieldy spreadsheet below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to improve structure, formulas, tabs, and readability without overengineering. Current process: [describe the spreadsheet and pain points]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0649. Turn a manual data cleanup into a spreadsheet plan

Act as a spreadsheet analyst. Turn the manual data cleanup below into a clear spreadsheet plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to create a repeatable cleanup logic instead of a one off patch. Ask at most three questions only if something essential is missing. Spreadsheet input: [describe the data issues]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0650. Build a step by step plan for a manual data cleanup

Act as a spreadsheet analyst. Break the manual data cleanup below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to create a repeatable cleanup logic instead of a one off patch. Spreadsheet input: [describe the data issues]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0651. Prioritize a manual data cleanup with ruthless focus

Act as a spreadsheet analyst. Review the manual data cleanup below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to create a repeatable cleanup logic instead of a one off patch. Spreadsheet input: [describe the data issues]. Options or tasks: [paste items]. Goal: [what matters most].

0652. Diagnose problems in a manual data cleanup

Act as a spreadsheet analyst. Diagnose why this manual data cleanup is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to create a repeatable cleanup logic instead of a one off patch. Current situation: [describe the data issues]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0653. Draft a data handoff note for a manual data cleanup

Act as a spreadsheet analyst. Draft a data handoff note based on the manual data cleanup below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to create a repeatable cleanup logic instead of a one off patch. Audience: [who will read this]. Spreadsheet input: [describe the data issues]. Tone: [confident, warm, direct, diplomatic, etc.].

0654. Convert a manual data cleanup into a spreadsheet maintenance checklist

Act as a spreadsheet analyst. Convert the manual data cleanup below into a reusable spreadsheet maintenance checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to create a repeatable cleanup logic instead of a one off patch. Spreadsheet input: [describe the data issues]. Context: [team, tool, workflow, or use case].

0655. Learn how to handle a manual data cleanup better

Act as a spreadsheet analyst. Teach me how to handle a manual data cleanup much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to create a repeatable cleanup logic instead of a one off patch. Topic or problem: [describe the data issues]. Current level: [describe experience].

0656. Design an AI assisted workflow for a manual data cleanup

Act as a spreadsheet analyst and AI workflow architect. Design an AI assisted system for the manual data cleanup below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to create a repeatable cleanup logic instead of a one off patch. Current process: [describe the data issues]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0657. Turn a tracker design into a spreadsheet plan

Act as a spreadsheet analyst. Turn the tracker design below into a clear spreadsheet plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to make the sheet intuitive, update friendly, and easy to audit. Ask at most three questions only if something essential is missing. Spreadsheet input: [describe what the tracker needs to do]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0658. Build a step by step plan for a tracker design

Act as a spreadsheet analyst. Break the tracker design below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to make the sheet intuitive, update friendly, and easy to audit. Spreadsheet input: [describe what the tracker needs to do]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0659. Prioritize a tracker design with ruthless focus

Act as a spreadsheet analyst. Review the tracker design below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to make the sheet intuitive, update friendly, and easy to audit. Spreadsheet input: [describe what the tracker needs to do]. Options or tasks: [paste items]. Goal: [what matters most].

0660. Diagnose problems in a tracker design

Act as a spreadsheet analyst. Diagnose why this tracker design is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to make the sheet intuitive, update friendly, and easy to audit. Current situation: [describe what the tracker needs to do]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0661. Draft a data handoff note for a tracker design

Act as a spreadsheet analyst. Draft a data handoff note based on the tracker design below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to make the sheet intuitive, update friendly, and easy to audit. Audience: [who will read this]. Spreadsheet input: [describe what the tracker needs to do]. Tone: [confident, warm, direct, diplomatic, etc.].

0662. Convert a tracker design into a spreadsheet maintenance checklist

Act as a spreadsheet analyst. Convert the tracker design below into a reusable spreadsheet maintenance checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to make the sheet intuitive, update friendly, and easy to audit. Spreadsheet input: [describe what the tracker needs to do]. Context: [team, tool, workflow, or use case].

0663. Learn how to handle a tracker design better

Act as a spreadsheet analyst. Teach me how to handle a tracker design much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to make the sheet intuitive, update friendly, and easy to audit. Topic or problem: [describe what the tracker needs to do]. Current level: [describe experience].

0664. Design an AI assisted workflow for a tracker design

Act as a spreadsheet analyst and AI workflow architect. Design an AI assisted system for the tracker design below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to make the sheet intuitive, update friendly, and easy to audit. Current process: [describe what the tracker needs to do]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0665. Turn a forecasting model into a spreadsheet plan

Act as a spreadsheet analyst. Turn the forecasting model below into a clear spreadsheet plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to separate assumptions, calculations, and outputs so the model stays trustworthy. Ask at most three questions only if something essential is missing. Spreadsheet input: [describe the model and inputs]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0666. Build a step by step plan for a forecasting model

Act as a spreadsheet analyst. Break the forecasting model below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to separate assumptions, calculations, and outputs so the model stays trustworthy. Spreadsheet input: [describe the model and inputs]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0667. Prioritize a forecasting model with ruthless focus

Act as a spreadsheet analyst. Review the forecasting model below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to separate assumptions, calculations, and outputs so the model stays trustworthy. Spreadsheet input: [describe the model and inputs]. Options or tasks: [paste items]. Goal: [what matters most].

0668. Diagnose problems in a forecasting model

Act as a spreadsheet analyst. Diagnose why this forecasting model is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to separate assumptions, calculations, and outputs so the model stays trustworthy. Current situation: [describe the model and inputs]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0669. Draft a data handoff note for a forecasting model

Act as a spreadsheet analyst. Draft a data handoff note based on the forecasting model below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to separate assumptions, calculations, and outputs so the model stays trustworthy. Audience: [who will read this]. Spreadsheet input: [describe the model and inputs]. Tone: [confident, warm, direct, diplomatic, etc.].

0670. Convert a forecasting model into a spreadsheet maintenance checklist

Act as a spreadsheet analyst. Convert the forecasting model below into a reusable spreadsheet maintenance checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to separate assumptions, calculations, and outputs so the model stays trustworthy. Spreadsheet input: [describe the model and inputs]. Context: [team, tool, workflow, or use case].

0671. Learn how to handle a forecasting model better

Act as a spreadsheet analyst. Teach me how to handle a forecasting model much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to separate assumptions, calculations, and outputs so the model stays trustworthy. Topic or problem: [describe the model and inputs]. Current level: [describe experience].

0672. Design an AI assisted workflow for a forecasting model

Act as a spreadsheet analyst and AI workflow architect. Design an AI assisted system for the forecasting model below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to separate assumptions, calculations, and outputs so the model stays trustworthy. Current process: [describe the model and inputs]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Coding and Development

Prompts 0673-0704

Use this section to plan features, structure technical work, and communicate engineering decisions with more clarity and less thrash.

0673. Turn a feature request into a technical execution brief

Act as a senior software engineer. Turn the feature request below into a clear technical execution brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to connect user need, technical approach, risks, and acceptance criteria. Ask at most three questions only if something essential is missing. Engineering input: [describe the feature request]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0674. Build a step by step plan for a feature request

Act as a senior software engineer. Break the feature request below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to connect user need, technical approach, risks, and acceptance criteria. Engineering input: [describe the feature request]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0675. Prioritize a feature request with ruthless focus

Act as a senior software engineer. Review the feature request below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to connect user need, technical approach, risks, and acceptance criteria. Engineering input: [describe the feature request]. Options or tasks: [paste items]. Goal: [what matters most].

0676. Diagnose problems in a feature request

Act as a senior software engineer. Diagnose why this feature request is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to connect user need, technical approach, risks, and acceptance criteria. Current situation: [describe the feature request]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0677. Draft an engineering update for a feature request

Act as a senior software engineer. Draft an engineering update based on the feature request below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to connect user need, technical approach, risks, and acceptance criteria. Audience: [who will read this]. Engineering input: [describe the feature request]. Tone: [confident, warm, direct, diplomatic, etc.].

0678. Convert a feature request into an implementation checklist

Act as a senior software engineer. Convert the feature request below into a reusable implementation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to connect user need, technical approach, risks, and acceptance criteria. Engineering input: [describe the feature request]. Context: [team, tool, workflow, or use case].

0679. Learn how to handle a feature request better

Act as a senior software engineer. Teach me how to handle a feature request much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to connect user need, technical approach, risks, and acceptance criteria. Topic or problem: [describe the feature request]. Current level: [describe experience].

0680. Design an AI assisted workflow for a feature request

Act as a senior software engineer and AI workflow architect. Design an AI assisted system for the feature request below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to connect user need, technical approach, risks, and acceptance criteria. Current process: [describe the feature request]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0681. Turn a codebase handoff into a technical execution brief

Act as a senior software engineer. Turn the codebase handoff below into a clear technical execution brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to surface architecture, conventions, dependencies, and risky knowledge gaps. Ask at most three questions only if something essential is missing. Engineering input: [describe the system and handoff context]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0682. Build a step by step plan for a codebase handoff

Act as a senior software engineer. Break the codebase handoff below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to surface architecture, conventions, dependencies, and risky knowledge gaps. Engineering input: [describe the system and handoff context]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0683. Prioritize a codebase handoff with ruthless focus

Act as a senior software engineer. Review the codebase handoff below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to surface architecture, conventions, dependencies, and risky knowledge gaps. Engineering input: [describe the system and handoff context]. Options or tasks: [paste items]. Goal: [what matters most].

0684. Diagnose problems in a codebase handoff

Act as a senior software engineer. Diagnose why this codebase handoff is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to surface architecture, conventions, dependencies, and risky knowledge gaps. Current situation: [describe the system and handoff context]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0685. Draft an engineering update for a codebase handoff

Act as a senior software engineer. Draft an engineering update based on the codebase handoff below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to surface architecture, conventions, dependencies, and risky knowledge gaps. Audience: [who will read this]. Engineering input: [describe the system and handoff context]. Tone: [confident, warm, direct, diplomatic, etc.].

0686. Convert a codebase handoff into an implementation checklist

Act as a senior software engineer. Convert the codebase handoff below into a reusable implementation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to surface architecture, conventions, dependencies, and risky knowledge gaps. Engineering input: [describe the system and handoff context]. Context: [team, tool, workflow, or use case].

0687. Learn how to handle a codebase handoff better

Act as a senior software engineer. Teach me how to handle a codebase handoff much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to surface architecture, conventions, dependencies, and risky knowledge gaps. Topic or problem: [describe the system and handoff context]. Current level: [describe experience].

0688. Design an AI assisted workflow for a codebase handoff

Act as a senior software engineer and AI workflow architect. Design an AI assisted system for the codebase handoff below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to surface architecture, conventions, dependencies, and risky knowledge gaps. Current process: [describe the system and handoff context]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0689. Turn an API integration into a technical execution brief

Act as a senior software engineer. Turn the API integration below into a clear technical execution brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to clarify contracts, failure modes, authentication, and test strategy. Ask at most three questions only if something essential is missing. Engineering input: [describe the integration and requirements]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0690. Build a step by step plan for an API integration

Act as a senior software engineer. Break the API integration below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to clarify contracts, failure modes, authentication, and test strategy. Engineering input: [describe the integration and requirements]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0691. Prioritize an API integration with ruthless focus

Act as a senior software engineer. Review the API integration below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to clarify contracts, failure modes, authentication, and test strategy. Engineering input: [describe the integration and requirements]. Options or tasks: [paste items]. Goal: [what matters most].

0692. Diagnose problems in an API integration

Act as a senior software engineer. Diagnose why this API integration is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to clarify contracts, failure modes, authentication, and test strategy. Current situation: [describe the integration and requirements]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0693. Draft an engineering update for an API integration

Act as a senior software engineer. Draft an engineering update based on the API integration below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to clarify contracts, failure modes, authentication, and test strategy. Audience: [who will read this]. Engineering input: [describe the integration and requirements]. Tone: [confident, warm, direct, diplomatic, etc.].

0694. Convert an API integration into an implementation checklist

Act as a senior software engineer. Convert the API integration below into a reusable implementation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to clarify contracts, failure modes, authentication, and test strategy. Engineering input: [describe the integration and requirements]. Context: [team, tool, workflow, or use case].

0695. Learn how to handle an API integration better

Act as a senior software engineer. Teach me how to handle an API integration much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to clarify contracts, failure modes, authentication, and test strategy. Topic or problem: [describe the integration and requirements]. Current level: [describe experience].

0696. Design an AI assisted workflow for an API integration

Act as a senior software engineer and AI workflow architect. Design an AI assisted system for the API integration below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to clarify contracts, failure modes, authentication, and test strategy. Current process: [describe the integration and requirements]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0697. Turn a legacy module improvement into a technical execution brief

Act as a senior software engineer. Turn the legacy module improvement below into a clear technical execution brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to balance cleanup, risk reduction, and delivery pressure realistically. Ask at most three questions only if something essential is missing. Engineering input: [describe the module and pain points]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0698. Build a step by step plan for a legacy module improvement

Act as a senior software engineer. Break the legacy module improvement below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to balance cleanup, risk reduction, and delivery pressure realistically. Engineering input: [describe the module and pain points]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0699. Prioritize a legacy module improvement with ruthless focus

Act as a senior software engineer. Review the legacy module improvement below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to balance cleanup, risk reduction, and delivery pressure realistically. Engineering input: [describe the module and pain points]. Options or tasks: [paste items]. Goal: [what matters most].

0700. Diagnose problems in a legacy module improvement

Act as a senior software engineer. Diagnose why this legacy module improvement is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to balance cleanup, risk reduction, and delivery pressure realistically. Current situation: [describe the module and pain points]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0701. Draft an engineering update for a legacy module improvement

Act as a senior software engineer. Draft an engineering update based on the legacy module improvement below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to balance cleanup, risk reduction, and delivery pressure realistically. Audience: [who will read this]. Engineering input: [describe the module and pain points]. Tone: [confident, warm, direct, diplomatic, etc.].

0702. Convert a legacy module improvement into an implementation checklist

Act as a senior software engineer. Convert the legacy module improvement below into a reusable implementation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to balance cleanup, risk reduction, and delivery pressure realistically. Engineering input: [describe the module and pain points]. Context: [team, tool, workflow, or use case].

0703. Learn how to handle a legacy module improvement better

Act as a senior software engineer. Teach me how to handle a legacy module improvement much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to balance cleanup, risk reduction, and delivery pressure realistically. Topic or problem: [describe the module and pain points]. Current level: [describe experience].

0704. Design an AI assisted workflow for a legacy module improvement

Act as a senior software engineer and AI workflow architect. Design an AI assisted system for the legacy module improvement below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to balance cleanup, risk reduction, and delivery pressure realistically. Current process: [describe the module and pain points]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Debugging and QA

Prompts 0705-0736

These prompts help you reproduce issues, isolate root causes, and build a more systematic approach to quality and release confidence.

0705. Turn a recurring bug into a debug plan

Act as a software QA lead. Turn the recurring bug below into a clear debug plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to move from symptom chasing to a reproducible root cause hunt. Ask at most three questions only if something essential is missing. Bug or quality issue: [describe the bug and context]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0706. Build a step by step plan for a recurring bug

Act as a software QA lead. Break the recurring bug below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to move from symptom chasing to a reproducible root cause hunt. Bug or quality issue: [describe the bug and context]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0707. Prioritize a recurring bug with ruthless focus

Act as a software QA lead. Review the recurring bug below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to move from symptom chasing to a reproducible root cause hunt. Bug or quality issue: [describe the bug and context]. Options or tasks: [paste items]. Goal: [what matters most].

0708. Diagnose problems in a recurring bug

Act as a software QA lead. Diagnose why this recurring bug is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to move from symptom chasing to a reproducible root cause hunt. Current situation: [describe the bug and context]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0709. Draft a bug update note for a recurring bug

Act as a software QA lead. Draft a bug update note based on the recurring bug below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to move from symptom chasing to a reproducible root cause hunt. Audience: [who will read this]. Bug or quality issue: [describe the bug and context]. Tone: [confident, warm, direct, diplomatic, etc.].

0710. Convert a recurring bug into a QA checklist

Act as a software QA lead. Convert the recurring bug below into a reusable QA checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to move from symptom chasing to a reproducible root cause hunt. Bug or quality issue: [describe the bug and context]. Context: [team, tool, workflow, or use case].

0711. Learn how to handle a recurring bug better

Act as a software QA lead. Teach me how to handle a recurring bug much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to move from symptom chasing to a reproducible root cause hunt. Topic or problem: [describe the bug and context]. Current level: [describe experience].

0712. Design an AI assisted workflow for a recurring bug

Act as a software QA lead and AI workflow architect. Design an AI assisted system for the recurring bug below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to move from symptom chasing to a reproducible root cause hunt. Current process: [describe the bug and context]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0713. Turn a failing release into a debug plan

Act as a software QA lead. Turn the failing release below into a clear debug plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to triage risk fast and separate blockers from noise. Ask at most three questions only if something essential is missing. Bug or quality issue: [describe what is failing and where]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0714. Build a step by step plan for a failing release

Act as a software QA lead. Break the failing release below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to triage risk fast and separate blockers from noise. Bug or quality issue: [describe what is failing and where]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0715. Prioritize a failing release with ruthless focus

Act as a software QA lead. Review the failing release below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to triage risk fast and separate blockers from noise. Bug or quality issue: [describe what is failing and where]. Options or tasks: [paste items]. Goal: [what matters most].

0716. Diagnose problems in a failing release

Act as a software QA lead. Diagnose why this failing release is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to triage risk fast and separate blockers from noise. Current situation: [describe what is failing and where]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0717. Draft a bug update note for a failing release

Act as a software QA lead. Draft a bug update note based on the failing release below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to triage risk fast and separate blockers from noise. Audience: [who will read this]. Bug or quality issue: [describe what is failing and where]. Tone: [confident, warm, direct, diplomatic, etc.].

0718. Convert a failing release into a QA checklist

Act as a software QA lead. Convert the failing release below into a reusable QA checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to triage risk fast and separate blockers from noise. Bug or quality issue: [describe what is failing and where]. Context: [team, tool, workflow, or use case].

0719. Learn how to handle a failing release better

Act as a software QA lead. Teach me how to handle a failing release much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to triage risk fast and separate blockers from noise. Topic or problem: [describe what is failing and where]. Current level: [describe experience].

0720. Design an AI assisted workflow for a failing release

Act as a software QA lead and AI workflow architect. Design an AI assisted system for the failing release below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to triage risk fast and separate blockers from noise. Current process: [describe what is failing and where]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0721. Turn a flaky test suite into a debug plan

Act as a software QA lead. Turn the flaky test suite below into a clear debug plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to identify instability patterns, environment factors, and trust rebuilding steps. Ask at most three questions only if something essential is missing. Bug or quality issue: [describe the tests and behavior]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0722. Build a step by step plan for a flaky test suite

Act as a software QA lead. Break the flaky test suite below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to identify instability patterns, environment factors, and trust rebuilding steps. Bug or quality issue: [describe the tests and behavior]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0723. Prioritize a flaky test suite with ruthless focus

Act as a software QA lead. Review the flaky test suite below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to identify instability patterns, environment factors, and trust rebuilding steps. Bug or quality issue: [describe the tests and behavior]. Options or tasks: [paste items]. Goal: [what matters most].

0724. Diagnose problems in a flaky test suite

Act as a software QA lead. Diagnose why this flaky test suite is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to identify instability patterns, environment factors, and trust rebuilding steps. Current situation: [describe the tests and behavior]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0725. Draft a bug update note for a flaky test suite

Act as a software QA lead. Draft a bug update note based on the flaky test suite below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to identify instability patterns, environment factors, and trust rebuilding steps. Audience: [who will read this]. Bug or quality issue: [describe the tests and behavior]. Tone: [confident, warm, direct, diplomatic, etc.].

0726. Convert a flaky test suite into a QA checklist

Act as a software QA lead. Convert the flaky test suite below into a reusable QA checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to identify instability patterns, environment factors, and trust rebuilding steps. Bug or quality issue: [describe the tests and behavior]. Context: [team, tool, workflow, or use case].

0727. Learn how to handle a flaky test suite better

Act as a software QA lead. Teach me how to handle a flaky test suite much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to identify instability patterns, environment factors, and trust rebuilding steps. Topic or problem: [describe the tests and behavior]. Current level: [describe experience].

0728. Design an AI assisted workflow for a flaky test suite

Act as a software QA lead and AI workflow architect. Design an AI assisted system for the flaky test suite below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to identify instability patterns, environment factors, and trust rebuilding steps. Current process: [describe the tests and behavior]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0729. Turn an unclear bug report into a debug plan

Act as a software QA lead. Turn the unclear bug report below into a clear debug plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to rewrite the report so reproduction, impact, and likely cause become obvious. Ask at most three questions only if something essential is missing. Bug or quality issue: [paste the bug report]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0730. Build a step by step plan for an unclear bug report

Act as a software QA lead. Break the unclear bug report below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to rewrite the report so reproduction, impact, and likely cause become obvious. Bug or quality issue: [paste the bug report]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0731. Prioritize an unclear bug report with ruthless focus

Act as a software QA lead. Review the unclear bug report below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to rewrite the report so reproduction, impact, and likely cause become obvious. Bug or quality issue: [paste the bug report]. Options or tasks: [paste items]. Goal: [what matters most].

0732. Diagnose problems in an unclear bug report

Act as a software QA lead. Diagnose why this unclear bug report is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to rewrite the report so reproduction, impact, and likely cause become obvious. Current situation: [paste the bug report]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0733. Draft a bug update note for an unclear bug report

Act as a software QA lead. Draft a bug update note based on the unclear bug report below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to rewrite the report so reproduction, impact, and likely cause become obvious. Audience: [who will read this]. Bug or quality issue: [paste the bug report]. Tone: [confident, warm, direct, diplomatic, etc.].

0734. Convert an unclear bug report into a QA checklist

Act as a software QA lead. Convert the unclear bug report below into a reusable QA checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to rewrite the report so reproduction, impact, and likely cause become obvious. Bug or quality issue: [paste the bug report]. Context: [team, tool, workflow, or use case].

0735. Learn how to handle an unclear bug report better

Act as a software QA lead. Teach me how to handle an unclear bug report much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to rewrite the report so reproduction, impact, and likely cause become obvious. Topic or problem: [paste the bug report]. Current level: [describe experience].

0736. Design an AI assisted workflow for an unclear bug report

Act as a software QA lead and AI workflow architect. Design an AI assisted system for the unclear bug report below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to rewrite the report so reproduction, impact, and likely cause become obvious. Current process: [paste the bug report]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Automation and AI Workflows

Prompts 0737-0768

Use this section to redesign repeated work so AI helps in the right places and human review stays where judgment matters.

0737. Turn a repetitive manual workflow into a workflow blueprint

Act as a automation architect. Turn the repetitive manual workflow below into a clear workflow blueprint. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to find the smallest useful automation before chasing a full rebuild. Ask at most three questions only if something essential is missing. Workflow: [describe the workflow]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0738. Build a step by step plan for a repetitive manual workflow

Act as a automation architect. Break the repetitive manual workflow below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to find the smallest useful automation before chasing a full rebuild. Workflow: [describe the workflow]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0739. Prioritize a repetitive manual workflow with ruthless focus

Act as a automation architect. Review the repetitive manual workflow below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to find the smallest useful automation before chasing a full rebuild. Workflow: [describe the workflow]. Options or tasks: [paste items]. Goal: [what matters most].

0740. Diagnose problems in a repetitive manual workflow

Act as a automation architect. Diagnose why this repetitive manual workflow is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to find the smallest useful automation before chasing a full rebuild. Current situation: [describe the workflow]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0741. Draft an automation proposal for a repetitive manual workflow

Act as a automation architect. Draft an automation proposal based on the repetitive manual workflow below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to find the smallest useful automation before chasing a full rebuild. Audience: [who will read this]. Workflow: [describe the workflow]. Tone: [confident, warm, direct, diplomatic, etc.].

0742. Convert a repetitive manual workflow into an automation review checklist

Act as a automation architect. Convert the repetitive manual workflow below into a reusable automation review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to find the smallest useful automation before chasing a full rebuild. Workflow: [describe the workflow]. Context: [team, tool, workflow, or use case].

0743. Learn how to handle a repetitive manual workflow better

Act as a automation architect. Teach me how to handle a repetitive manual workflow much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to find the smallest useful automation before chasing a full rebuild. Topic or problem: [describe the workflow]. Current level: [describe experience].

0744. Design an AI assisted workflow for a repetitive manual workflow

Act as a automation architect and AI workflow architect. Design an AI assisted system for the repetitive manual workflow below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to find the smallest useful automation before chasing a full rebuild. Current process: [describe the workflow]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0745. Turn a document processing flow into a workflow blueprint

Act as a automation architect. Turn the document processing flow below into a clear workflow blueprint. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to separate extraction, reasoning, validation, and exception handling. Ask at most three questions only if something essential is missing. Workflow: [describe the inputs and outputs]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0746. Build a step by step plan for a document processing flow

Act as a automation architect. Break the document processing flow below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to separate extraction, reasoning, validation, and exception handling. Workflow: [describe the inputs and outputs]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0747. Prioritize a document processing flow with ruthless focus

Act as a automation architect. Review the document processing flow below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to separate extraction, reasoning, validation, and exception handling. Workflow: [describe the inputs and outputs]. Options or tasks: [paste items]. Goal: [what matters most].

0748. Diagnose problems in a document processing flow

Act as a automation architect. Diagnose why this document processing flow is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to separate extraction, reasoning, validation, and exception handling. Current situation: [describe the inputs and outputs]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0749. Draft an automation proposal for a document processing flow

Act as a automation architect. Draft an automation proposal based on the document processing flow below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to separate extraction, reasoning, validation, and exception handling. Audience: [who will read this]. Workflow: [describe the inputs and outputs]. Tone: [confident, warm, direct, diplomatic, etc.].

0750. Convert a document processing flow into an automation review checklist

Act as a automation architect. Convert the document processing flow below into a reusable automation review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to separate extraction, reasoning, validation, and exception handling. Workflow: [describe the inputs and outputs]. Context: [team, tool, workflow, or use case].

0751. Learn how to handle a document processing flow better

Act as a automation architect. Teach me how to handle a document processing flow much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to separate extraction, reasoning, validation, and exception handling. Topic or problem: [describe the inputs and outputs]. Current level: [describe experience].

0752. Design an AI assisted workflow for a document processing flow

Act as a automation architect and AI workflow architect. Design an AI assisted system for the document processing flow below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to separate extraction, reasoning, validation, and exception handling. Current process: [describe the inputs and outputs]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0753. Turn a lead qualification system into a workflow blueprint

Act as a automation architect. Turn the lead qualification system below into a clear workflow blueprint. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to balance speed, accuracy, routing logic, and review thresholds. Ask at most three questions only if something essential is missing. Workflow: [describe the current process and goals]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0754. Build a step by step plan for a lead qualification system

Act as a automation architect. Break the lead qualification system below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to balance speed, accuracy, routing logic, and review thresholds. Workflow: [describe the current process and goals]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0755. Prioritize a lead qualification system with ruthless focus

Act as a automation architect. Review the lead qualification system below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to balance speed, accuracy, routing logic, and review thresholds. Workflow: [describe the current process and goals]. Options or tasks: [paste items]. Goal: [what matters most].

0756. Diagnose problems in a lead qualification system

Act as a automation architect. Diagnose why this lead qualification system is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to balance speed, accuracy, routing logic, and review thresholds. Current situation: [describe the current process and goals]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0757. Draft an automation proposal for a lead qualification system

Act as a automation architect. Draft an automation proposal based on the lead qualification system below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to balance speed, accuracy, routing logic, and review thresholds. Audience: [who will read this]. Workflow: [describe the current process and goals]. Tone: [confident, warm, direct, diplomatic, etc.].

0758. Convert a lead qualification system into an automation review checklist

Act as a automation architect. Convert the lead qualification system below into a reusable automation review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to balance speed, accuracy, routing logic, and review thresholds. Workflow: [describe the current process and goals]. Context: [team, tool, workflow, or use case].

0759. Learn how to handle a lead qualification system better

Act as a automation architect. Teach me how to handle a lead qualification system much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to balance speed, accuracy, routing logic, and review thresholds. Topic or problem: [describe the current process and goals]. Current level: [describe experience].

0760. Design an AI assisted workflow for a lead qualification system

Act as a automation architect and AI workflow architect. Design an AI assisted system for the lead qualification system below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to balance speed, accuracy, routing logic, and review thresholds. Current process: [describe the current process and goals]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0761. Turn a personal productivity pipeline into a workflow blueprint

Act as a automation architect. Turn the personal productivity pipeline below into a clear workflow blueprint. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to create automation that saves real time without adding maintenance burden. Ask at most three questions only if something essential is missing. Workflow: [describe the personal workflow]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0762. Build a step by step plan for a personal productivity pipeline

Act as a automation architect. Break the personal productivity pipeline below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to create automation that saves real time without adding maintenance burden. Workflow: [describe the personal workflow]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0763. Prioritize a personal productivity pipeline with ruthless focus

Act as a automation architect. Review the personal productivity pipeline below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to create automation that saves real time without adding maintenance burden. Workflow: [describe the personal workflow]. Options or tasks: [paste items]. Goal: [what matters most].

0764. Diagnose problems in a personal productivity pipeline

Act as a automation architect. Diagnose why this personal productivity pipeline is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to create automation that saves real time without adding maintenance burden. Current situation: [describe the personal workflow]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0765. Draft an automation proposal for a personal productivity pipeline

Act as a automation architect. Draft an automation proposal based on the personal productivity pipeline below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to create automation that saves real time without adding maintenance burden. Audience: [who will read this]. Workflow: [describe the personal workflow]. Tone: [confident, warm, direct, diplomatic, etc.].

0766. Convert a personal productivity pipeline into an automation review checklist

Act as a automation architect. Convert the personal productivity pipeline below into a reusable automation review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to create automation that saves real time without adding maintenance burden. Workflow: [describe the personal workflow]. Context: [team, tool, workflow, or use case].

0767. Learn how to handle a personal productivity pipeline better

Act as a automation architect. Teach me how to handle a personal productivity pipeline much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to create automation that saves real time without adding maintenance burden. Topic or problem: [describe the personal workflow]. Current level: [describe experience].

0768. Design an AI assisted workflow for a personal productivity pipeline

Act as a automation architect and AI workflow architect. Design an AI assisted system for the personal productivity pipeline below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to create automation that saves real time without adding maintenance burden. Current process: [describe the personal workflow]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Design and UX

Prompts 0769-0800

These prompts help you improve flows, sharpen interface decisions, and turn feedback into more usable product experiences.

0769. Turn a new interface concept into an UX brief

Act as a UX designer. Turn the new interface concept below into a clear UX brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to connect layout decisions to user goals, context, and key actions. Ask at most three questions only if something essential is missing. Design input: [describe the concept]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0770. Build a step by step plan for a new interface concept

Act as a UX designer. Break the new interface concept below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to connect layout decisions to user goals, context, and key actions. Design input: [describe the concept]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0771. Prioritize a new interface concept with ruthless focus

Act as a UX designer. Review the new interface concept below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to connect layout decisions to user goals, context, and key actions. Design input: [describe the concept]. Options or tasks: [paste items]. Goal: [what matters most].

0772. Diagnose problems in a new interface concept

Act as a UX designer. Diagnose why this new interface concept is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to connect layout decisions to user goals, context, and key actions. Current situation: [describe the concept]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0773. Draft a design rationale note for a new interface concept

Act as a UX designer. Draft a design rationale note based on the new interface concept below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to connect layout decisions to user goals, context, and key actions. Audience: [who will read this]. Design input: [describe the concept]. Tone: [confident, warm, direct, diplomatic, etc.].

0774. Convert a new interface concept into a design review checklist

Act as a UX designer. Convert the new interface concept below into a reusable design review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to connect layout decisions to user goals, context, and key actions. Design input: [describe the concept]. Context: [team, tool, workflow, or use case].

0775. Learn how to handle a new interface concept better

Act as a UX designer. Teach me how to handle a new interface concept much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to connect layout decisions to user goals, context, and key actions. Topic or problem: [describe the concept]. Current level: [describe experience].

0776. Design an AI assisted workflow for a new interface concept

Act as a UX designer and AI workflow architect. Design an AI assisted system for the new interface concept below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to connect layout decisions to user goals, context, and key actions. Current process: [describe the concept]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0777. Turn a confusing user flow into an UX brief

Act as a UX designer. Turn the confusing user flow below into a clear UX brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to remove friction, ambiguity, and unnecessary decisions. Ask at most three questions only if something essential is missing. Design input: [describe the flow and where users struggle]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0778. Build a step by step plan for a confusing user flow

Act as a UX designer. Break the confusing user flow below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to remove friction, ambiguity, and unnecessary decisions. Design input: [describe the flow and where users struggle]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0779. Prioritize a confusing user flow with ruthless focus

Act as a UX designer. Review the confusing user flow below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to remove friction, ambiguity, and unnecessary decisions. Design input: [describe the flow and where users struggle]. Options or tasks: [paste items]. Goal: [what matters most].

0780. Diagnose problems in a confusing user flow

Act as a UX designer. Diagnose why this confusing user flow is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to remove friction, ambiguity, and unnecessary decisions. Current situation: [describe the flow and where users struggle]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0781. Draft a design rationale note for a confusing user flow

Act as a UX designer. Draft a design rationale note based on the confusing user flow below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to remove friction, ambiguity, and unnecessary decisions. Audience: [who will read this]. Design input: [describe the flow and where users struggle]. Tone: [confident, warm, direct, diplomatic, etc.].

0782. Convert a confusing user flow into a design review checklist

Act as a UX designer. Convert the confusing user flow below into a reusable design review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to remove friction, ambiguity, and unnecessary decisions. Design input: [describe the flow and where users struggle]. Context: [team, tool, workflow, or use case].

0783. Learn how to handle a confusing user flow better

Act as a UX designer. Teach me how to handle a confusing user flow much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to remove friction, ambiguity, and unnecessary decisions. Topic or problem: [describe the flow and where users struggle]. Current level: [describe experience].

0784. Design an AI assisted workflow for a confusing user flow

Act as a UX designer and AI workflow architect. Design an AI assisted system for the confusing user flow below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to remove friction, ambiguity, and unnecessary decisions. Current process: [describe the flow and where users struggle]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0785. Turn a design critique into an UX brief

Act as a UX designer. Turn the design critique below into a clear UX brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to separate cosmetic opinions from usability, hierarchy, and clarity issues. Ask at most three questions only if something essential is missing. Design input: [describe the design or paste feedback]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0786. Build a step by step plan for a design critique

Act as a UX designer. Break the design critique below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to separate cosmetic opinions from usability, hierarchy, and clarity issues. Design input: [describe the design or paste feedback]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0787. Prioritize a design critique with ruthless focus

Act as a UX designer. Review the design critique below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to separate cosmetic opinions from usability, hierarchy, and clarity issues. Design input: [describe the design or paste feedback]. Options or tasks: [paste items]. Goal: [what matters most].

0788. Diagnose problems in a design critique

Act as a UX designer. Diagnose why this design critique is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to separate cosmetic opinions from usability, hierarchy, and clarity issues. Current situation: [describe the design or paste feedback]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0789. Draft a design rationale note for a design critique

Act as a UX designer. Draft a design rationale note based on the design critique below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to separate cosmetic opinions from usability, hierarchy, and clarity issues. Audience: [who will read this]. Design input: [describe the design or paste feedback]. Tone: [confident, warm, direct, diplomatic, etc.].

0790. Convert a design critique into a design review checklist

Act as a UX designer. Convert the design critique below into a reusable design review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to separate cosmetic opinions from usability, hierarchy, and clarity issues. Design input: [describe the design or paste feedback]. Context: [team, tool, workflow, or use case].

0791. Learn how to handle a design critique better

Act as a UX designer. Teach me how to handle a design critique much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to separate cosmetic opinions from usability, hierarchy, and clarity issues. Topic or problem: [describe the design or paste feedback]. Current level: [describe experience].

0792. Design an AI assisted workflow for a design critique

Act as a UX designer and AI workflow architect. Design an AI assisted system for the design critique below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to separate cosmetic opinions from usability, hierarchy, and clarity issues. Current process: [describe the design or paste feedback]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0793. Turn a prototype handoff into an UX brief

Act as a UX designer. Turn the prototype handoff below into a clear UX brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to make intent, edge cases, and implementation notes easier to follow. Ask at most three questions only if something essential is missing. Design input: [describe the prototype and team context]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0794. Build a step by step plan for a prototype handoff

Act as a UX designer. Break the prototype handoff below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to make intent, edge cases, and implementation notes easier to follow. Design input: [describe the prototype and team context]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0795. Prioritize a prototype handoff with ruthless focus

Act as a UX designer. Review the prototype handoff below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to make intent, edge cases, and implementation notes easier to follow. Design input: [describe the prototype and team context]. Options or tasks: [paste items]. Goal: [what matters most].

0796. Diagnose problems in a prototype handoff

Act as a UX designer. Diagnose why this prototype handoff is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to make intent, edge cases, and implementation notes easier to follow. Current situation: [describe the prototype and team context]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0797. Draft a design rationale note for a prototype handoff

Act as a UX designer. Draft a design rationale note based on the prototype handoff below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to make intent, edge cases, and implementation notes easier to follow. Audience: [who will read this]. Design input: [describe the prototype and team context]. Tone: [confident, warm, direct, diplomatic, etc.].

0798. Convert a prototype handoff into a design review checklist

Act as a UX designer. Convert the prototype handoff below into a reusable design review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to make intent, edge cases, and implementation notes easier to follow. Design input: [describe the prototype and team context]. Context: [team, tool, workflow, or use case].

0799. Learn how to handle a prototype handoff better

Act as a UX designer. Teach me how to handle a prototype handoff much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to make intent, edge cases, and implementation notes easier to follow. Topic or problem: [describe the prototype and team context]. Current level: [describe experience].

0800. Design an AI assisted workflow for a prototype handoff

Act as a UX designer and AI workflow architect. Design an AI assisted system for the prototype handoff below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to make intent, edge cases, and implementation notes easier to follow. Current process: [describe the prototype and team context]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Brainstorming and Creativity

Prompts 0801-0832

Use these prompts to generate more ideas, get unstuck faster, and push past obvious answers into more interesting territory.

0801. Turn a campaign idea jam into an idea brief

Act as a creative director. Turn the campaign idea jam below into a clear idea brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to generate variety first, then narrow toward ideas with strategic potential. Ask at most three questions only if something essential is missing. Creative challenge: [describe the campaign challenge]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0802. Build a step by step plan for a campaign idea jam

Act as a creative director. Break the campaign idea jam below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to generate variety first, then narrow toward ideas with strategic potential. Creative challenge: [describe the campaign challenge]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0803. Prioritize a campaign idea jam with ruthless focus

Act as a creative director. Review the campaign idea jam below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to generate variety first, then narrow toward ideas with strategic potential. Creative challenge: [describe the campaign challenge]. Options or tasks: [paste items]. Goal: [what matters most].

0804. Diagnose problems in a campaign idea jam

Act as a creative director. Diagnose why this campaign idea jam is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to generate variety first, then narrow toward ideas with strategic potential. Current situation: [describe the campaign challenge]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0805. Draft a creative concept note for a campaign idea jam

Act as a creative director. Draft a creative concept note based on the campaign idea jam below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to generate variety first, then narrow toward ideas with strategic potential. Audience: [who will read this]. Creative challenge: [describe the campaign challenge]. Tone: [confident, warm, direct, diplomatic, etc.].

0806. Convert a campaign idea jam into an idea generation routine

Act as a creative director. Convert the campaign idea jam below into a reusable idea generation routine. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to generate variety first, then narrow toward ideas with strategic potential. Creative challenge: [describe the campaign challenge]. Context: [team, tool, workflow, or use case].

0807. Learn how to handle a campaign idea jam better

Act as a creative director. Teach me how to handle a campaign idea jam much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to generate variety first, then narrow toward ideas with strategic potential. Topic or problem: [describe the campaign challenge]. Current level: [describe experience].

0808. Design an AI assisted workflow for a campaign idea jam

Act as a creative director and AI workflow architect. Design an AI assisted system for the campaign idea jam below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to generate variety first, then narrow toward ideas with strategic potential. Current process: [describe the campaign challenge]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0809. Turn a product concept jam into an idea brief

Act as a creative director. Turn the product concept jam below into a clear idea brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to mix user needs, constraints, and surprising angles without losing practicality. Ask at most three questions only if something essential is missing. Creative challenge: [describe the problem space]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0810. Build a step by step plan for a product concept jam

Act as a creative director. Break the product concept jam below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to mix user needs, constraints, and surprising angles without losing practicality. Creative challenge: [describe the problem space]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0811. Prioritize a product concept jam with ruthless focus

Act as a creative director. Review the product concept jam below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to mix user needs, constraints, and surprising angles without losing practicality. Creative challenge: [describe the problem space]. Options or tasks: [paste items]. Goal: [what matters most].

0812. Diagnose problems in a product concept jam

Act as a creative director. Diagnose why this product concept jam is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to mix user needs, constraints, and surprising angles without losing practicality. Current situation: [describe the problem space]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0813. Draft a creative concept note for a product concept jam

Act as a creative director. Draft a creative concept note based on the product concept jam below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to mix user needs, constraints, and surprising angles without losing practicality. Audience: [who will read this]. Creative challenge: [describe the problem space]. Tone: [confident, warm, direct, diplomatic, etc.].

0814. Convert a product concept jam into an idea generation routine

Act as a creative director. Convert the product concept jam below into a reusable idea generation routine. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to mix user needs, constraints, and surprising angles without losing practicality. Creative challenge: [describe the problem space]. Context: [team, tool, workflow, or use case].

0815. Learn how to handle a product concept jam better

Act as a creative director. Teach me how to handle a product concept jam much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to mix user needs, constraints, and surprising angles without losing practicality. Topic or problem: [describe the problem space]. Current level: [describe experience].

0816. Design an AI assisted workflow for a product concept jam

Act as a creative director and AI workflow architect. Design an AI assisted system for the product concept jam below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to mix user needs, constraints, and surprising angles without losing practicality. Current process: [describe the problem space]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0817. Turn a naming exercise into an idea brief

Act as a creative director. Turn the naming exercise below into a clear idea brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to create names with range, memorability, and the right emotional fit. Ask at most three questions only if something essential is missing. Creative challenge: [describe what needs a name]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0818. Build a step by step plan for a naming exercise

Act as a creative director. Break the naming exercise below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to create names with range, memorability, and the right emotional fit. Creative challenge: [describe what needs a name]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0819. Prioritize a naming exercise with ruthless focus

Act as a creative director. Review the naming exercise below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to create names with range, memorability, and the right emotional fit. Creative challenge: [describe what needs a name]. Options or tasks: [paste items]. Goal: [what matters most].

0820. Diagnose problems in a naming exercise

Act as a creative director. Diagnose why this naming exercise is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to create names with range, memorability, and the right emotional fit. Current situation: [describe what needs a name]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0821. Draft a creative concept note for a naming exercise

Act as a creative director. Draft a creative concept note based on the naming exercise below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to create names with range, memorability, and the right emotional fit. Audience: [who will read this]. Creative challenge: [describe what needs a name]. Tone: [confident, warm, direct, diplomatic, etc.].

0822. Convert a naming exercise into an idea generation routine

Act as a creative director. Convert the naming exercise below into a reusable idea generation routine. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to create names with range, memorability, and the right emotional fit. Creative challenge: [describe what needs a name]. Context: [team, tool, workflow, or use case].

0823. Learn how to handle a naming exercise better

Act as a creative director. Teach me how to handle a naming exercise much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to create names with range, memorability, and the right emotional fit. Topic or problem: [describe what needs a name]. Current level: [describe experience].

0824. Design an AI assisted workflow for a naming exercise

Act as a creative director and AI workflow architect. Design an AI assisted system for the naming exercise below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to create names with range, memorability, and the right emotional fit. Current process: [describe what needs a name]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0825. Turn a content angle search into an idea brief

Act as a creative director. Turn the content angle search below into a clear idea brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to find sharper points of view instead of generic topic summaries. Ask at most three questions only if something essential is missing. Creative challenge: [describe the topic and audience]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0826. Build a step by step plan for a content angle search

Act as a creative director. Break the content angle search below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to find sharper points of view instead of generic topic summaries. Creative challenge: [describe the topic and audience]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0827. Prioritize a content angle search with ruthless focus

Act as a creative director. Review the content angle search below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to find sharper points of view instead of generic topic summaries. Creative challenge: [describe the topic and audience]. Options or tasks: [paste items]. Goal: [what matters most].

0828. Diagnose problems in a content angle search

Act as a creative director. Diagnose why this content angle search is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to find sharper points of view instead of generic topic summaries. Current situation: [describe the topic and audience]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0829. Draft a creative concept note for a content angle search

Act as a creative director. Draft a creative concept note based on the content angle search below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to find sharper points of view instead of generic topic summaries. Audience: [who will read this]. Creative challenge: [describe the topic and audience]. Tone: [confident, warm, direct, diplomatic, etc.].

0830. Convert a content angle search into an idea generation routine

Act as a creative director. Convert the content angle search below into a reusable idea generation routine. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to find sharper points of view instead of generic topic summaries. Creative challenge: [describe the topic and audience]. Context: [team, tool, workflow, or use case].

0831. Learn how to handle a content angle search better

Act as a creative director. Teach me how to handle a content angle search much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to find sharper points of view instead of generic topic summaries. Topic or problem: [describe the topic and audience]. Current level: [describe experience].

0832. Design an AI assisted workflow for a content angle search

Act as a creative director and AI workflow architect. Design an AI assisted system for the content angle search below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to find sharper points of view instead of generic topic summaries. Current process: [describe the topic and audience]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Presentations and Public Speaking

Prompts 0833-0864

These prompts help you turn ideas into stronger presentations with clearer flow, more confidence, and more memorable delivery.

0833. Turn a keynote draft into a presentation outline

Act as a presentation coach. Turn the keynote draft below into a clear presentation outline. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to shape the story arc, emotional beats, and practical takeaways. Ask at most three questions only if something essential is missing. Presentation input: [describe the keynote topic and audience]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0834. Build a step by step plan for a keynote draft

Act as a presentation coach. Break the keynote draft below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to shape the story arc, emotional beats, and practical takeaways. Presentation input: [describe the keynote topic and audience]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0835. Prioritize a keynote draft with ruthless focus

Act as a presentation coach. Review the keynote draft below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to shape the story arc, emotional beats, and practical takeaways. Presentation input: [describe the keynote topic and audience]. Options or tasks: [paste items]. Goal: [what matters most].

0836. Diagnose problems in a keynote draft

Act as a presentation coach. Diagnose why this keynote draft is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to shape the story arc, emotional beats, and practical takeaways. Current situation: [describe the keynote topic and audience]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0837. Draft a speaker note for a keynote draft

Act as a presentation coach. Draft a speaker note based on the keynote draft below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to shape the story arc, emotional beats, and practical takeaways. Audience: [who will read this]. Presentation input: [describe the keynote topic and audience]. Tone: [confident, warm, direct, diplomatic, etc.].

0838. Convert a keynote draft into a presentation rehearsal checklist

Act as a presentation coach. Convert the keynote draft below into a reusable presentation rehearsal checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to shape the story arc, emotional beats, and practical takeaways. Presentation input: [describe the keynote topic and audience]. Context: [team, tool, workflow, or use case].

0839. Learn how to handle a keynote draft better

Act as a presentation coach. Teach me how to handle a keynote draft much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to shape the story arc, emotional beats, and practical takeaways. Topic or problem: [describe the keynote topic and audience]. Current level: [describe experience].

0840. Design an AI assisted workflow for a keynote draft

Act as a presentation coach and AI workflow architect. Design an AI assisted system for the keynote draft below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to shape the story arc, emotional beats, and practical takeaways. Current process: [describe the keynote topic and audience]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0841. Turn a team presentation into a presentation outline

Act as a presentation coach. Turn the team presentation below into a clear presentation outline. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to balance clarity, brevity, and the need to align the room. Ask at most three questions only if something essential is missing. Presentation input: [describe the update or proposal]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0842. Build a step by step plan for a team presentation

Act as a presentation coach. Break the team presentation below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to balance clarity, brevity, and the need to align the room. Presentation input: [describe the update or proposal]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0843. Prioritize a team presentation with ruthless focus

Act as a presentation coach. Review the team presentation below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to balance clarity, brevity, and the need to align the room. Presentation input: [describe the update or proposal]. Options or tasks: [paste items]. Goal: [what matters most].

0844. Diagnose problems in a team presentation

Act as a presentation coach. Diagnose why this team presentation is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to balance clarity, brevity, and the need to align the room. Current situation: [describe the update or proposal]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0845. Draft a speaker note for a team presentation

Act as a presentation coach. Draft a speaker note based on the team presentation below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to balance clarity, brevity, and the need to align the room. Audience: [who will read this]. Presentation input: [describe the update or proposal]. Tone: [confident, warm, direct, diplomatic, etc.].

0846. Convert a team presentation into a presentation rehearsal checklist

Act as a presentation coach. Convert the team presentation below into a reusable presentation rehearsal checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to balance clarity, brevity, and the need to align the room. Presentation input: [describe the update or proposal]. Context: [team, tool, workflow, or use case].

0847. Learn how to handle a team presentation better

Act as a presentation coach. Teach me how to handle a team presentation much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to balance clarity, brevity, and the need to align the room. Topic or problem: [describe the update or proposal]. Current level: [describe experience].

0848. Design an AI assisted workflow for a team presentation

Act as a presentation coach and AI workflow architect. Design an AI assisted system for the team presentation below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to balance clarity, brevity, and the need to align the room. Current process: [describe the update or proposal]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0849. Turn a demo script into a presentation outline

Act as a presentation coach. Turn the demo script below into a clear presentation outline. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to show value quickly, avoid feature dumping, and handle likely questions. Ask at most three questions only if something essential is missing. Presentation input: [describe the product and demo goal]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0850. Build a step by step plan for a demo script

Act as a presentation coach. Break the demo script below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to show value quickly, avoid feature dumping, and handle likely questions. Presentation input: [describe the product and demo goal]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0851. Prioritize a demo script with ruthless focus

Act as a presentation coach. Review the demo script below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to show value quickly, avoid feature dumping, and handle likely questions. Presentation input: [describe the product and demo goal]. Options or tasks: [paste items]. Goal: [what matters most].

0852. Diagnose problems in a demo script

Act as a presentation coach. Diagnose why this demo script is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to show value quickly, avoid feature dumping, and handle likely questions. Current situation: [describe the product and demo goal]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0853. Draft a speaker note for a demo script

Act as a presentation coach. Draft a speaker note based on the demo script below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to show value quickly, avoid feature dumping, and handle likely questions. Audience: [who will read this]. Presentation input: [describe the product and demo goal]. Tone: [confident, warm, direct, diplomatic, etc.].

0854. Convert a demo script into a presentation rehearsal checklist

Act as a presentation coach. Convert the demo script below into a reusable presentation rehearsal checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to show value quickly, avoid feature dumping, and handle likely questions. Presentation input: [describe the product and demo goal]. Context: [team, tool, workflow, or use case].

0855. Learn how to handle a demo script better

Act as a presentation coach. Teach me how to handle a demo script much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to show value quickly, avoid feature dumping, and handle likely questions. Topic or problem: [describe the product and demo goal]. Current level: [describe experience].

0856. Design an AI assisted workflow for a demo script

Act as a presentation coach and AI workflow architect. Design an AI assisted system for the demo script below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to show value quickly, avoid feature dumping, and handle likely questions. Current process: [describe the product and demo goal]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0857. Turn a stakeholder pitch into a presentation outline

Act as a presentation coach. Turn the stakeholder pitch below into a clear presentation outline. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to make the recommendation credible, crisp, and decision friendly. Ask at most three questions only if something essential is missing. Presentation input: [describe the pitch and audience]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0858. Build a step by step plan for a stakeholder pitch

Act as a presentation coach. Break the stakeholder pitch below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to make the recommendation credible, crisp, and decision friendly. Presentation input: [describe the pitch and audience]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0859. Prioritize a stakeholder pitch with ruthless focus

Act as a presentation coach. Review the stakeholder pitch below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to make the recommendation credible, crisp, and decision friendly. Presentation input: [describe the pitch and audience]. Options or tasks: [paste items]. Goal: [what matters most].

0860. Diagnose problems in a stakeholder pitch

Act as a presentation coach. Diagnose why this stakeholder pitch is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to make the recommendation credible, crisp, and decision friendly. Current situation: [describe the pitch and audience]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0861. Draft a speaker note for a stakeholder pitch

Act as a presentation coach. Draft a speaker note based on the stakeholder pitch below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to make the recommendation credible, crisp, and decision friendly. Audience: [who will read this]. Presentation input: [describe the pitch and audience]. Tone: [confident, warm, direct, diplomatic, etc.].

0862. Convert a stakeholder pitch into a presentation rehearsal checklist

Act as a presentation coach. Convert the stakeholder pitch below into a reusable presentation rehearsal checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to make the recommendation credible, crisp, and decision friendly. Presentation input: [describe the pitch and audience]. Context: [team, tool, workflow, or use case].

0863. Learn how to handle a stakeholder pitch better

Act as a presentation coach. Teach me how to handle a stakeholder pitch much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to make the recommendation credible, crisp, and decision friendly. Topic or problem: [describe the pitch and audience]. Current level: [describe experience].

0864. Design an AI assisted workflow for a stakeholder pitch

Act as a presentation coach and AI workflow architect. Design an AI assisted system for the stakeholder pitch below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to make the recommendation credible, crisp, and decision friendly. Current process: [describe the pitch and audience]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Leadership and Delegation

Prompts 0865-0896

Use these prompts to lead with more clarity, delegate better, and turn management conversations into progress instead of friction.

0865. Turn a task to delegate into a delegation brief

Act as a leadership coach. Turn the task to delegate below into a clear delegation brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to transfer context, decision boundaries, and expected quality clearly. Ask at most three questions only if something essential is missing. Leadership situation: [describe the task and who may own it]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0866. Build a step by step plan for a task to delegate

Act as a leadership coach. Break the task to delegate below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to transfer context, decision boundaries, and expected quality clearly. Leadership situation: [describe the task and who may own it]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0867. Prioritize a task to delegate with ruthless focus

Act as a leadership coach. Review the task to delegate below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to transfer context, decision boundaries, and expected quality clearly. Leadership situation: [describe the task and who may own it]. Options or tasks: [paste items]. Goal: [what matters most].

0868. Diagnose problems in a task to delegate

Act as a leadership coach. Diagnose why this task to delegate is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to transfer context, decision boundaries, and expected quality clearly. Current situation: [describe the task and who may own it]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0869. Draft a manager note for a task to delegate

Act as a leadership coach. Draft a manager note based on the task to delegate below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to transfer context, decision boundaries, and expected quality clearly. Audience: [who will read this]. Leadership situation: [describe the task and who may own it]. Tone: [confident, warm, direct, diplomatic, etc.].

0870. Convert a task to delegate into a delegation checklist

Act as a leadership coach. Convert the task to delegate below into a reusable delegation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to transfer context, decision boundaries, and expected quality clearly. Leadership situation: [describe the task and who may own it]. Context: [team, tool, workflow, or use case].

0871. Learn how to handle a task to delegate better

Act as a leadership coach. Teach me how to handle a task to delegate much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to transfer context, decision boundaries, and expected quality clearly. Topic or problem: [describe the task and who may own it]. Current level: [describe experience].

0872. Design an AI assisted workflow for a task to delegate

Act as a leadership coach and AI workflow architect. Design an AI assisted system for the task to delegate below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to transfer context, decision boundaries, and expected quality clearly. Current process: [describe the task and who may own it]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0873. Turn an underperforming project owner into a delegation brief

Act as a leadership coach. Turn the underperforming project owner below into a clear delegation brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to balance accountability, support, and the need for visible improvement. Ask at most three questions only if something essential is missing. Leadership situation: [describe the situation]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0874. Build a step by step plan for an underperforming project owner

Act as a leadership coach. Break the underperforming project owner below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to balance accountability, support, and the need for visible improvement. Leadership situation: [describe the situation]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0875. Prioritize an underperforming project owner with ruthless focus

Act as a leadership coach. Review the underperforming project owner below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to balance accountability, support, and the need for visible improvement. Leadership situation: [describe the situation]. Options or tasks: [paste items]. Goal: [what matters most].

0876. Diagnose problems in an underperforming project owner

Act as a leadership coach. Diagnose why this underperforming project owner is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to balance accountability, support, and the need for visible improvement. Current situation: [describe the situation]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0877. Draft a manager note for an underperforming project owner

Act as a leadership coach. Draft a manager note based on the underperforming project owner below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to balance accountability, support, and the need for visible improvement. Audience: [who will read this]. Leadership situation: [describe the situation]. Tone: [confident, warm, direct, diplomatic, etc.].

0878. Convert an underperforming project owner into a delegation checklist

Act as a leadership coach. Convert the underperforming project owner below into a reusable delegation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to balance accountability, support, and the need for visible improvement. Leadership situation: [describe the situation]. Context: [team, tool, workflow, or use case].

0879. Learn how to handle an underperforming project owner better

Act as a leadership coach. Teach me how to handle an underperforming project owner much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to balance accountability, support, and the need for visible improvement. Topic or problem: [describe the situation]. Current level: [describe experience].

0880. Design an AI assisted workflow for an underperforming project owner

Act as a leadership coach and AI workflow architect. Design an AI assisted system for the underperforming project owner below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to balance accountability, support, and the need for visible improvement. Current process: [describe the situation]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0881. Turn a team alignment issue into a delegation brief

Act as a leadership coach. Turn the team alignment issue below into a clear delegation brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to surface the root tension, misaligned incentives, and next conversations needed. Ask at most three questions only if something essential is missing. Leadership situation: [describe the issue]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0882. Build a step by step plan for a team alignment issue

Act as a leadership coach. Break the team alignment issue below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to surface the root tension, misaligned incentives, and next conversations needed. Leadership situation: [describe the issue]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0883. Prioritize a team alignment issue with ruthless focus

Act as a leadership coach. Review the team alignment issue below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to surface the root tension, misaligned incentives, and next conversations needed. Leadership situation: [describe the issue]. Options or tasks: [paste items]. Goal: [what matters most].

0884. Diagnose problems in a team alignment issue

Act as a leadership coach. Diagnose why this team alignment issue is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to surface the root tension, misaligned incentives, and next conversations needed. Current situation: [describe the issue]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0885. Draft a manager note for a team alignment issue

Act as a leadership coach. Draft a manager note based on the team alignment issue below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to surface the root tension, misaligned incentives, and next conversations needed. Audience: [who will read this]. Leadership situation: [describe the issue]. Tone: [confident, warm, direct, diplomatic, etc.].

0886. Convert a team alignment issue into a delegation checklist

Act as a leadership coach. Convert the team alignment issue below into a reusable delegation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to surface the root tension, misaligned incentives, and next conversations needed. Leadership situation: [describe the issue]. Context: [team, tool, workflow, or use case].

0887. Learn how to handle a team alignment issue better

Act as a leadership coach. Teach me how to handle a team alignment issue much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to surface the root tension, misaligned incentives, and next conversations needed. Topic or problem: [describe the issue]. Current level: [describe experience].

0888. Design an AI assisted workflow for a team alignment issue

Act as a leadership coach and AI workflow architect. Design an AI assisted system for the team alignment issue below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to surface the root tension, misaligned incentives, and next conversations needed. Current process: [describe the issue]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0889. Turn a new manager challenge into a delegation brief

Act as a leadership coach. Turn the new manager challenge below into a clear delegation brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to focus on leverage, trust building, and repeatable management habits. Ask at most three questions only if something essential is missing. Leadership situation: [describe the challenge]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0890. Build a step by step plan for a new manager challenge

Act as a leadership coach. Break the new manager challenge below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to focus on leverage, trust building, and repeatable management habits. Leadership situation: [describe the challenge]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0891. Prioritize a new manager challenge with ruthless focus

Act as a leadership coach. Review the new manager challenge below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to focus on leverage, trust building, and repeatable management habits. Leadership situation: [describe the challenge]. Options or tasks: [paste items]. Goal: [what matters most].

0892. Diagnose problems in a new manager challenge

Act as a leadership coach. Diagnose why this new manager challenge is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to focus on leverage, trust building, and repeatable management habits. Current situation: [describe the challenge]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0893. Draft a manager note for a new manager challenge

Act as a leadership coach. Draft a manager note based on the new manager challenge below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to focus on leverage, trust building, and repeatable management habits. Audience: [who will read this]. Leadership situation: [describe the challenge]. Tone: [confident, warm, direct, diplomatic, etc.].

0894. Convert a new manager challenge into a delegation checklist

Act as a leadership coach. Convert the new manager challenge below into a reusable delegation checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to focus on leverage, trust building, and repeatable management habits. Leadership situation: [describe the challenge]. Context: [team, tool, workflow, or use case].

0895. Learn how to handle a new manager challenge better

Act as a leadership coach. Teach me how to handle a new manager challenge much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to focus on leverage, trust building, and repeatable management habits. Topic or problem: [describe the challenge]. Current level: [describe experience].

0896. Design an AI assisted workflow for a new manager challenge

Act as a leadership coach and AI workflow architect. Design an AI assisted system for the new manager challenge below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to focus on leverage, trust building, and repeatable management habits. Current process: [describe the challenge]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Hiring and Performance

Prompts 0897-0928

These prompts help you hire with more rigor, write better assessments, and make performance conversations clearer and fairer.

0897. Turn a job description into an evaluation brief

Act as a talent advisor. Turn the job description below into a clear evaluation brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to focus on the work that matters most, not inflated requirement lists. Ask at most three questions only if something essential is missing. People input: [describe the role and team context]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0898. Build a step by step plan for a job description

Act as a talent advisor. Break the job description below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to focus on the work that matters most, not inflated requirement lists. People input: [describe the role and team context]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0899. Prioritize a job description with ruthless focus

Act as a talent advisor. Review the job description below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to focus on the work that matters most, not inflated requirement lists. People input: [describe the role and team context]. Options or tasks: [paste items]. Goal: [what matters most].

0900. Diagnose problems in a job description

Act as a talent advisor. Diagnose why this job description is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to focus on the work that matters most, not inflated requirement lists. Current situation: [describe the role and team context]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0901. Draft a performance summary note for a job description

Act as a talent advisor. Draft a performance summary note based on the job description below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to focus on the work that matters most, not inflated requirement lists. Audience: [who will read this]. People input: [describe the role and team context]. Tone: [confident, warm, direct, diplomatic, etc.].

0902. Convert a job description into an interview and review checklist

Act as a talent advisor. Convert the job description below into a reusable interview and review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to focus on the work that matters most, not inflated requirement lists. People input: [describe the role and team context]. Context: [team, tool, workflow, or use case].

0903. Learn how to handle a job description better

Act as a talent advisor. Teach me how to handle a job description much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to focus on the work that matters most, not inflated requirement lists. Topic or problem: [describe the role and team context]. Current level: [describe experience].

0904. Design an AI assisted workflow for a job description

Act as a talent advisor and AI workflow architect. Design an AI assisted system for the job description below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to focus on the work that matters most, not inflated requirement lists. Current process: [describe the role and team context]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0905. Turn an interview notes into an evaluation brief

Act as a talent advisor. Turn the interview notes below into a clear evaluation brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to separate evidence, red flags, strengths, and open questions cleanly. Ask at most three questions only if something essential is missing. People input: [paste the notes]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0906. Build a step by step plan for an interview notes

Act as a talent advisor. Break the interview notes below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to separate evidence, red flags, strengths, and open questions cleanly. People input: [paste the notes]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0907. Prioritize an interview notes with ruthless focus

Act as a talent advisor. Review the interview notes below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to separate evidence, red flags, strengths, and open questions cleanly. People input: [paste the notes]. Options or tasks: [paste items]. Goal: [what matters most].

0908. Diagnose problems in an interview notes

Act as a talent advisor. Diagnose why this interview notes is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to separate evidence, red flags, strengths, and open questions cleanly. Current situation: [paste the notes]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0909. Draft a performance summary note for an interview notes

Act as a talent advisor. Draft a performance summary note based on the interview notes below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to separate evidence, red flags, strengths, and open questions cleanly. Audience: [who will read this]. People input: [paste the notes]. Tone: [confident, warm, direct, diplomatic, etc.].

0910. Convert an interview notes into an interview and review checklist

Act as a talent advisor. Convert the interview notes below into a reusable interview and review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to separate evidence, red flags, strengths, and open questions cleanly. People input: [paste the notes]. Context: [team, tool, workflow, or use case].

0911. Learn how to handle an interview notes better

Act as a talent advisor. Teach me how to handle an interview notes much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to separate evidence, red flags, strengths, and open questions cleanly. Topic or problem: [paste the notes]. Current level: [describe experience].

0912. Design an AI assisted workflow for an interview notes

Act as a talent advisor and AI workflow architect. Design an AI assisted system for the interview notes below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to separate evidence, red flags, strengths, and open questions cleanly. Current process: [paste the notes]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0913. Turn a performance review into an evaluation brief

Act as a talent advisor. Turn the performance review below into a clear evaluation brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to make the feedback balanced, specific, and useful for growth. Ask at most three questions only if something essential is missing. People input: [describe the person and context]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0914. Build a step by step plan for a performance review

Act as a talent advisor. Break the performance review below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to make the feedback balanced, specific, and useful for growth. People input: [describe the person and context]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0915. Prioritize a performance review with ruthless focus

Act as a talent advisor. Review the performance review below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to make the feedback balanced, specific, and useful for growth. People input: [describe the person and context]. Options or tasks: [paste items]. Goal: [what matters most].

0916. Diagnose problems in a performance review

Act as a talent advisor. Diagnose why this performance review is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to make the feedback balanced, specific, and useful for growth. Current situation: [describe the person and context]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0917. Draft a performance summary note for a performance review

Act as a talent advisor. Draft a performance summary note based on the performance review below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to make the feedback balanced, specific, and useful for growth. Audience: [who will read this]. People input: [describe the person and context]. Tone: [confident, warm, direct, diplomatic, etc.].

0918. Convert a performance review into an interview and review checklist

Act as a talent advisor. Convert the performance review below into a reusable interview and review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to make the feedback balanced, specific, and useful for growth. People input: [describe the person and context]. Context: [team, tool, workflow, or use case].

0919. Learn how to handle a performance review better

Act as a talent advisor. Teach me how to handle a performance review much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to make the feedback balanced, specific, and useful for growth. Topic or problem: [describe the person and context]. Current level: [describe experience].

0920. Design an AI assisted workflow for a performance review

Act as a talent advisor and AI workflow architect. Design an AI assisted system for the performance review below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to make the feedback balanced, specific, and useful for growth. Current process: [describe the person and context]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0921. Turn a hiring scorecard into an evaluation brief

Act as a talent advisor. Turn the hiring scorecard below into a clear evaluation brief. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to define what good looks like before opinions drift during the process. Ask at most three questions only if something essential is missing. People input: [describe the role and success profile]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0922. Build a step by step plan for a hiring scorecard

Act as a talent advisor. Break the hiring scorecard below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to define what good looks like before opinions drift during the process. People input: [describe the role and success profile]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0923. Prioritize a hiring scorecard with ruthless focus

Act as a talent advisor. Review the hiring scorecard below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to define what good looks like before opinions drift during the process. People input: [describe the role and success profile]. Options or tasks: [paste items]. Goal: [what matters most].

0924. Diagnose problems in a hiring scorecard

Act as a talent advisor. Diagnose why this hiring scorecard is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to define what good looks like before opinions drift during the process. Current situation: [describe the role and success profile]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0925. Draft a performance summary note for a hiring scorecard

Act as a talent advisor. Draft a performance summary note based on the hiring scorecard below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to define what good looks like before opinions drift during the process. Audience: [who will read this]. People input: [describe the role and success profile]. Tone: [confident, warm, direct, diplomatic, etc.].

0926. Convert a hiring scorecard into an interview and review checklist

Act as a talent advisor. Convert the hiring scorecard below into a reusable interview and review checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to define what good looks like before opinions drift during the process. People input: [describe the role and success profile]. Context: [team, tool, workflow, or use case].

0927. Learn how to handle a hiring scorecard better

Act as a talent advisor. Teach me how to handle a hiring scorecard much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to define what good looks like before opinions drift during the process. Topic or problem: [describe the role and success profile]. Current level: [describe experience].

0928. Design an AI assisted workflow for a hiring scorecard

Act as a talent advisor and AI workflow architect. Design an AI assisted system for the hiring scorecard below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to define what good looks like before opinions drift during the process. Current process: [describe the role and success profile]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Negotiation and Stakeholder Management

Prompts 0929-0960

Use these prompts to prepare for difficult conversations, clarify leverage, and manage expectations without losing relationships.

0929. Turn a scope negotiation into a negotiation plan

Act as a negotiation strategist. Turn the scope negotiation below into a clear negotiation plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to make trade offs explicit and protect the core objective without posturing. Ask at most three questions only if something essential is missing. Negotiation or stakeholder situation: [describe the situation and counterpart]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0930. Build a step by step plan for a scope negotiation

Act as a negotiation strategist. Break the scope negotiation below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to make trade offs explicit and protect the core objective without posturing. Negotiation or stakeholder situation: [describe the situation and counterpart]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0931. Prioritize a scope negotiation with ruthless focus

Act as a negotiation strategist. Review the scope negotiation below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to make trade offs explicit and protect the core objective without posturing. Negotiation or stakeholder situation: [describe the situation and counterpart]. Options or tasks: [paste items]. Goal: [what matters most].

0932. Diagnose problems in a scope negotiation

Act as a negotiation strategist. Diagnose why this scope negotiation is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to make trade offs explicit and protect the core objective without posturing. Current situation: [describe the situation and counterpart]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0933. Draft a stakeholder note for a scope negotiation

Act as a negotiation strategist. Draft a stakeholder note based on the scope negotiation below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to make trade offs explicit and protect the core objective without posturing. Audience: [who will read this]. Negotiation or stakeholder situation: [describe the situation and counterpart]. Tone: [confident, warm, direct, diplomatic, etc.].

0934. Convert a scope negotiation into a stakeholder management checklist

Act as a negotiation strategist. Convert the scope negotiation below into a reusable stakeholder management checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to make trade offs explicit and protect the core objective without posturing. Negotiation or stakeholder situation: [describe the situation and counterpart]. Context: [team, tool, workflow, or use case].

0935. Learn how to handle a scope negotiation better

Act as a negotiation strategist. Teach me how to handle a scope negotiation much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to make trade offs explicit and protect the core objective without posturing. Topic or problem: [describe the situation and counterpart]. Current level: [describe experience].

0936. Design an AI assisted workflow for a scope negotiation

Act as a negotiation strategist and AI workflow architect. Design an AI assisted system for the scope negotiation below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to make trade offs explicit and protect the core objective without posturing. Current process: [describe the situation and counterpart]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0937. Turn a budget discussion into a negotiation plan

Act as a negotiation strategist. Turn the budget discussion below into a clear negotiation plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to surface priorities, constraints, and fallback positions before the conversation. Ask at most three questions only if something essential is missing. Negotiation or stakeholder situation: [describe the budget issue]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0938. Build a step by step plan for a budget discussion

Act as a negotiation strategist. Break the budget discussion below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to surface priorities, constraints, and fallback positions before the conversation. Negotiation or stakeholder situation: [describe the budget issue]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0939. Prioritize a budget discussion with ruthless focus

Act as a negotiation strategist. Review the budget discussion below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to surface priorities, constraints, and fallback positions before the conversation. Negotiation or stakeholder situation: [describe the budget issue]. Options or tasks: [paste items]. Goal: [what matters most].

0940. Diagnose problems in a budget discussion

Act as a negotiation strategist. Diagnose why this budget discussion is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to surface priorities, constraints, and fallback positions before the conversation. Current situation: [describe the budget issue]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0941. Draft a stakeholder note for a budget discussion

Act as a negotiation strategist. Draft a stakeholder note based on the budget discussion below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to surface priorities, constraints, and fallback positions before the conversation. Audience: [who will read this]. Negotiation or stakeholder situation: [describe the budget issue]. Tone: [confident, warm, direct, diplomatic, etc.].

0942. Convert a budget discussion into a stakeholder management checklist

Act as a negotiation strategist. Convert the budget discussion below into a reusable stakeholder management checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to surface priorities, constraints, and fallback positions before the conversation. Negotiation or stakeholder situation: [describe the budget issue]. Context: [team, tool, workflow, or use case].

0943. Learn how to handle a budget discussion better

Act as a negotiation strategist. Teach me how to handle a budget discussion much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to surface priorities, constraints, and fallback positions before the conversation. Topic or problem: [describe the budget issue]. Current level: [describe experience].

0944. Design an AI assisted workflow for a budget discussion

Act as a negotiation strategist and AI workflow architect. Design an AI assisted system for the budget discussion below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to surface priorities, constraints, and fallback positions before the conversation. Current process: [describe the budget issue]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0945. Turn a difficult stakeholder into a negotiation plan

Act as a negotiation strategist. Turn the difficult stakeholder below into a clear negotiation plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to separate personality friction from the real incentives and concerns. Ask at most three questions only if something essential is missing. Negotiation or stakeholder situation: [describe the stakeholder and challenge]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0946. Build a step by step plan for a difficult stakeholder

Act as a negotiation strategist. Break the difficult stakeholder below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to separate personality friction from the real incentives and concerns. Negotiation or stakeholder situation: [describe the stakeholder and challenge]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0947. Prioritize a difficult stakeholder with ruthless focus

Act as a negotiation strategist. Review the difficult stakeholder below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to separate personality friction from the real incentives and concerns. Negotiation or stakeholder situation: [describe the stakeholder and challenge]. Options or tasks: [paste items]. Goal: [what matters most].

0948. Diagnose problems in a difficult stakeholder

Act as a negotiation strategist. Diagnose why this difficult stakeholder is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to separate personality friction from the real incentives and concerns. Current situation: [describe the stakeholder and challenge]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0949. Draft a stakeholder note for a difficult stakeholder

Act as a negotiation strategist. Draft a stakeholder note based on the difficult stakeholder below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to separate personality friction from the real incentives and concerns. Audience: [who will read this]. Negotiation or stakeholder situation: [describe the stakeholder and challenge]. Tone: [confident, warm, direct, diplomatic, etc.].

0950. Convert a difficult stakeholder into a stakeholder management checklist

Act as a negotiation strategist. Convert the difficult stakeholder below into a reusable stakeholder management checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to separate personality friction from the real incentives and concerns. Negotiation or stakeholder situation: [describe the stakeholder and challenge]. Context: [team, tool, workflow, or use case].

0951. Learn how to handle a difficult stakeholder better

Act as a negotiation strategist. Teach me how to handle a difficult stakeholder much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to separate personality friction from the real incentives and concerns. Topic or problem: [describe the stakeholder and challenge]. Current level: [describe experience].

0952. Design an AI assisted workflow for a difficult stakeholder

Act as a negotiation strategist and AI workflow architect. Design an AI assisted system for the difficult stakeholder below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to separate personality friction from the real incentives and concerns. Current process: [describe the stakeholder and challenge]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0953. Turn a partnership terms into a negotiation plan

Act as a negotiation strategist. Turn the partnership terms below into a clear negotiation plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to clarify value exchange, risk, and non negotiables on both sides. Ask at most three questions only if something essential is missing. Negotiation or stakeholder situation: [describe the partnership and terms under discussion]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0954. Build a step by step plan for a partnership terms

Act as a negotiation strategist. Break the partnership terms below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to clarify value exchange, risk, and non negotiables on both sides. Negotiation or stakeholder situation: [describe the partnership and terms under discussion]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0955. Prioritize a partnership terms with ruthless focus

Act as a negotiation strategist. Review the partnership terms below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to clarify value exchange, risk, and non negotiables on both sides. Negotiation or stakeholder situation: [describe the partnership and terms under discussion]. Options or tasks: [paste items]. Goal: [what matters most].

0956. Diagnose problems in a partnership terms

Act as a negotiation strategist. Diagnose why this partnership terms is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to clarify value exchange, risk, and non negotiables on both sides. Current situation: [describe the partnership and terms under discussion]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0957. Draft a stakeholder note for a partnership terms

Act as a negotiation strategist. Draft a stakeholder note based on the partnership terms below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to clarify value exchange, risk, and non negotiables on both sides. Audience: [who will read this]. Negotiation or stakeholder situation: [describe the partnership and terms under discussion]. Tone: [confident, warm, direct, diplomatic, etc.].

0958. Convert a partnership terms into a stakeholder management checklist

Act as a negotiation strategist. Convert the partnership terms below into a reusable stakeholder management checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to clarify value exchange, risk, and non negotiables on both sides. Negotiation or stakeholder situation: [describe the partnership and terms under discussion]. Context: [team, tool, workflow, or use case].

0959. Learn how to handle a partnership terms better

Act as a negotiation strategist. Teach me how to handle a partnership terms much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to clarify value exchange, risk, and non negotiables on both sides. Topic or problem: [describe the partnership and terms under discussion]. Current level: [describe experience].

0960. Design an AI assisted workflow for a partnership terms

Act as a negotiation strategist and AI workflow architect. Design an AI assisted system for the partnership terms below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to clarify value exchange, risk, and non negotiables on both sides. Current process: [describe the partnership and terms under discussion]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Knowledge Management and Documentation

Prompts 0961-0992

These prompts help you organize notes, build better internal docs, and make important knowledge easier to find and reuse.

0961. Turn a scattered notes into a documentation plan

Act as a knowledge systems architect. Turn the scattered notes below into a clear documentation plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to group ideas into a structure that is searchable and reusable later. Ask at most three questions only if something essential is missing. Knowledge input: [paste notes or describe the note set]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0962. Build a step by step plan for a scattered notes

Act as a knowledge systems architect. Break the scattered notes below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to group ideas into a structure that is searchable and reusable later. Knowledge input: [paste notes or describe the note set]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0963. Prioritize a scattered notes with ruthless focus

Act as a knowledge systems architect. Review the scattered notes below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to group ideas into a structure that is searchable and reusable later. Knowledge input: [paste notes or describe the note set]. Options or tasks: [paste items]. Goal: [what matters most].

0964. Diagnose problems in a scattered notes

Act as a knowledge systems architect. Diagnose why this scattered notes is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to group ideas into a structure that is searchable and reusable later. Current situation: [paste notes or describe the note set]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0965. Draft a documentation handoff note for a scattered notes

Act as a knowledge systems architect. Draft a documentation handoff note based on the scattered notes below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to group ideas into a structure that is searchable and reusable later. Audience: [who will read this]. Knowledge input: [paste notes or describe the note set]. Tone: [confident, warm, direct, diplomatic, etc.].

0966. Convert a scattered notes into a knowledge capture checklist

Act as a knowledge systems architect. Convert the scattered notes below into a reusable knowledge capture checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to group ideas into a structure that is searchable and reusable later. Knowledge input: [paste notes or describe the note set]. Context: [team, tool, workflow, or use case].

0967. Learn how to handle a scattered notes better

Act as a knowledge systems architect. Teach me how to handle a scattered notes much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to group ideas into a structure that is searchable and reusable later. Topic or problem: [paste notes or describe the note set]. Current level: [describe experience].

0968. Design an AI assisted workflow for a scattered notes

Act as a knowledge systems architect and AI workflow architect. Design an AI assisted system for the scattered notes below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to group ideas into a structure that is searchable and reusable later. Current process: [paste notes or describe the note set]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0969. Turn a team wiki gap into a documentation plan

Act as a knowledge systems architect. Turn the team wiki gap below into a clear documentation plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to prioritize the pages that reduce repeated questions and onboarding pain. Ask at most three questions only if something essential is missing. Knowledge input: [describe what is missing in the wiki]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0970. Build a step by step plan for a team wiki gap

Act as a knowledge systems architect. Break the team wiki gap below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to prioritize the pages that reduce repeated questions and onboarding pain. Knowledge input: [describe what is missing in the wiki]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0971. Prioritize a team wiki gap with ruthless focus

Act as a knowledge systems architect. Review the team wiki gap below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to prioritize the pages that reduce repeated questions and onboarding pain. Knowledge input: [describe what is missing in the wiki]. Options or tasks: [paste items]. Goal: [what matters most].

0972. Diagnose problems in a team wiki gap

Act as a knowledge systems architect. Diagnose why this team wiki gap is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to prioritize the pages that reduce repeated questions and onboarding pain. Current situation: [describe what is missing in the wiki]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0973. Draft a documentation handoff note for a team wiki gap

Act as a knowledge systems architect. Draft a documentation handoff note based on the team wiki gap below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to prioritize the pages that reduce repeated questions and onboarding pain. Audience: [who will read this]. Knowledge input: [describe what is missing in the wiki]. Tone: [confident, warm, direct, diplomatic, etc.].

0974. Convert a team wiki gap into a knowledge capture checklist

Act as a knowledge systems architect. Convert the team wiki gap below into a reusable knowledge capture checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to prioritize the pages that reduce repeated questions and onboarding pain. Knowledge input: [describe what is missing in the wiki]. Context: [team, tool, workflow, or use case].

0975. Learn how to handle a team wiki gap better

Act as a knowledge systems architect. Teach me how to handle a team wiki gap much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to prioritize the pages that reduce repeated questions and onboarding pain. Topic or problem: [describe what is missing in the wiki]. Current level: [describe experience].

0976. Design an AI assisted workflow for a team wiki gap

Act as a knowledge systems architect and AI workflow architect. Design an AI assisted system for the team wiki gap below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to prioritize the pages that reduce repeated questions and onboarding pain. Current process: [describe what is missing in the wiki]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0977. Turn a documentation request into a documentation plan

Act as a knowledge systems architect. Turn the documentation request below into a clear documentation plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to match the document to the real user, task, and level of detail needed. Ask at most three questions only if something essential is missing. Knowledge input: [describe what needs to be documented]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0978. Build a step by step plan for a documentation request

Act as a knowledge systems architect. Break the documentation request below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to match the document to the real user, task, and level of detail needed. Knowledge input: [describe what needs to be documented]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0979. Prioritize a documentation request with ruthless focus

Act as a knowledge systems architect. Review the documentation request below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to match the document to the real user, task, and level of detail needed. Knowledge input: [describe what needs to be documented]. Options or tasks: [paste items]. Goal: [what matters most].

0980. Diagnose problems in a documentation request

Act as a knowledge systems architect. Diagnose why this documentation request is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to match the document to the real user, task, and level of detail needed. Current situation: [describe what needs to be documented]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0981. Draft a documentation handoff note for a documentation request

Act as a knowledge systems architect. Draft a documentation handoff note based on the documentation request below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to match the document to the real user, task, and level of detail needed. Audience: [who will read this]. Knowledge input: [describe what needs to be documented]. Tone: [confident, warm, direct, diplomatic, etc.].

0982. Convert a documentation request into a knowledge capture checklist

Act as a knowledge systems architect. Convert the documentation request below into a reusable knowledge capture checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to match the document to the real user, task, and level of detail needed. Knowledge input: [describe what needs to be documented]. Context: [team, tool, workflow, or use case].

0983. Learn how to handle a documentation request better

Act as a knowledge systems architect. Teach me how to handle a documentation request much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to match the document to the real user, task, and level of detail needed. Topic or problem: [describe what needs to be documented]. Current level: [describe experience].

0984. Design an AI assisted workflow for a documentation request

Act as a knowledge systems architect and AI workflow architect. Design an AI assisted system for the documentation request below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to match the document to the real user, task, and level of detail needed. Current process: [describe what needs to be documented]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

0985. Turn a research archive into a documentation plan

Act as a knowledge systems architect. Turn the research archive below into a clear documentation plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to preserve nuance while making retrieval and comparison much easier. Ask at most three questions only if something essential is missing. Knowledge input: [describe the archive or material]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0986. Build a step by step plan for a research archive

Act as a knowledge systems architect. Break the research archive below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to preserve nuance while making retrieval and comparison much easier. Knowledge input: [describe the archive or material]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0987. Prioritize a research archive with ruthless focus

Act as a knowledge systems architect. Review the research archive below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to preserve nuance while making retrieval and comparison much easier. Knowledge input: [describe the archive or material]. Options or tasks: [paste items]. Goal: [what matters most].

0988. Diagnose problems in a research archive

Act as a knowledge systems architect. Diagnose why this research archive is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to preserve nuance while making retrieval and comparison much easier. Current situation: [describe the archive or material]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0989. Draft a documentation handoff note for a research archive

Act as a knowledge systems architect. Draft a documentation handoff note based on the research archive below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to preserve nuance while making retrieval and comparison much easier. Audience: [who will read this]. Knowledge input: [describe the archive or material]. Tone: [confident, warm, direct, diplomatic, etc.].

0990. Convert a research archive into a knowledge capture checklist

Act as a knowledge systems architect. Convert the research archive below into a reusable knowledge capture checklist. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to preserve nuance while making retrieval and comparison much easier. Knowledge input: [describe the archive or material]. Context: [team, tool, workflow, or use case].

0991. Learn how to handle a research archive better

Act as a knowledge systems architect. Teach me how to handle a research archive much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to preserve nuance while making retrieval and comparison much easier. Topic or problem: [describe the archive or material]. Current level: [describe experience].

0992. Design an AI assisted workflow for a research archive

Act as a knowledge systems architect and AI workflow architect. Design an AI assisted system for the research archive below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to preserve nuance while making retrieval and comparison much easier. Current process: [describe the archive or material]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Reflection and Continuous Improvement

Prompts 0993-1024

Use these prompts to reflect honestly, learn from experience, and create improvement loops that actually change future behavior.

0993. Turn a weekly review into an improvement plan

Act as a performance coach. Turn the weekly review below into a clear improvement plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to identify what mattered, what drifted, and what should change next week. Ask at most three questions only if something essential is missing. Review input: [describe the week or paste notes]. Context: [paste any relevant background]. Deadline: [date or timeframe].

0994. Build a step by step plan for a weekly review

Act as a performance coach. Break the weekly review below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to identify what mattered, what drifted, and what should change next week. Review input: [describe the week or paste notes]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

0995. Prioritize a weekly review with ruthless focus

Act as a performance coach. Review the weekly review below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to identify what mattered, what drifted, and what should change next week. Review input: [describe the week or paste notes]. Options or tasks: [paste items]. Goal: [what matters most].

0996. Diagnose problems in a weekly review

Act as a performance coach. Diagnose why this weekly review is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to identify what mattered, what drifted, and what should change next week. Current situation: [describe the week or paste notes]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

0997. Draft a reflection summary for a weekly review

Act as a performance coach. Draft a reflection summary based on the weekly review below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to identify what mattered, what drifted, and what should change next week. Audience: [who will read this]. Review input: [describe the week or paste notes]. Tone: [confident, warm, direct, diplomatic, etc.].

0998. Convert a weekly review into a review ritual

Act as a performance coach. Convert the weekly review below into a reusable review ritual. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to identify what mattered, what drifted, and what should change next week. Review input: [describe the week or paste notes]. Context: [team, tool, workflow, or use case].

0999. Learn how to handle a weekly review better

Act as a performance coach. Teach me how to handle a weekly review much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to identify what mattered, what drifted, and what should change next week. Topic or problem: [describe the week or paste notes]. Current level: [describe experience].

1000. Design an AI assisted workflow for a weekly review

Act as a performance coach and AI workflow architect. Design an AI assisted system for the weekly review below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to identify what mattered, what drifted, and what should change next week. Current process: [describe the week or paste notes]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

1001. Turn a project postmortem into an improvement plan

Act as a performance coach. Turn the project postmortem below into a clear improvement plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to separate luck, process, judgment, and communication lessons. Ask at most three questions only if something essential is missing. Review input: [describe the project and outcome]. Context: [paste any relevant background]. Deadline: [date or timeframe].

1002. Build a step by step plan for a project postmortem

Act as a performance coach. Break the project postmortem below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to separate luck, process, judgment, and communication lessons. Review input: [describe the project and outcome]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

1003. Prioritize a project postmortem with ruthless focus

Act as a performance coach. Review the project postmortem below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to separate luck, process, judgment, and communication lessons. Review input: [describe the project and outcome]. Options or tasks: [paste items]. Goal: [what matters most].

1004. Diagnose problems in a project postmortem

Act as a performance coach. Diagnose why this project postmortem is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to separate luck, process, judgment, and communication lessons. Current situation: [describe the project and outcome]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

1005. Draft a reflection summary for a project postmortem

Act as a performance coach. Draft a reflection summary based on the project postmortem below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to separate luck, process, judgment, and communication lessons. Audience: [who will read this]. Review input: [describe the project and outcome]. Tone: [confident, warm, direct, diplomatic, etc.].

1006. Convert a project postmortem into a review ritual

Act as a performance coach. Convert the project postmortem below into a reusable review ritual. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to separate luck, process, judgment, and communication lessons. Review input: [describe the project and outcome]. Context: [team, tool, workflow, or use case].

1007. Learn how to handle a project postmortem better

Act as a performance coach. Teach me how to handle a project postmortem much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to separate luck, process, judgment, and communication lessons. Topic or problem: [describe the project and outcome]. Current level: [describe experience].

1008. Design an AI assisted workflow for a project postmortem

Act as a performance coach and AI workflow architect. Design an AI assisted system for the project postmortem below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to separate luck, process, judgment, and communication lessons. Current process: [describe the project and outcome]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

1009. Turn a habit audit into an improvement plan

Act as a performance coach. Turn the habit audit below into a clear improvement plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to find the real friction points and the smallest useful adjustment. Ask at most three questions only if something essential is missing. Review input: [describe the habit or routine]. Context: [paste any relevant background]. Deadline: [date or timeframe].

1010. Build a step by step plan for a habit audit

Act as a performance coach. Break the habit audit below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to find the real friction points and the smallest useful adjustment. Review input: [describe the habit or routine]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

1011. Prioritize a habit audit with ruthless focus

Act as a performance coach. Review the habit audit below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to find the real friction points and the smallest useful adjustment. Review input: [describe the habit or routine]. Options or tasks: [paste items]. Goal: [what matters most].

1012. Diagnose problems in a habit audit

Act as a performance coach. Diagnose why this habit audit is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to find the real friction points and the smallest useful adjustment. Current situation: [describe the habit or routine]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

1013. Draft a reflection summary for a habit audit

Act as a performance coach. Draft a reflection summary based on the habit audit below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to find the real friction points and the smallest useful adjustment. Audience: [who will read this]. Review input: [describe the habit or routine]. Tone: [confident, warm, direct, diplomatic, etc.].

1014. Convert a habit audit into a review ritual

Act as a performance coach. Convert the habit audit below into a reusable review ritual. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to find the real friction points and the smallest useful adjustment. Review input: [describe the habit or routine]. Context: [team, tool, workflow, or use case].

1015. Learn how to handle a habit audit better

Act as a performance coach. Teach me how to handle a habit audit much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to find the real friction points and the smallest useful adjustment. Topic or problem: [describe the habit or routine]. Current level: [describe experience].

1016. Design an AI assisted workflow for a habit audit

Act as a performance coach and AI workflow architect. Design an AI assisted system for the habit audit below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to find the real friction points and the smallest useful adjustment. Current process: [describe the habit or routine]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

1017. Turn a quarter planning into an improvement plan

Act as a performance coach. Turn the quarter planning below into a clear improvement plan. Give me: 1) the objective in one sentence, 2) what success looks like, 3) the critical stakeholders or users, 4) assumptions and constraints, 5) the first five actions, and 6) a crisp definition of done. Pay special attention to connect reflection to priorities, resource limits, and realistic focus. Ask at most three questions only if something essential is missing. Review input: [describe the quarter ahead]. Context: [paste any relevant background]. Deadline: [date or timeframe].

1018. Build a step by step plan for a quarter planning

Act as a performance coach. Break the quarter planning below into a practical sequence of steps. Organize the work into phases, estimate effort level, identify dependencies, surface the single highest leverage next step, and give me a 7 day plan plus a version for the next 90 minutes. Keep the plan realistic and biased toward momentum. Pay special attention to connect reflection to priorities, resource limits, and realistic focus. Review input: [describe the quarter ahead]. Context: [paste background]. Constraints: [time, budget, tools, approvals].

1019. Prioritize a quarter planning with ruthless focus

Act as a performance coach. Review the quarter planning below and prioritize it using impact, urgency, reversibility, effort, and downstream risk. Return a table with 'Do now', 'Schedule', 'Delegate', and 'Ignore for now', then explain the trade offs in plain English. End with the exact next 3 actions I should take in order. Pay special attention to connect reflection to priorities, resource limits, and realistic focus. Review input: [describe the quarter ahead]. Options or tasks: [paste items]. Goal: [what matters most].

1020. Diagnose problems in a quarter planning

Act as a performance coach. Diagnose why this quarter planning is underperforming, stalled, confusing, or risky. Separate symptoms from root causes, list the missing information that would change the diagnosis, identify the top three blockers, and propose fixes ranked by speed to value. Then write a short recovery plan for the next 48 hours and next 2 weeks. Pay special attention to connect reflection to priorities, resource limits, and realistic focus. Current situation: [describe the quarter ahead]. Evidence: [paste notes, metrics, screenshots, or examples]. Constraints: [important limits].

1021. Draft a reflection summary for a quarter planning

Act as a performance coach. Draft a reflection summary based on the quarter planning below. Make it concise, specific, and easy to act on. Include a strong opening, the essential context, the key ask or recommendation, and a shorter version that is about 30 percent tighter. Pay special attention to connect reflection to priorities, resource limits, and realistic focus. Audience: [who will read this]. Review input: [describe the quarter ahead]. Tone: [confident, warm, direct, diplomatic, etc.].

1022. Convert a quarter planning into a review ritual

Act as a performance coach. Convert the quarter planning below into a reusable review ritual. Include triggers, required inputs, step by step actions, quality checks, common mistakes, and an escalation rule. Make it practical enough that a new team member could use it without extra coaching. Pay special attention to connect reflection to priorities, resource limits, and realistic focus. Review input: [describe the quarter ahead]. Context: [team, tool, workflow, or use case].

1023. Learn how to handle a quarter planning better

Act as a performance coach. Teach me how to handle a quarter planning much better. Start with the 20 percent of knowledge that creates 80 percent of the results, then give me a practice exercise, a self check rubric, and three common mistakes to avoid. Adapt the explanation for my level: [beginner, intermediate, or advanced]. Pay special attention to connect reflection to priorities, resource limits, and realistic focus. Topic or problem: [describe the quarter ahead]. Current level: [describe experience].

1024. Design an AI assisted workflow for a quarter planning

Act as a performance coach and AI workflow architect. Design an AI assisted system for the quarter planning below. Show the ideal workflow, where AI should draft, analyze, summarize, or check, where a human must review, what inputs and prompts are needed, what could break, and how to measure success over time. Keep the workflow lean and realistic. Pay special attention to connect reflection to priorities, resource limits, and realistic focus. Current process: [describe the quarter ahead]. Tools available: [tools]. Constraints: [privacy, quality, budget, turnaround].

Quick prompt upgrade framework

When a prompt feels average, improve one of these variables: the role, the exact output you want, the constraints, the audience, the evaluation criteria, or the source material you give the model. A good prompt does not need fancy wording. It needs enough specificity to remove guesswork.

Five upgrades that usually help immediately

1) Add the real audience. 2) Add the raw input, not just your summary. 3) State the output format. 4) Name the constraint that matters most. 5) Ask for trade offs, not just answers.
